The rhetoric of social justice is commonplace but increasingly it means little more than a tag line or a punctuation point. Reconstructing

Social Justice presents a new framework for social justice that will change the way people think about social justice and change the way people implement social justice. This book carves out an intellectual and practical space for social justice that is distinct from political, legal, and economic spheres.

While emphasizing a

distinct domain for social justice, the author then makes sense of its healing role in terms of the polity, economy, technology, and religion. Drawing from a rich supply of classroom experiences, her research on mosque controversies after September 11, 2001, and then the global examples of truth and

Frederking invites the reader to think about the relevance of social justice from the micro to the macro level. Rather than a set of policy outcomes or ideological positions, social justice is a process of social accountability that demands honest and transparent

any memory of  
your first ten years  
of life?

Jake Howard knows how that feels. He's a successful psychiatrist and writer. He has an apparently adoring lover and the respect of his peers. But he also has a huge gap where his childhood memories

should be. What's more, Jake is tormented by the worst kind of nightmares. Nightmares he's not even sure are his.

Tormented by dreams and visions that threaten his sanity, he must find their source in order to understand and banish them.

His hunt will take him to a run-down seaside town, to the place where he was raised and also forty years back in time, to what he must confront to release himself from the grip of the visions and also to discover the hidden memories.

However, he will discover things about

himself he did not dare imagine. Things he really didn't want to know.

And he will also discover that not everyone is what they appear to be. Those revelations will expose a darkness and horror that no one should have to confront.
