But hope was in sight... they will be graduating soon. The vision of a new life away from the bullies and the constant humiliation, gave them something to look forward to. If only that day came sooner. One night, Lexi and Nathan saw an object fall from the sky and went to investigate. As they touched the rock, a strange power entered their bodies. Suddenly, they're not helpless anymore. They can get revenge for all the suffering and pain they had to endure. How will they use these powers? Recipient of the Independent Publishers Award for Historical Fiction (Gold Medal), the Foreword Book of the Year Award for Historical Fiction (Bronze Medal), and an honorable mention in the category of General Fiction for the Eric Hoffer Award. Luis de Sant á ngel, chancellor to the court and longtime friend of the lusty King Ferdinand, has

had enough of the Spanish Inquisition. As the power of Inquisitor General Tomás de Torquemada grows, so does the brutality of the Spanish church and the suspicion and paranoia it inspires. When a dear friend's demise brings the violence close to home, Santángel is enraged and takes retribution into his own hands. But he is from a family of conversos, and his Jewish heritage makes him an easy target. As Santángel witnesses the horrific persecution of his loved ones, he begins slowly to reconnect with the Jewish faith his family left behind. Feeding his curiosity about his past is his growing love for Judith Migdal, a clever and beautiful Jewish woman navigating the mounting tensions in Granada. While he struggles to decide what his reputation is worth and what he can sacrifice, one man offers him a chance he thought he'd lost...the chance to hope for a better world. Christopher Columbus has plans to discover a route to paradise, and only Luis de Santángel can help him. Within the dramatic story lies a subtle, insightful examination of the crisis of faith at the heart of the Spanish Inquisition. Irresolvable conflict rages within the conversos in *By Fire, By Water*, torn between the religion they left behind and the conversion meant to ensure their safety. In this story of love, God, faith, and torture, fifteenth-century Spain comes to dazzling, engrossing life. New York Times bestselling author and cultural critic Chuck Klosterman sorts through the past decade and how we got to now. Seventy-five percent of processed foods on supermarket shelves—from soda to soup, crackers to condiments—contain genetically engineered ingredients. The long-term effects of these foods on human health and ecology are still unknown, and public concern has been steadily intensifying. This new book from the Council for Responsible Genetics gathers the best, most thought-provoking essays by the leading scientists, science writers, and public health advocates. Collectively, they address such questions as: Are GM foods safe and healthy for us? Will GM food really solve world hunger? Who really controls the power structure of food production? Are GM foods ecologically safe and sustainable? Why is it so difficult to get GM foods labeled in the US? What kinds of regulations and policies should be instituted? How is seed biodiversity, or lack thereof, affecting developing countries? Should animals be genetically modified for food? How are other countries handling GM crops? Ultimately, this definitive book encourages us to think about the social, environmental, and moral ramifications of where this particular branch of biotechnology is taking us, and what we should do about it.

This must-read for lovers of Stephen King's The Shining will leave readers breathless as Seda and her family find themselves at the mercy of a murderer in an isolated and snowbound hotel. Get ready for what Kirkus calls "A bloody, wonderfully creepy scare ride." When her mom inherits an old, crumbling mansion, Seda's almost excited to spend the summer there. The grounds are beautiful and it's fun to explore the sprawling house with its creepy rooms and secret passages. Except now her mom wants to renovate, rather than sell the estate—which means they're not going back to the city...or Seda's friends and school. As the days grow shorter, Seda is filled with dread. They're about to be cut off from the outside world, and she's not sure she can handle the solitude or the darkness it brings out in her.

Then a group of teens get stranded near the mansion during a blizzard. Seda has no choice but to offer them shelter, even though she knows danger lurks in the dilapidated mansion—and in herself. And as the snow continues to fall, what Seda fears most is about to become her reality...

In *Mordin On Time*, Nick Mordin sets out his method for answering the most fundamental question facing punters in any race, namely: which is the fastest horse? He was timing the sections of races with a stop watch, estimating wind strength and direction, adjusting for movements of running rails, using projected times and calculating average times years before the best-selling American books on speed rating were published. This new edition incorporates much new material, including standard times for all Irish racecourses (plus the major French ones). *Mordin On Time* enables the reader to construct their own speed ratings wherever they live.

Mendoza the Jew combines a graphic history with primary documentation and contextual information to explore issues of nationalism, identity, culture, and

historical methodology through the life story of Daniel Mendoza. Mendoza was a poor Sephardic Jew from East London who became the boxing champion of Britain in 1789. As a Jew with limited means and a foreign-sounding name, Mendoza was an unlikely symbol of what many Britons considered to be their very own "national" sport.

This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been customarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the interest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and 0 (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way.

However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.

The Power of Ideas

In this anthology of weird fiction, twenty-two authors share their harrowing visions of worlds shaped by the Yellow Sign, in stories and poems inspired by Robert W. Chambers's foundational works of weird horror. From the personal to the historic, from the macabre to the fantastic, the stories and poems gathered here illuminate new, unexpected realities shaped by the King in Yellow, under the sway of the Yellow Sign, or in the grip of madnesses inspired by their power. Authors included: Marc Abbott - Linda D. Addison - Meghan Arcuri - Greg Chapman - JG Faherty - Trevor Firetog - Patrick Freivald - Carol Gyzander - Todd Keisling - John Langan - Curtis Lawson -

Adrian Ludens - Lisa Morton - Joseph S. Pulver, Sr. - Sarah Read - Kathleen Scheiner - Ann K. Schwader - Darrell Schweitzer - J. Daniel Stone - Steven Van Patten - Tim Waggoner - Kaaron Warren Robert W. Chambers's classic work of weird fiction, The King in Yellow (1895), contained two stories that have exercised wide influence in the genre. "The Repairer of Reputations" introduced the world to The King in Yellow, a play in two acts, banned for its reputed power to drive mad anyone who reads its complete text. Another story, "The Yellow Sign," used the experiences of an artist and his model to elaborate on the mythos of the Yellow King, the Yellow Sign, and their danger to all who encounter them. In those tales Chambers crafted fascinating glimpses of a cosmos populated by conspiracies, government-sanctioned suicide chambers, haunted artists, premonitions of death, unreliable narrators-and dark, enigmatic occurrences tainted by the alien world of Carcosa, where the King rules in his tattered yellow mantle. In Carcosa, black stars rise and Cassilda and Camilla speak and sing. In Carcosa, eyes peer from within pallid masks to gaze across Lake Hali at the setting of twin suns.
