***Italian motorcycles have a place in history – and many enthusiasts' hearts – out of all proportion to the numbers that have been built. From Moto Guzzi becoming the first non-British marque to win a TT through to Ducati's achievements in MotoGP, they have also been at the forefront of motorsport despite being far smaller than, at first, the British and later the Japanese manufacturers. If the number of motorcycles built by Italian manufacturers is small, the sheer number of Italian motorcycle factories will surprise readers. Almost 600 marques were identified in researching this book, and there may have***

*been thousands. This is partly because there were so many engines available off the shelf – many of them English – as well as a thriving accessory and component industry. A–Z of Italian Motorcycle Manufacturers only deals briefly with the grand marques Ducati and Moto Guzzi because there have been many dedicated books about them. Instead this is a definitive guide to the factories that have been less widely covered or, in most cases, never before in the English language. Some, such as Bianchi and Garelli, might be familiar: others, remembered for their racing achievements or uniqueness, such as Morbidelli, and many you may have never heard of. But if it was possible to establish when and where the factories were active, and at least a little about the motorcycles they built, then there is an entry for them. An appendix lists the other manufacturers that are lesser known, making this the most complete reference book of Italian motorcycles available today. This book is a complete guide to Italian motorcycle manufacturers, and an essential reference for anyone with an interest in these fascinating vehicles. *machinist named George Hedstrom and a champion cyclist named George Hendee, became one of the most popular motorcycles in the world: the Indian. Out of production for half a century, Indian retains the loyalty and admiration of motorcycle riders and enthusiasts everywhere. This book recounts the marque's story from its earliest single-cylinder "motocycles" of 1901 through the bitter day in 1953 when the company shuttered Wigwam, its Springfield, Massachusetts, plant—with a nod to the trademark disputes that continue to this day. Text by noted Indian historian Jerry Hatfield, and more than 125 specially commissioned photographs and 25 black and white historical pictures, capture the seductive power and grace of the great models—the Scout, Chief, and Four, —and recreate the thrill the Indian generates to this day.*
