This best-selling resource provides a general overview and basic information for all adult intensive care units. The material is presented in a brief and quick-access format which allows for topic and exam review. It provides enough detailed and specific information to address most all questions and problems that arise in the ICU. Emphasis on fundamental principles in the text should prove useful for patient care outside the ICU as well. New chapters in this edition include hyperthermia and hypothermia syndromes; infection control in the ICU; and severe airflow obstruction. Sections have been reorganized and consolidated when appropriate to reinforce concepts. The book reviews scholarly literature and archival sources including maps and diagrams, to better situate Siena's achievement in urban history and broadens our understanding of medieval technology and urban life.

This history of British and American television drama since 1970 charts the increased transnationalisation of the two production systems. From *The Forsyte Saga* to *Roots* to *Episodes* , it highlights the close relationship that drives innovation and quality on both sides of the Atlantic.

Francesco Koslovic--even his name straddles two cultures. And during the

spring of 1955, in the village of Materada on the Istrian Peninsula, his two worlds are coming apart. Materada, the first volume of Fulvio Tomizza's celebrated Istrian Trilogy, depicts the Istrian exodus of the hundreds of thousands who had once thrived in a rich ethnic mixture of Italians and Slavs. Complicating Koslovic's own departure is his attempt to keep the land that he and his brother have worked all their lives. A picture of a disappearing way of life, a tale of feud and displacement, and imbued with the tastes, tales, and songs of his native Istria, Koslovic's story is a testament to the intertwined ethnic roots of Balkan history.

**An eye for an eye. It's very simple. You choose your homeland like a hyena picking and choosing where he steals his next meal from. Scavenger. Yes you grovel to the feet of Mengistu and when his people spit at you and kick you from the bowl you scuttle across the border. Scavenger. As a violent civil war rages back home in Ethiopia, teenager Alem**

**and his father are in a bed and breakfast in Berkshire. It's his best holiday ever. The next morning his father is gone and has left a note explaining that he and his mother want to protect Alem from the war. This strange grey country of England is now his home. On his own, and in the hands of the social services and the Refugee Council, Alem lives from letter to letter, waiting to hear something from his father. Then he meets car-obsessed Mustapha, the lovely 'out-of-your-league' Ruth and dangerous Sweeney – three unexpected allies who spur him on in his fight to be seen as more than just the Refugee Boy. Lemn Sissay's remarkable stage adaptation of Benjamin Zephaniah's bestselling novel is published here in the Methuen Drama Student Edition series, featuring commentary & notes by Professor Lynette Goddard (Royal Holloway, University of London, UK) that help the student unpack the play's themes, language, structure and production history to date.**

**"In this marvelous, learned, and friendly volume, Helen Barolini traces the contours of his career and reveals Aldus and the Aldine press in historical and cultural context; she admirably conveys the magic of an age in which the book as we know it was invented. Processes of multi-scalar regional urbanization are occurring worldwide. Such processes**

are clearly distinguishable from those of the nineteenth and twentieth centuries due to the shifting concepts of both the city and the metropolis. International literature highlights how what we have historically associated with the idea of cities has long been subjected to consistent reconfiguration, which involves stressing some of the typical features of the idea of "cityness". **Post-Metropolitan Territories: Looking for a New Urbanity** is the product of a research project funded by the Italian Ministry for Education, Universities and Research (MIUR). It constitutes a thorough overview of a country that is one of Europe's most diverse in terms of regional development and performance: Italy. This book brings together case studies of a number of Italian cities and their hinterlands and looks at new forms of urbanization, exploring themes of sustainability, industrialization, de-industrialization, governance, city planning and quality of life. This volume will be of great interest to academics and students who study regional development, economic geography and urban studies, as well as civil servants and policymakers in the field of spatial planning, urban policy, territorial policies and governance.

***This book studies the Arabic-Islamic view of Byzantium, tracing the Byzantine image as it evolved through centuries of warfare, contact, and exchanges. Including previously inaccessible material on the Arabic textual tradition on Byzantium, this investigation shows the significance of Byzantium to the Arab Muslim establishment and their appreciation of various facets of Byzantine culture and civilization. The Arabic-Islamic representation of the Byzantine Empire stretching from the reference to Byzantium in the Qur'an until the fall of Constantinople in 1453 is considered in terms of a few salient themes. The image of Byzantium reveals itself to be complex, non-monolithic, and self-referential. Formulating an alternative appreciation to the politics of confrontation and hostility that so often underlies scholarly discourse on Muslim-Byzantine relations, this book presents the schemes developed by medieval authors to reinterpret aspects of their own history, their own self-definition, and their own view of the world.***

***For the technological progress in communication technology it is necessary that the advanced studies in circuit and software design are accompanied with recent results of the technological research and physics in order to exceed its limitations. This book is a guide which treats many components used in mobile communications, and in particular focuses on non-volatile memories. It emerges following the conducting line of the non-volatile memory in the wireless system: On the one hand it develops the foundations of the interdisciplinary issues needed for design analysis and testing of the system. On the other hand it deals***

***with many of the problems appearing when the systems are realized in industrial production. These cover the difficulties from the mobile system to the different types of non-volatile memories. The book explores memory cards, multichip technologies, and algorithms of the software management as well as error handling. It also presents techniques of assurance for the single components and a guide through the Datasheet lectures.***

***This book explores the bioclimatic approach to building design. Constant innovations in the field are evident, including the need to face climate changes and increase the local resilience at different scales (regional, urban, architectural). Differently from other contributions, this book provides a definition of the bioclimatic design approach following a technological and performance-driven vision. It includes one of the largest collection of research voices on the topic, becoming also a critical reference work for bioclimatic theory. It is intended for architects, engineers, researchers, and technicians who have professional and research interests in bioclimatic and in sustainable and technological design issues.***

***A total institution is defined by Goffman as a place of residence and work where a large number of like-situated, individuals, cut off from the wider society for an appreciable period of time, together lead an enclosed, formally administered round of life. Prisons serve as a clear example, providing we appreciate that what is prison-like about prisons is found in institutions whose members have broken no laws. This volume deals with total institutions in general and, mental***

***hospitals, in particular. The main focus is, on the world of the inmate, not the world of the staff. A chief concern is to develop a sociological version of the structure of the self. Each of the essays in this book were intended to focus on the same issue--the inmate's situation in an institutional context. Each chapter approaches the central issue from a different vantage point, each introduction drawing upon a different source in sociology and having little direct relation to the other chapters. This method of presenting material may be irksome, but it allows the reader to pursue the main theme of each paper analytically and comparatively past the point that would be allowable in chapters of an integrated book. If sociological concepts are to be treated with affection, each must be traced back to where it best applies, followed from there wherever it seems to lead, and pressed to disclose the rest of its family.***

1914. Thomas Maggs is thirteen and lives with his parents and sister at the Blue Anchor pub, in the village of Dunwich on the Suffolk coast. Born in winter while the sea stormed, Thomas is the youngest child, and the only son surviving. In Dunwich, life is quiet and shaped by the seasons: fishing and farming, the summer visitors, and the girls who come down from the Highlands to gut

and pack the herring. Thomas visits his brothers' grave in the churchyard, sketches the boats from the harbor, and longs for adventure -- a chance to go to sea. Then one day a mysterious Scotsman and his red-haired wife arrive in the village. The man's name is Charles Rennie Mackintosh, but the locals are soon calling him Mac. Mac and his wife are both artists, regarded as eccentrics in town, but a source of wonder and fascination for Thomas. Yet just as Thomas and Mac's friendship begins to bloom, war with Germany is declared. The summer guests flee, replaced by regiments of soldiers on their way to Belgium. And as the war weighs increasingly heavily on the community, the villagers on the home front become increasingly suspicious of Mac and his curious behavior. *Mr. Mac and Me* is the story of an unlikely friendship, and a vivid portrait of one of the most brilliant and misunderstood artists of his generation.

***Historians have conventionally viewed intellectual and artistic achievement as a seamless progression in a single direction, with the Renaissance, as identified by Jacob Burckhardt, as the root and foundation of modern culture. But in this brilliant new analysis***

*William Bouwsma rethinks the accepted view, arguing that while the Renaissance had a beginning and, unquestionably, a climax, it also had an ending. Examining the careers of some of the greatest figures of the age--Montaigne, Galileo, Jonson, Descartes, Hooker, Shakespeare, and Cervantes among many others--Bouwsma perceives in their work a growing sense of doubt and anxiety about the modern world. He considers first those features of modern European culture generally associated with the traditional Renaissance, features which reached their climax in the late sixteenth and early seventeenth centuries. But even as the movements of the Renaissance gathered strength, simultaneous impulses operated in a contrary direction. Bouwsma identifies a growing concern with personal identity, shifts in the interests of major thinkers, a decline in confidence about the future, and a heightening of anxiety. Exploring the fluctuating and sometimes contradictory atmosphere in which Renaissance artists and thinkers operated, Bouwsma shows how the very liberation from old boundaries and modes of expression that characterized the Renaissance became itself increasingly stifling and destructive. By drawing attention to the waning of the Renaissance culture of freedom and creativity, Bouwsma offers a wholly new and intriguing interpretation of the place of the European Renaissance in modern culture. This Seventh Edition of the best-selling intermediate Italian text, DA CAPO, reviews and expands upon all aspects of Italian grammar while providing authentic learning experiences (including new song and video activities) that provide students with engaging ways to connect with Italians and Italian culture. Following the guidelines established by the National Standards for Foreign Language Learning, DA CAPO develops Italian language proficiency through varied features that accommodate a variety of teaching styles and goals. The Seventh Edition emphasizes a well-rounded approach to intermediate Italian, focusing on balanced acquisition of the four language skills within an updated cultural framework. Ants are probably the most dominant insect group on Earth, representing ten to fifteen percent of animal biomass in terrestrial ecosystems. Flowering plants, meanwhile, owe

their evolutionary success to an array of interspecific interactions—such as pollination, seed dispersal, and herbivory—that have helped to shape their great diversity. The Ecology and Evolution of Ant-Plant Interactions brings together findings from the scientific literature on the coevolution of ants and plants to provide a better understanding of the unparalleled success of these two remarkable groups, of interspecific interactions in general, and ultimately of terrestrial biological communities. The Ecology and Evolution of Ant-Plant Interactions synthesizes the dynamics of ant-plant interactions, including the sources of variation in their outcomes. Victor Rico-Gray and Paulo S. Oliveira capture both the emerging appreciation of the importance of these interactions within ecosystems and the developing approaches that place studies of these interactions into a broader ecological and evolutionary context. The collaboration of two internationally renowned scientists, The Ecology and Evolution of Ant-Plant Interactions will become a standard reference for

understanding the complex interactions between these two taxa.

Random matrices are widely and successfully used in physics for almost 60-70 years, beginning with the works of Dyson and Wigner. Although it is an old subject, it is constantly developing into new areas of physics and mathematics. It constitutes now a part of the general culture of a theoretical physicist. Mathematical methods inspired by random matrix theory become more powerful, sophisticated and enjoy rapidly growing applications in physics. Recent examples include the calculation of universal correlations in the mesoscopic system, new applications in disordered and quantum chaotic systems, in combinatorial and growth models, as well as the recent breakthrough, due to the matrix models, in two dimensional gravity and string theory and the non-abelian gauge theories. The book consists of the lectures of the leading specialists and covers rather systematically many of these topics. It can be useful to the specialists in various subjects using random matrices, from

PhD students to confirmed scientists.

Patient engagement should be envisaged as a key priority today to innovate healthcare services delivery and to make it more effective and sustainable.

The experience of engagement is a key qualifier of the exchange between the demand (i.e. citizens/patients) and the supply process of healthcare services. To understand and detect the strategic levers that sustain a good quality of patients' engagement may thus allow not only to improve clinical outcomes, but also to increase patients' satisfaction and to reduce the organizational costs of the delivery of services. By assuming a relational marketing perspective, the book offers practical insights about the developmental process of patients' engagement, by suggesting concrete tools for assessing the levels of patients' engagement and strategies to

sustain it. Crucial resources to implement these strategies are also the new technologies that should be (1) implemented according to precise guidelines and (2) designed according to a user-centered design process. Furthermore, the book describes possible fields of patients' engagement application by describing the best practices and experiences matured in different fields

Hidden in Plain Sight: Covert Criticism of the Medici in Renaissance Florence offers the first systematic study of an important and heretofore insufficiently-studied phenomenon in Renaissance Europe. Through a close examination of a wide variety of visual and textual materials, James O. Ward illuminates the means by which Florentine citizens--among them several of the most famous artists and writers of the time, such as Michelangelo, Machiavelli, and Vasari--managed, in an increasingly authoritarian political and cultural climate, to express their disaffection with the prevailing political and cultural status quo in relatively safe ways, while at the same time maintaining contact with those rulers whom they criticized, upon whom they often depended for their livelihoods. Ward's volume thus offers new and provocative interpretations of some of the most famous works of Italian Renaissance visual and textual culture--for example, Michelangelo's New Sacristy in Florence, Machiavelli's Prince, and Vasari's portrait of Lorenzo de' Medici--which have traditionally been viewed by scholars of the period as encomiastic celebrations of their patrons' power and prestige. The volume thus provides--besides its intimate view of power relations between some of Florence's most creative artists and writers and those they served--fresh perspectives on the important question of patron-artist relations during the period. Written in a style which is not too technical, the book is an ideal resource for specialists in Italian history, art history, literature, rhetoric, theatre studies, and the history of Italian academies, as well as a stimulating narrative for the educated general reader interested in the history of Florence, and its often fraught relations with its leading family, the Medici.
