Segregation by Design draws on more than 100 years of quantitative and qualitative data from thousands of American cities to explore how local governments generate race and class segregation. Starting in the early twentieth century, cities have used their power of land use control to determine the location and availability of housing, amenities (such as parks), and negative land uses (such as garbage dumps). The result has been segregation - first within cities and more recently between them. Documenting changing patterns of segregation and their political mechanisms, Trounstine argues that city governments have pursued these policies to enhance the wealth and resources of white property owners at the expense of people of color and the poor. Conrtrary to leading theories of urban politics, local democracy has not functioned to represent all residents. The result is unequal access to fundamental local services - from schools, to safe neighborhoods, to clean water.

Peer-to-peer music exchange, sampling, and digital distribution have garnered much attention in recent years, notably in debates about authorship, intellectual property, media control, and 'Web 2'. However, empirical scholarship on how these technologies are used creatively by musicians and fans is still sparse. In this interdisciplinary ethnography of 'bedroom producer' culture, Andrew Whelan examines interaction and exchange within a specific online milieu: peer-to-peer chatrooms dedicated to electronic music, focusing on a genre known as 'breakcore'. The author draws on semantic anthropology, ethnomethodology, sociolinguistics, and critical musicology to explore the activity afforded by this controversial and criminalised environment. Through in-depth analysis of often ritually vituperative text-based interaction, discussions of music, and the samples used in that music, Whelan describes the cultural politics and aesthetics of bedroom producer identity, highlighting the roles gender and ethnicity play in the constitution of subcultural authenticity. Empirically driven throughout, this book also engages with a spectrum of social theory; in doing so, it highlights the intersections between gender, interaction, technology and music. This book will prove valuable for students and scholars with interests in gender and language use, computer-mediated communication, online subcultures and virtual community, and the evolution, production and distribution of electronic music.

This book reviews the history of the Highlander Folk School (Summerfield, Tennessee) and describes school programs that were developed to support Black and White southerners involved in social change. The Highlander Folk School was a small, residential adult education institution founded in 1932. The first section of the book provides background information on Myles Horton, the founder of the school, and on circumstances that led him to establish the school. Horton's experience growing up in the South, as well as his educational experience as a sociology and theology student, served to strengthen his dedication to democratic social change through education. The next four sections of the book describe the programs developed during the school's 30-year history, including educational programs for the unemployed and impoverished residents of Cumberland Mountain during the Great Depression: for new leaders in the southern industrial union movement during its critical period; for groups of small farmers when the National Farmers Union sought to organize in the South; and for adult and student leadership in the emerging civil rights movement. Horton's pragmatic leadership allowed educational programs to evolve in order to meet community needs. For example, Highlander's civil rights programs began with a workshop on school desegregation and evolved more broadly to prepare volunteers from civil rights groups to teach "citizenship schools," where Blacks could learn basic literacy skills needed to pass voter registration tests. Beginning in 1958, and until the school's charter was revoked and its property confiscated by the State of Tennessee in 1961, the school was under mounting attacks by highly-placed government leaders and others because of its support of the growing civil rights movement. Contains 270 references, chapter notes, and an index. (LP)

A Cognitive Institutional Approach

The study of what is collectively labeled " New Media "—the cultural and artistic practices made possible by digital technology—has become one of the most vibrant areas of scholarly activity and is rapidly turning into an established academic field, with many universities now offering it as a major. The Johns Hopkins Guide to Digital Media is the first comprehensive reference work to which teachers, students, and the curious can quickly turn for reliable information on the key terms and concepts of the field. The contributors present entries on nearly 150 ideas, genres, and theoretical concepts that have allowed digital media to produce some of the most innovative intellectual, artistic, and social practices of our time. The result is an easy-to-consult reference for digital media scholars or anyone wishing to become familiar with this fast-developing field.

On Writing Well has been praised for its sound advice, its clarity and the warmth of its style. It is a book for everybody who wants to learn how to write or who needs to do some writing to get through the day, as almost everybody does in the age of e-mail and the Internet. Whether you want to write about people or places, science and technology, business, sports, the arts or about yourself in the increasingly popular memoir genre, On Writing Well offers you fundamental principles as well as the insights of a distinguished writer and teacher. With more than a million copies sold, this volume has stood the test of time and remains a valuable resource for writers and would-be writers.

Who among us hasn't treasured memories of yesteryear told to us by our 'elders'? Aleta Miller has gathered vignettes and woven them into a tapestry of life in a Sierra Gold Rush mining town exotically named Port Wine (near Whiskey Diggins and Poker Flat). She has captured the essence of California's pioneer spirit, mining nuggets of real life stories that lay buried under yesteryear's journalism: Two story deep snowdrifts compete with a mountain visitor in a Locomobile. Civil War politics blend in with birth pains of the new California statehood. Downhill ski races lift spirits of beleaguered residents of Port Wine and La Porte, also known as Rabbit Creek. Uncontrollable fires gut reconstructed towns with diabolical regularity. In addition, we meet colorful characters who have touched the hills including Black Bart, Dutch Kate, Bret Harte, the Blue Lake Monster and Sasquatch. There is something for everyone in this delightful read. Aleta Farren Miller, as a young girl, became enamored of California gold country history during occasional visits to the Davis Motor Mine. The mine tunneled into a mountainside within a mile of Port Wine, CA. It was operated by Aleta's cousins Fred and Durward Davis and produced a modest quantity of gold. Aleta was enchanted by the remoteness of the location as well as by the surroundings which have changed very little over the last 100 years. Passing encounters with "old timers" and whimsical poetry adorning grave sites in the Pioneer Cemetery stimulated a growing interest. Many of her relatives and even a pet parrot are buried there. With the help of her mother, Rilla Farren Cross, other family members, the archives of Bancroft Library at U.C. Berkeley, and The Mountain Messenger Newspaper at Downieville, CA, the interest culminated in Aleta investing almost a decade undertaking this collection of what now may be classified as journalistic memorabilia. We are indebted to her instinctive ability to sort out and preserve this remarkable collection of memories. Her own background and personal experiences make her uniquely capable of understanding and synthesizing the insight that she gained from that time in California history.

A History of Rome and Floyd County, State of Georgia, United States of America

Cultures, Economies, and Management Responding to Change

In her extensive Introduction, Lawton has highlighted the historical development of the movement and has related futurism both to the Russian national scene and to avant-garde movements worldwide.

The Stockholm Conference of 1972 drew the world's attention to the global environmental crisis, but for people in Sweden the threat was nothing new. Anyone who read the papers or watched the television news was already familiar with the issues. Five years early, in the summer of 1967, the situation was very different. So what happened in between? This book explores the 'environmental turn' that took place in Sweden in the late-1960s. This radical change, the realisation that human beings were in the process of destroying their own environment, had major and far-reaching consequences. What was it that opened people's eyes to the crisis? When did it happen? Who set the ball rolling? These are some of the questions the book addresses, shedding new light on the history of environmentalism.

The Architecture of Ruins: Designs on the Past, Present and Future identifies an alternative and significant history of architecture from the sixteenth century to the twenty-first century, in which a building is designed, occupied and imagined as a ruin. This design practice conceives a monument and a ruin as creative, interdependent and simultaneous themes within a single building dialectic, addressing temporal and environmental questions in poetic, psychological and practical terms, and stimulating questions of personal and national identity, nature and culture, weather and climate, permanence and impermanence and life and death. Conceiving a building as a dialogue between a monument and a ruin intensifies the already blurred relations between the unfinished and the ruined and envisages the past, the present and the future in a single architecture. Structured around a collection of biographies, this book conceives a monument and a ruin as metaphors for a life and means to negotiate between a self and a society. Emphasising the interconnections between designers and the particular ways in which later architects learned from earlier ones, the chapters investigate an evolving, interdisciplinary design practice to show the relevance of historical understanding to design. Like a history, a design is a reinterpretation of the past that is meaningful to the present.

Equally, a design is equivalent to a fiction, convincing users to suspend disbelief. We expect a history or a novel to be written in words, but they can also be delineated in drawing, cast in concrete or seeded in soil. The architect is a 'physical novelist' as well as a 'physical historian'. Like building sites, ruins are full of potential. In revealing not only what is lost, but also what is incomplete, a ruin suggests the future as well as the past. As a stimulus to the imagination, a ruin's incomplete and broken forms expand architecture's allegorical and metaphorical capacity, indicating that a building can remain unfinished, literally and in the imagination, focusing attention on the creativity of users as well as architects. Emphasising the symbiotic relations between nature and culture, a building designed, occupied and imagined as a ruin acknowledges the coproduction of multiple authors, whether human, non-human or atmospheric, and is an appropriate model for architecture in an era of increasing climate change.

Nineteen peer-reviewed articles are included in the proceedings of the 2011 symposium, Fishing People of the North: Cultures, Economies, and Management Responding to Change. Authors present research in the disciplines of anthropology, biology, and economics on fishing communities in Alaska, Hawaii, Canada, Russia, Japan, and Norway. Among many topics, the papers cover cultural responses to climate change effects; transitions in fishing communities regarding permits, quotas, and target species; using local knowledge to preserve a fishery and to map subsistence patterns; and tribal involvement in fisheries management. Contributors share ways to address change and ensure that fishing remains a healthy, vibrant part of northern coastal communities Jean Baudrillard's classic text was one of the first to focus on the process and meaning of consumption in contemporary culture. Originally published in 1970, the book makes a vital contribution to current debates on consumption. The book includes Baudrillard's most organized discussion of mass media culture, the meaning of leisure, and anomie in affluent society. A chapter on the body demonstrates Baudrillard's extraordinary prescience for flagging vital subjects in contemporary culture long before others. This English translation begins with a new introductory essay.

Museum Object Lessons for the Digital Age explores the nature of digital objects in museums, asking us to question our assumptions about the material, social and political foundations of digital practices. Through four wide-ranging chapters, each focused on a single object - a box, pen, effigy and cloak - this short, accessible book explores the legacies of earlier museum practices of collection, older forms of media (from dioramas to photography), and theories of how knowledge is produced in museums on a wide range of digital projects. Swooping from Ethnographic to Decorative Arts Collections, from the Google Art Project to bespoke digital experiments, Haidy Geismar explores the object lessons contained in digital form and asks what they can tell us about both the past and the future. Drawing on the author's extensive experience working with collections across the world, Geismar argues for an understanding of digital media as material, rather than immaterial, and advocates for a more nuanced, ethnographic and historicised view of museum digitisation projects than those usually adopted in the celebratory accounts of new media in museums. By locating the digital as part of a longer history of material engagements, transformations and processes of translation, this book broadens our understanding of the reality effects that digital technologies create, and of how digital media can be mobilised in different parts of the world to very different effects.

Widely acknowledged as a contemporary classic that has introduced thousands of readers to American literature, From Puritanism to Postmodernism: A History of American Literature brilliantly charts the fascinating story of American literature from the Puritan legacy to the advent of postmodernism. From realism and romanticism to modernism and postmodernism it examines and reflects on the work of a rich panoply of writers, including Poe, Melville, Fitzgerald, Pound, Wallace Stevens, Gwendolyn Brooks and Thomas Pynchon. Characterised throughout by a vibrant and engaging style it is a superb introduction to American literature, placing it thoughtfully in its rich social, ideological and historical context. A tour de force of both literary and historical writing, this Routledge Classics edition includes a new preface by co-author Richard Ruland, a new foreword by Linda Wagner-Martin and a fascinating interview with Richard Ruland, in which he reflects on the nature of American fiction and his collaboration with Malclolm Bradbury. It is published here for the first time.

The Butthole Surfers remain one of the most enigmatic bands in the history of rock music. Most of their records have no information of any kind, and often with the suggestion that you play them at 69 rpm.... They lived like nomads through much of the 1980s, and built their reputation upon tours that never ended, and shows that resembled hedonistic acid tests. They left a heap of former band members in their wake, and have often alienated as many fans as they've attracted. Here for the first time is the complete story of one of the most controversial and dangerous bands to have emerged from the ashes of the punk rock movement. 'Let's Go to Hell' compiles the scattered memories into the first comprehensive overview of the band. Featuring exclusive interviews, tons of rare and unpublished photographs, and analysis of the band's vast recorded (and unrecorded) efforts, 'Let's Go to Hell' finally tells the story that was thought (and often hoped) would never be told...

Icons of Horror and the Supernatural

On Writing Well, 30th Anniversary Edition

Offers entries on 24 of the significant archetypes of horror and the supernatural, from the classical epics of Homer to the novels of Stephen King.

An agenda for economic growth and equity In recent decades global economic productivity has slowed, while income inequality within nations has increased. The global economic pie has been growing more slowly--and more unequally--feeding the social discontent that is so evident in much of the world today. The contributors to this volume argue that the paradox of slowing productivity growth despite booming new technologies is real, not illusory. Most discussions of these trends in productivity growth and income distribution treat them as separate problems, with independent solutions. This book by economic experts with long experience in studying the global economy and development argues that lagging productivity and growing inequality are, in fact, linked by common causes and must have common solutions. Chief among those causes are the nature of today's technological changes and the failures of markets and policymakers to keep up with those changes. In essence, the potential benefits of technological change, which coincided with the era of accelerated globalization, have not been harnessed to foster more robust, and more inclusive, economic growth. The authors maintain that reviving productivity growth and reducing inequality are not competing objectives for policy. Rather, they propose an integrated agenda emphasizing the synergistic nature of achieving long-term productivity growth and equity. The authors call for an agenda of "productive equity" that highlights the need for innovative policies, at both the national and international levels, that take advantage of the technological changes now reshaping markets and the world of work.

This book constitutes the refereed conference proceedings of the 9th International Conference on Advances in Computer Entertainment, ACE 2012, held in Kathmandu, Nepal, in November 2012. The 10 full paper and 19 short papers presented together with 5 papers from the special track Arts and Culture and 35 extended abstracts were carefully reviewed and selected from a total of 140 submissions in all categories. The papers cover topics across a wide spectrum of disciplines including computer science, design, arts, sociology, anthropology, psychology, and marketing. Focusing on all areas related to

interactive entertainment they aim at stimulating discussion in the development of new and compelling entertainment computing and interactive art concepts and applications.

A companion volume to Walter Benjamin's (1892-1940) memoir *Berlin Childhood circa 1900*, *The "Berlin Chronicle" Notices* is now in a new translation by Carl Skoggard. The German-Jewish philosopher, theorist and critic Walter Benjamin began to ruminate on his comfortable Berlin childhood in 1932, not long before he would flee Germany for good to escape the Nazis. The resulting "Berlin Chronicle" notices--40 in all--do not result in a linear narrative but instead remain fragmentary recollections of Benjamin's young years, from his early childhood to the threshold of adulthood. More generally, they are a series of profound explorations of memory and of the ways memory relates to place. Rich in and of themselves, these notices greatly illuminate "Berlin Childhood circa 1900," written by Benjamin months later. This translation, in a charming pocket-sized format, comes with an extensive commentary, a historical map of Berlin and numerous illustrations.

Rune Factory: Frontier incorporates an open-ended structure that allows players to choose the type of game they wish to experience. Whether it's growing crops, expanding the town, fighting (or befriending) monsters or even falling in love, the experience is unique to each player.

Nicola Jane was a heroin baby. A Mother of three children. Beaten by her jealous fiancé called Daniel. Unknowingly. She fled into the arms of a man called Niall known as the Caveman. Who at the time was on the run for murder . During 1992 she faced up to seven years in jail. Having no option but to stand and give evidence against him in a murder trial. She innocently left her children with Daniel. After her return she found herself fleeing to certain individuals from social services for help. To discover that they had been friends with Daniel behind her back. Daniel refused to let her back into her own house keeping her and the children she loved apart. With nowhere else to go she stayed with her mother and later confided in a clairvoyant who told her that it was a 'miscarriage of justice.' When a new social worker took her case on in 1998. Only then did she see a definite and positive change in her circumstance. She was determined to make something of herself and so turned to God for comfort and recognition on her spiritual journey to find the truth.
