

Reviewer For Let Values Education

The purpose of this book is to contribute to contemporary debates about alternative ways of teaching Moral Education in Malaysia by including the voice of students. Moral Education in the Malaysian setting is both complex and compulsory. This book explores alternatives to the current somewhat dated approach. It seeks to discover what young adolescents describe as moral dilemmas, how they approach them and what they find useful in resolving these moral problems.

Values education : let reviewer

This volume provides an analysis of approaches to moral education in the 1960s and 1970s and then moves to a description and analysis of more contemporary efforts that characterize the current 'movement' for character education. It becomes clear, however, that 'the current movement' is a misnomer, for there are marked differences today among those who are concerned with the moral and character development of children. And there are others who are critical of the idea that schools should be involved in character education at all.
