Eating disorders are common, frequently severe, and often devastating pathologies. Biological, psychological, and social factors are usually involved in these disorders in both the aetiopathogeny and the course of disease. The interaction among these factors might better explain the problem of the development of each particular eating disorder, its specific expression, and the course and outcome. This book includes different studies about

the core concepts of eating disorders, from general topics to some different modalities of treatment. Epidemiology, the key variables in the development of eating disorders, the role of some psychosocial factors, as well as the role of some biological influences, some clinical and therapeutic issues from both psychosocial and biological points of view, and the nutritional evaluation and nutritional treatment, are clearly presented by the authors of the corresponding chapters. Professionals such as psychologists, nurses, doctors,

and nutritionists, among others, may be interested in this book. Although published as part of a series on Brazilian studies, central to this collection are not the concepts of nation or nationhood but those of transnational networks and cross-cultural exchanges. The concept of nation is of limited value to account for the periodical print culture as a global phenomenon marked by transnational movements such as those involving capital flows, commodities, people, ideas and editorial models. In this vein, what these chapters explore is not so much the concept of

influence - which often plays a central role in Eurocentric analyses - but those of circulation and interaction. The notion of "circulation" here emphasised is more appropriate to the study of cultural exchanges, focusing on the movements of and engagements with ideas and concepts, as well as the appropriated models and the people involved in the publication and consumption of magazines. What the reader will find in these essays are analysis of numerous processes of transnational cultural negotiations.

Adapting Chekhov

Acute Care Oncology Nursing E-Book

This book considers the hundred years of re-writes of Anton Chekhov's work, presenting a wide geographical landscape of Chekhovian influences in drama. The volume examines the elusive quality of Chekhov's dramatic universe as an intricate mechanism, an engine in which his enigmatic characters exist as the dramatic and psychological ciphers we have been de-coding for a century, and continue to do so. Examining the practice and the theory of dramatic

adaptation both as intermedial transformation (from page to stage) and as intramedial mutation, from page to page, the book presents adaptation as the emerging genre of drama, theatre, and film. This trend marks the performative and social practices of the new millennium, highlighting our epoch's need to engage with the history of dramatic forms and their evolution. The collection demonstrates that adaptation as the practice of transformation and as a re-thinking of habitual dramatic norms and genre definitions leads to the rejuvenation of existing dramatic and performative

As the major mode of the storytelling imagination, adaptation can build upon and drive the audience's horizons of expectations in theatre aesthetics. Hence, this volume investigates the original and transformative knowledge that the story of Chekhov's drama in mutations offers to scholars of drama and performance, to students of modern literatures and cultures, and to theatre practitioners worldwide. development in a bottom-up manner. It explores the practices of Public Service Media across Europe, assessing the rules that govern Public Service Media at both the EU and the National Member State level, identifying common trends, initiated by both the European Commission and individual countries, illustrating the context-dependent development of Public Service Media and challenging the theories of Public Service Broadcasting which have developed an ideal-type public broadcaster based on the well-funded BBC in an atypical media market.
