This nine-chapter book narrates a writing-centered approach to the teaching of literature and literary research. As the title suggests, the book also embraces a thematic approach to reading and writing about twentieth-century American literature, focusing on the grounds for hope in an age of despair. The first five chapters explore in detail the teaching of the twentieth-century American literature course at the University of Pristina in Kosovo, where the author served as Fulbright Professor of American Literature in the spring semester of 2012. Throughout, these chapters narrate students' in-class interactions to illustrate writing-to-learn strategies for teaching the literature. Chapter six then follows the same cohort of 22 students as they learned to ground their literary research in their own questions about American and Balkans narratives of oppression and liberty, of despair and hope. The last three chapters document the responses of students and their professors to this American theme of liberty and hope as seen through the Balkans lenses of ethnic violence and emerging republican government. Specifically, chapter seven focuses on students' participation in a blog featuring Balkans literature that explores the same issues of liberty and justice examined in the American literature they have read. Chapter eight then celebrates student writing, the fruit of the writing-to-learn strategies narrated in earlier chapters. Finally, chapter nine narrates professors' and students' responses, gathered through surveys and interviewing, to questions about their country's violent past and the value of literary study in preparing citizens to shape a new republic.

Write Here is designed to teach students essential reading and writing skills, using media examples to help explain academic concepts and provide opportunities for practice. It is adaptable: because it covers the basics of reading, writing, and the modes of writing, it is appropriate to use in developmental composition classrooms. However, it also covers such topics as logical fallacies, rhetoric, timed writing, academic writing, source integration, and MLA/APA documentation, making it appropriate for a first-year or "stretch" composition course. Many beginning writing students are underprepared and feel that writing just "isn't for them." The authors hope to dispel that myth by using media examples and a conversational tone to introduce and teach the material. Write Here provides examples that are interesting to students, while allowing them to connect to the subject matter on a more personal level—additionally, the process of analyzing the media helps students sharpen their reading, writing, and critical thinking skills.

The rationale behind Writing the Research Paper--Pocket Guide, is essentially a simple one: the typical student reaches college having written perhaps a dozen research papers and is familiar enough with the broad convention of the form to neither need nor want a big book on the research paper. Instead, what the student needs is a handy summary of research paper protocol that can be easily consulted. All its explanations should be brief, helpful, and to the point. Its examples should be pointed and illustrative, covering major matters rather than minor ones. That, in a nutshell, is the idea behind this book.
