

Review Of Postgraduate Medical Entrance Examinations Volume 1 8th Edition

Salient Features First of its kind when the book is not written by the senior authors but by the student who is in the race of PGMEET competition. Being the student ourselves, we have observed that giving sleepless nights to textbooks, class notes and question-based books, studying the whole year but failing to compile and revise everything in the final lap was the most common regret that students have. We came up with an idea during our own preparations to compile the maximum possible important facts and data, along with necessary diagrams, mnemonics and Photographs together at one place in the most concise and simplified way and this idea came into reality by completing this herculean task which ended with a fruit in your hand- " My PGMEET Notes" In these Notes we are using inclusive target oriented approach based on the new exam patterns that we have experienced in the last few years. The Notes itself defies "Jack of all trades and master of SOME". It is like "SEA IN A POT". • It contains: • All the important topics of 19 Subjects of MBBS • Perfect illustrations, diagrams and clinical photographs wherever necessary • Important Tables from Authentic Textbooks and journals • Most Recent updates from latest Textbooks, Journals and Important Website • Mnemonics for various topics for a quick recall of the topics

Read Book Review Of Postgraduate Medical Entrance Examinations Volume 1 8th Edition

when needed • Content Reviewed by Various PG Aspirants from PAN India Medical Colleges & Subject Experts. • Each page in the Notes is provided with a “Space for Extra Points”. In that space students can add their extra points which they feel are important for that particular topic. This way at the end, the Notes will have everything at one place perfectly tailored for you. How to make the best out of this Notes? To make the best out of this Notes, make a schedule to complete this notes by studying it for a specific number of hours/day (like 1–2 hours/day) or a specific number of pages per day (like 20–30 pages/day), complete it, add the Special Points, Revise and Re-revise. For example: Make a cycle of 40 days, try to complete this notes in 40 days (studying 20 pages/day). The way Notes has been represented it will take hardly 2 hours for you to complete your 20-page quota of the day. As soon as your one cycle is over start with another cycle which may be shorter this time (say 32 days with 25 pages/day). With this plan, till your exams knock your door you would have already revised the Notes “n” number of times and then re-revise these Notes in the last week before the exam. This is sort of “must follow step” for you. To make this Notes more fruitful, optimize it according to your needs by adding the extra points/newer updates in the space provided below each page in respective topics and make it a complete package for your last month preparation.

Key Features: This is the only book in India, exclusively published for NIMHANS
