In these personal reflections on his thirty years of clinical work with victims of genocide, torture, and abuse in the United States, Cambodia, Bosnia, and other parts of the world, Richard Mollica describes the surprising capacity of traumatized people to heal themselves. Here is how Neil Boothby, Director of the Program on Forced Migration and Health at the Mailman School of Public Health, Columbia University, describes the book: "Mollica provides a wealth of ethnographic and clinical evidence that suggests the human capacity to heal is innate--that the 'survival instinct' extends beyond the physical to include the psychological as well. He enables us to see how recovery from 'traumatic life events' needs to be viewed primarily as a 'mystery' to be listened to and explored, rather than solely as a 'problem' to be identified and solved. Healing involves a quest for meaning--with all of its emotional, cultural, religious, spiritual and existential attendants--even when bio-chemical reactions are also operative." Healing Invisible Wounds reveals how trauma survivors, through the telling of their stories, teach all of us how to deal with the tragic events of everyday life. Mollica's important discovery that humiliation--an instrument of violence that also leads to anger and despair--can be transformed through his therapeutic project into solace and redemption is a remarkable new contribution to survivors and clinicians. This book reveals how in every society we have to move away from viewing trauma survivors as "broken people" and "outcasts" to seeing them as courageous people actively contributing to larger social goals. When violence occurs, there is damage not only to individuals but to entire societies, and to the world. Through the journey of self-healing that survivors make, they enable the rest of us not only as individuals but as entire communities to recover from injury in a violent world.

In this moving new novel from celebrated author Nickolas Butler, a Wisconsin family grapples with the power and limitations of faith when one of their own falls under the influence of a radical church Lyle Hovde is at the onset of his golden years, living a mostly content life in rural Wisconsin with his wife, Peg, daughter, Shiloh, and six-year old grandson, Isaac. After a troubled adolescence and subsequent estrangement from her parents, Shiloh has finally come home. But while Lyle is thrilled to have his whole family reunited, he's also uneasy: in Shiloh's absence, she has become deeply involved with an extremist church, and the devout pastor courting her is convinced Isaac has the spiritual ability to heal the sick. While reckoning with his own faith—or lack thereof—Lyle soon finds himself torn between his unease about the church and his desire to keep his daughter and grandson in his life. But when the church's radical belief system threatens Isaac's safety, Lyle is forced to make a decision from which the family may not recover. Set over the course of one year and beautifully evoking the change of seasons, Little Faith is a powerful and deeply affecting intergenerational novel about family and community, the ways in which belief is both formed and shaken, and the lengths we go to protect our own.

The Medici Women is a study of the women of the famous Medici family of Florence in the fifteenth and early sixteenth centuries. Natalie Tomas examines critically the changing contribution of the women in the Medici family to the eventual success of the Medici regime and their exercise of power within it; and contributes to our historical understanding of how women were able to wield power in late medieval and early modern Italy and Europe. Tomas takes a feminist approach that examines the experience of the Medici women within a critical framework of gender analysis, rather than biography. Using the relationship between gender and power as a vantage point, she analyzes the Medici women's uses of power and influence over time. She also analyzes the varied contemporary reactions to and representation of that power, and the manner in which the women's actions in the political sphere changed over the course of the century between republican and ducal rule (1434-1537). The narrative focuses especially on how women were able to exercise power, the constraints placed upon them, and how their gender intersected with the exercise of power and influence. Keeping the historiography to a minimum and explaining all unfamiliar Italian terms, Tomas makes her narrative clear and accessible to non-specialists; thus The Medici Women appeals to scholars of women's studies across disciplines and geographical boundaries.

Founders of Modern Political and Social Thought Series Editor: Dr Mark Philp, Oriel College, University of Oxford Founders of Modern Political and Social Thought present critical examinations of the work of major political philosophers and social theorists, assessing both their initial contribution and continuing relevance to politics and society. Each volume provides a clear, accessible, historically-informed account of each thinker's work, focusing on a re-assessment of their central ideas and arguments. Founders encourage scholars and students to link their study of classic texts to current debates in political philosophy and social theory. This launch volume in the Founders of Modern Political and Social Thought series presents a critical examination of Machiavelli's thought, combining an accessible, historically-informed account of his work with a re-assessment of his central ideas and arguments. Maurizio Viroli challenges the accepted interpretations of Machiavelli's work, insisting that his republicanism was based not on a commitment to virtue, greatness, and expansion, but to the ideal of civic life protected by the shield of fair laws. His detailed study of how Machiavelli composed his famous work The Prince presents new interpretations, and he further argues that the most challengingand completely underestimatedaspect of Machiavelli's thought is his philosophy of life, in particular his conceptions of love, women, irony, God, and the human condition. Viroli demonstrates that Machiavelli composed The Prince, and all his works, according to the rules of classical rhetoric and never intended to found the 'modern science of politics', aiming rather to continue and refine the practice of political theorising as a rhetorical endeavour taught by the Roman masters of civic philosophy. Viroli's Machiavelli, a serious challenge to contemporary methods of doing political theory, will be essential for advanced students of the history of political thought.

Glasgow, 1972. All the coolest kids in town are lining up for Led Zeppelin tickets. Overhead, a Zeppelin approaches. Its passengers—Jimi Hendrix, Janis Joplin, and Hank Williams—think it's worth leaving heaven to see the greatest rock band in the world. Even the fairies are fans. Meanwhile, nerdy Martin and his equally nerdy best friend Greg have overactive imaginations. When they aren't fighting the monstrous hordes of Xotha, they are competing for the attentions of a popular (read: unattainable) girl named Suzy. She's not likely to ditch Zed, the hippest boy in the school, for the likes of them, is she? Then again, with Led Zeppelin on the way, it feels like anything can happen. Suzy, Led Zeppelin, and Me takes readers on a ride through Martin's angsty and fumbling youth, when Led Zeppelin comes to Glasgow and rocks Martin's world, and through his angstridden and fumbling adult years, when he learns what can't be denied: love may break your heart, but Led Zeppelin will never let you down.

The volume collects papers presented at the International Conference "Greek Medical Papyri - Text, Context, Hypertext" held at the University of Parma on November 2-4, 2016, as the final event of the ERC project DIGMEDTEXT, aimed primarily at creating an online textual database of the Greek papyri dealing with medicine. The contributions, authored by outstanding papyrologists and historians of the ancient medicine, deal with a variety of topics focused on the papyrological evidence of ancient medical texts and contexts. The first part, devoted to "medical texts", contains some new reflections on important sources such as the Anonymus Londinensis and the Hippocratic corpus, as well as on specific themes like the pharmacological vocabulary, the official medical reports, the medical care in the Roman army. The second part collects papers about the "doctors' context", providing highlights from broader viewpoints like the analysis of the writing supports, the study of the ostraka from the Eastern Desert, the evidence of inscriptions and philosophical texts. The third part is entirely focused on the DIGMEDTEXT project itself: the team members present some relevant key issues raised by the digitisation of the medical papyri.

This report is based on an exhaustive review of the published literature on the definitions, measurements, epidemiology, economics and interventions applied to nine chronic conditions and risk factors.

The book shows how the "agreement for a cure" disappeared by the end of the early modern period precisely because of the determined opposition of physicians and jurists, who realized that payment by results was incompatible with the professionalization of medicine.

Marcianus Graecus Z. 454 [= 822], known to Homeric scholars as the Venetus A, is the oldest complete text of the Iliad in existence, meticulously crafted during the tenth century ce. An impressive thousand years old and then some, its historical reach is far greater. The Venetus A preserves in its entirety a text that was composed within an oral tradition that can be shown to go back as far as the second millennium bce, and the writings in its margins preserve the scholarship of Ptolemaic scholars working in the second century bce and in the centuries following. Two thousand years later, technology offers a new opportunity to rediscover this scholarship and better understand the epic that is the foundation of Western literature. The high-resolution images of the manuscript that accompany these essays were acquired by a multinational team of scholars and conservators in May 2007.

Based on previously unexplored archival documentation, this book offers the first general overview of the history of Italian eugenics, not limited to the decades of Fascist regime, but instead ranging from the beginning of the 1900s to the first half of the 1970s. The Author discusses several fundamental themes of the comparative history of eugenics: the importance of the Latin eugenic model; the relationship between eugenics and fascism; the influence of Catholicism on the eugenic discourse and the complex links between genetics and eugenics. It examines the Liberal pre-fascist period and the post-WW2 transition from fascist and racial eugenics to medical and human genetics. As far as fascist eugenics is concerned, the book provides a refreshing analysis, considering Italian eugenics as the most important case-study in order to define Latin eugenics as an alternative model to its Anglo-American, German and Scandinavian counterparts. Analyses in detail the nature-nurture debate during the State racist campaign in fascist Italy (1938–1943) as a boundary tool in the contraposition between the different institutional, political and ideological currents of fascist racism.

For the first time, the final years of one of the world's most captivating rock showman are laid bare. Including interviews from Freddie Mercury's closest friends in the last years of his life, along with personal photographs, Somebody to Love is an authoritative biography of the great man. Here are previously unknown and startling facts about the singer and his life, moving detail on his lifelong search for love and personal fulfilment, and of course his tragic contraction of a then killer disease in the mid-1980s. Woven throughout Freddie's life is the shocking story of how the HIV virus came to hold the world in its grip, was cruelly labelled 'The Gay Plague' and the unwitting few who indirectly infected thousands of men, women and children - Freddie Mercury himself being one of the most famous. The death of this vibrant and spectacularly talented rock star, shook the world of medicine as well as the world of music. Somebody to Love finally puts the record straight and pays detailed tribute to the man himself.

The chapters in this volume share an aim to historicize the role of the translator as a cultural and political agent in the early modern West.

This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

This book explores the interconnections and differentiations between artisanal workshops and alchemical laboratories and between the arts and alchemy from Antiquity to the eighteenth century. In particular, it scrutinizes epistemic exchanges between producers of the arts and alchemists. In the fifteenth and sixteenth centuries the term laboratorium uniquely referred to workplaces in which 'chemical' operations were performed: smelting, combustion, distillation, dissolution and precipitation. Artisanal workshops equipped with furnaces and fire in which 'chemical' operations were performed were also known as laboratories.

Transmutational alchemy (the transmutation of all base metals into more noble ones, especially gold) was only one aspect of alchemy in the early modern period. The practice of alchemy was also about the chemical production of things--medicines, porcelain, dyes and other products as well as precious metals and about the knowledge of how to produce them. This book uses examples such as the Uffizi to discuss how Renaissance courts established spaces where artisanal workshops and laboratories were brought together, thus facilitating the circulation of materials, people and knowledge between the worlds of craft (today's decorative arts) and alchemy. Artisans became involved in alchemical pursuits beyond a shared material culture and some crafts relied on chemical expertise offered by scholars trained as alchemists. Above all, texts and books, products and symbols of scholarly culture played an increasingly important role in artisanal workshops. In these workplaces a sort of hybrid figure was at work. With one foot in artisanal and the other in scholarly culture this hybrid practitioner is impossible to categorize in the mutually exclusive categories of scholar and craftsman. By the seventeenth century the expertise of some glassmakers, silver and goldsmiths and producers of porcelain was just as based in the worlds of alchemical and bookish learning as it was grounded in hands-on work in the laboratory. This book suggests that this shift in workshop culture facilitated the epistemic exchanges between alchemists and producers of the decorative arts.

A chi non è capitato di ascoltare di continuo quella canzone che sembra descrivere esattamente il nostro mal d'amore? E chi non è mai esploso in un grido liberatorio cantando a squarciagola il brano che in quel momento sente esprimere meglio di ogni altro il suo stato d'animo? Massimo Cotto racconta 344 canzoni attraverso storie, meraviglie, segreti e ricordi personali, catalogandole secondo il bisogno a cui possono rispondere o il disturbo che aiutano a curare. Non solo un compendio delle tracce fondamentali del nostro rock quotidiano, ma un atlante emozionale, un mosaico di suoni, parole e sensazioni che scaturiscono dagli ascolti. Affabulatore irresistibile, forte di un patrimonio di aneddoti e citazioni apparentemente immenso, Cotto trasmette il piacere di narrare e ci regala un libro che è un compagno di viaggio, una guida, un'agenda o un blocco per appunti, un talismano, un ricettario, uno di quei volumi da consultare in ogni occasione, consapevoli del fatto che la musica «se siamo fortunati ci salva la vita, nella peggiore delle ipotesi ci migliora la giornata».

One of the less fortunate legacies that we who practice ethnography in Oceania have given the scholarly world is the stereotype of the Melanesian leader as "Big Man". The designation "Big Man", derived literally from the metaphor commonly used in Austronesian languages or from the Neo-Melanesian Pidgin lexicon, has come to denote a "pure type" or "species" of leadership, authority and government. (Rightly or wrongly, ethnographic sources usually ignore women's role in government, although they may have significant impact). In countless introductory anthropology courses students are asked to accept and perpetuate the cliches that Melanesian leaders typify achieved rather than ascribed status, that Melanesian leaders are archetypal symbols of primitive capitalistic competition, and that Melanesian leadership represents an inferior form.

* What explanations have been advanced for pain and and what are their shortcomings? * How do theoretical models account for apparent anomalies in the experience of pain? * What are the implications for clinical practice and how has practice guided theory? Psychology has made an enormous contribution to the understanding of pain and its phenomena, mechanisms, and treatments. This book explores and integrates current research in key areas of pain and pain management from a psychological perspective, and places recent developments in an historical context. The experience of pain cannot be captured in physiological terms, and treatments based on physical models are often inadequate. This book explores the multidimensional nature of pain mechanisms, including the roles of past experience, culture and personality, and considers the implications for research and treatment. The approach is primarily theoretical, but with a significant emphasis on clinical practice and application. This balance is often lacking in comparable texts, and is enhanced by the professional and research background of the authors. This clear and approachable text includes self-contained chapters that can be regarded as units of study and a unified glossary of terms completes the package. It is designed to provide a key resource for advanced undergraduate and postgraduate courses in health psychology, clinical psychology and social psychology as well as students and practitioners in health and social welfare.

A Worlde of Wordes, the first-ever comprehensive Italian-English dictionary, was published in 1598 by John Florio. One of the most prominent linguists and educators in Elizabethan England, Florio was greatly responsible for the spreading of Italian letters and culture throughout educated English society. Especially important was Florio's dictionary, which thanks to its exuberant wealth of English definitions made it initially possible for English readers to access Italy's rich Renaissance literary and scientific culture. Award-winning author Hermann W. Haller has prepared the first critical edition of A Worlde of Wordes, which features 46,000 Italian entries among them dialect forms, erotic terminology, colloquial phrases, and proverbs of the Italian language. Haller reveals Florio as a brilliant English translator and creative writer, as well as a grammarian and language teacher. His helpful critical commentary highlights Florio's love of words and his life-long dedication to promoting Italian language and culture abroad.

Combining a close study of Monteverdi's secular works with recent research on late Renaissance history, Gary Tomlinson places the composer's creative career in its broad cultural context and illuminates the state of Italian music, poetry, and ideology in the sixteenth and seventeenth centuries.

"Based upon two decades of research in European libraries and archives, this book constitutes the first complete biography of the humanist [Coluccio Salutati] about whom more is known than about any other historical personality down to the sixteenth century. Set against the background of twelfth-to early fifteenth century European intellectual history, Witt's analysis provides fresh and exciting insights into the relationship of Christian doctrine and piety, scholastic logic and philosophy, and medieval French and Italian literary currents to early Italian humanism."--Book Jacket.
