Question practice is essential for all papers, but for E2 it is particularly important to be able to put the theories and techniques you have studied into practice. E2 is an integrated paper, but you learn the topics separately, so it is only by doing questions that you can draw the different areas of the syllabus together.Our Practice and Revision Kit follows the order of the text and there are a large number of questions on all syllabus topics. This is essential, as all questions on the paper will be compulsory.Our Practice and Revision Kit gives ample opportunity to practice both the 10 mark Section A questions and the longer Section B scenario questions. Two mock exams also reflect this format. Most questions have marking schemes, so that you can see what skills and techniques the examiner values. While there are some marks for textbook knowledge - and you should make sure you get these - many of the marks will be for applying this knowledge to the scenario in the question. Even Section A questions often require this application.

In the last decade, due to factors of ICT infrastructural and broadband maturation, rising levels of educational attainment and computer literacy, and diversification strategies, e-learning has exploded in the Middle East and North Africa (MENA) region. However, significant barriers remain in the region's e-learning development: lack of research on outcomes and effectiveness, paucity of Arabic language learning objects, monopolies and high cost of telecommunications, cultural taboos, accreditation, censorship, and teacher training. This unique volume is the first comprehensive effort to describe the history, development, and current state of e-learning in each of the 20 MENA countries from Algeria to Yemen. Each entry is expertly written by a specialist who is acutely familiar with the state of e-learning in their respective country, and concludes with a bibliography of key reports, peer-reviewed

books and articles, and web resources. E-Learning in the Middle East and North Africa (MENA) proves itself as a vital compendium for a wide readership that includes academics and students, transnational program directors, international education experts, MENA government departments, commercial vendors and investors, and ICT development and regulatory agencies involved in e-learning in the Middle East.

The evolution of soft computing applications have offered a multitude of methodologies and techniques that are useful in facilitating new ways to address practical and real scenarios in a variety of fields. Exploring Innovative and Successful Applications of Soft Computing highlights the applications and conclusions associated with soft computing in different technological environments. Providing potential results based on new trends in the development of these services, this book aims to be a reference source for researchers, practitioners, and students interested in the most successful soft computing methods applied to recent problems.
This book is a collection of teaching cases on two Chinese companies, UFIDA and Founder. The cases describe the management practices of typical Chinese companies. UFIDA is a well-known company providing management software while Founder is a long-established high-tech company. The book aims at providing readers with original, first-hand materials, based on a theoretical framework, and broadening readers⊡ vision regarding China⊡s business niche in terms of culture, strategy, corporate governance, business environment, organizational dynamics, marketing, human resource, finance and the potential business partnerships with Chinese enterprises and the Chinese people. The cases are comprehensive and descriptive. This book appeals to top executives and leaders of multinational companies with

ambitions to expand or already vested business interest in China. It is also of valuable use to companies specializing in international trade. The book provides insight into the great business opportunities in the development of China.

Information technology (IT) is an essential core of the economy today. Corporations and governments worldwide rely on it to drive their core strategy and develop and execute business models. Amounting to over 3.7 trillion US dollars of worldwide spending, the growing significance of the IT industry in the global economy is now well established. Hence, it is crucial to understand the marketplace within which it exists, and this book presents a systematic analysis of the processes, techniques, and methods involved in IT sales and marketing. In Selling IT, the book: Integrates a large IT provider's selling process with the enterprise user's IT buying process to highlight the nuances of selling, marketing, and developing IT solutions that create value for customers. Discusses various key concepts such as value-based IT selling, business case for IT acquisition, vendor evaluation and management, account and customer relationship management, customer segmentation, and techniques for customer acquisition and retention. Analyses the challenges and opportunities involved in selling digital IT and examines the evolution of jobs and careers based on the changed IT landscape. Includes lesson

plans, case studies, and chapter-wise practice questions to support teaching and learning. The book boasts a robust theoretical foundation supported by a clear exposition of concepts and management theories. It will be of benefit to professionals using organisation-mandated selling processes. Young executives with a technology background looking for a sales and marketing career in the IT industry can also effectively use this book. It will also be an essential read for scholars and researchers in B2B marketing, IT consulting, technology sales, and digital transformation.

Covering the principles and techniques you need to successfully manage an engineering or technical project from start to finish, Project Management, Planning and Control is an established and widely recommended project management handbook. Building on its clear and detailed coverage of planning, scheduling and control, this eighth edition includes new case studies from industries including petrochemical and construction, as well as updates throughout to account for changes and best practice in governance and adjudication. It also now includes expanded coverage of AI, Big Data and sustainability. Ideal for those studying for Project Management Professional (PMP) qualifications, Project Management, Planning and Control is aligned with the latest Project Management Body of Knowledge (PMBOK) for both the Project Management Institute (PMI) and the Association of Project Management (APM) and includes questions and answers to help you test your understanding. Self-contained chapters make this ideal for quick reference. Provides case studies in project management from construction industries and AI. Updated and expanded to address new trends and techniques related to governance, stakeholder management, BIM/VDC and Primavera P6.
