and the public sphere. The aim of the volume is to trace to what extent cosmopolitanism corresponds to second modernity, with the latter concept referring to the potential for consensus, the creation of multiple political alternatives and the recognition of otherness. The book

accordingly explores questions about democratic legitimacy and the formation of social and political institutions and presents empirical research on phenomena such as global violence. The volume is intended to constitute a cosmopolitan project in itself, comprising

contributions from scholars with very diverse approaches. Together, these contributions provide a stimulating analysis of what cosmopolitanism can offer to socially and politically diverse twenty-first-century societies.

The Representation of External Threats

From the Middle Ages to the Modern World The Poetical Works of George Crabbe

There's something strange going on in Briar Creek. Everyone's been quiet lately...too quiet. Lexi's fate was
