Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. To ensure a quality reading experience, this work has been proofread and republished using a format that seamlessly blends the original graphical elements with text in an easy-to-read typeface. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.**

**The 2020 edition of the WWDR, titled 'Water and Climate Change' illustrates the critical linkages between water and climate change in the context of the broader sustainable development agenda. Supported by examples from across the world, it describes both the challenges and opportunities created by climate change, and provides potential responses - in terms of adaptation, mitigation and improved resilience - that can be undertaken by enhancing water resources management, attenuating water-related risks, and improving access to water supply and sanitation services for all in a sustainable manner. It addresses the interrelations between water, people, environment and economics in a changing climate, demonstrating how climate change can be a positive catalyst for improved water management, governance and financing to achieve a sustainable and prosperous world for all. The report provides a fact-based, water-focused contribution to the knowledge base on climate change. It is complementary to existing scientific assessments and designed to support international political frameworks, with the goals of helping the water community tackle the challenges of climate change, and informing the climate change community about the opportunities that improved water management offers in terms of adaptation and mitigation.**

**The third Glass Ceilings survey of South African media launched on 19 October - national press freedom day - 2018 shows there have been dramatic shifts in the race and gender composition of media since the first study twelve years ago. But black women are still not fairly represented in media decision-making; the pay gap is widening, especially in the age of digitisation; and the old boys' network is alive and well. In the #MeToo and #TotalShutDown era, the conversation is moving beyond numbers, to the underlying patriarchal norms that fuel sexist attitudes, harassment and its newest ugly form - cyber misogyny. With the 25th anniversary of democracy fast approaching, the key message in the report is that #TimesUp for the South African media and #TimeisNow to walk the talk of gender equality!**

#### **Collaboration with the Production Process**

Analyzing postapartheid culture in South Africa, this book critically examines music, cinema, social media, and the politics of change after apartheid. It cuts across academic disciplines, the creative arts, and the media to pose two central questions: Is South Africa changing for the better, or are we static? Is there too much static for us to hear each other clearly? The various chapters provide key insights into recent media phenomena, such as Die Antwoord, a South African rap-rave group; the 2010 Soccer World ? Bok van Blerk, a South African musician; Tsotsi, a 2005 film; Kuli Roberts' Sunday World newspaper column on "coloureds"; the revisionist film Afrikaaps; and the University of the Free State's Reitz video scandal. The close readings of lyrics, videos, and films are loaded with keen insights explaining what the cultural issues are and why they matter.

Around the globe, hand injuries are the number one preventable industrial accident—in manufacturing, construction, oil & gas, you name it. But what actually works to protect workers' hands? What kind of training actually gets through? What causes a worker to act safely (or not) in the moment? Which stats are meaningful and which are useless? What i.

Hybridity and its Discontents explores the history and experience of 'hybridity' - the mixing of peoples and cultures - in North and South America, Latin America, Britain and Ireland, South Africa, Asia and the Pacific. The contributors trace manifestations of hybridity in debates about miscengenation and racial purity, in scientific notions of genetics and 'race', in processes of cultural translation, and in ideas of nation, community and belonging. The contributors begin by examining the persistence of anxieties about racial 'contamination', from nineteenth-century fears of miscegenation to more recent debates about mixed race relationships and parenting. Examining the lived experiences of children of 'mixed parentage', contributors ask why such fears still thrive in a supposedly tolerant culture? The contributors go on to discuss how science, while apparently neutral, is part of cultural discourses, which affect its constructions and classifications of gender and 'race'. The contributors examine how new cultural forms emerge from borrowings, exchanges and intersections across ethnic and cultural boundaries, and conclude by investigating the contemporary experience of multiculturalism in an age of contested national borders and identities.

Global Journalism Education in the 21st Century

"'African Media, African Children' is the title of the tenth Yearbook of the International Clearinghouse on Children, Youth and Media. Over the years, we have focused attention on a wide range of topics, but this is the first Yearbook with a geographical focus, and a vast continent at that. A focus on Africa seems both timely and important. When issues about children and media are discussed, all too often the frame of reference is the media culture of the Western world.

There is an urgent need for the agenda to become open to non-Western thoughts and intercultural approaches to a much higher degree than is the case at present. The essays in this volume reflect a wide-range of issues and concerns related to children's media culture in Africa. For example, several address the role of entertainment television in Addis Abba, Ghana, South Africa, Kenya, and Zambia and in the lives of Muslim children. Other essays introduce us to children-centered media from Ghana, South Africa, and Zimbabwe, and the innovative programs of PLAN-International. In addition to entertainment media and children-centered media, media education and digital media literacy are also discussed."--Publisher website.

As leaders increasingly understand the importance of good safety practice to support their business objectives, safety and health practitioners develop better tools and solutions. However, there is still a gulf between these two groups where engagement, communication and shared understanding can be found lacking. From Accidents to Zero opens up the field of safety culture and breaks it down into bite-sized pieces to facilitate new, critical thought and inspire practical action. Based on the concept of creating safety, as opposed to just preventing accidents, each of the 26 chapters in this user-friendly book includes explanation, commentary, reflections and practical activities designed to systematically and sustainably improve workplace safety culture. Core topics range from behaviour to values, daily rituals to unsafe acts, felt leadership to trust. Andrew Sharman's practical guide blends current academic thinking with authoritative guidance and sets up the opportunity for all parts of the organization to close the gap by providing very clear steps to thinking and acting differently. It sparks insight into how both traditional methods and novel approaches can be brought to life in real world situations. From Accidents to Zero offers a clear route to culture change through over one hundred pragmatic ideas to motivate and lead people, influence behaviour and drive a positive evolution in workplace safety.

This volume aims to critically engage with constructs and experiences of disabled sexualities through Africa, Asia, Latin America and the Caribbean. In doing so, it is hoped that the questions raised, reflections, analyses and arguments will provide readers with a catalyst through which to (re)think disabled sexualities from the perspective of the Global South. What makes this edited volume unique is besides chapters from emerging academics and disability activists who either live or work in the Global South, it also includes personal contributions from disabled people across the Global South. This volume takes a broad perspective on disabled sexualities addressing such areas as gender, race, culture, colonialism, body image, sexual pleasure, sexuality education, sexual access, sexual and reproductive health services, queer sexualities, and sexual rights and justice. The volume will be of interest to international and national organisations for people with disabilities, gender and sexuality researchers, health professionals, social workers, academics and students at all higher education and training institutions interested in disability, gender queer and sexuality studies.

"Global Journalism Education in the 21st Century: Challenges and Innovations" sheds light on the present and future of journalism education worldwide and how to best prepare future journalists (and citizens) to cover the news. This one-stop text, reference book is a must-read for everyone interested in quality journalism education and practice.

Journalists and Job Loss explores the profound disruption of journalism work in the 21st century's networked digital media environment. The chapters analyse how journalists have experienced and navigated job loss, re-employment, career change and career re-invention as traditional patterns of newsroom employment give way to occupational change, income insecurity and precarious work in journalism globally. The authors showcase the design, methodology and results of the New Beats project, a ground-breaking longitudinal study of change in the work of Australian journalists, as well as related case studies of job loss and career change in journalism based on research in different national settings across the global North and global South. The book also considers the wider implications of changes in journalism work for media sustainability, gender equity, and journalism work futures. The book provides a theoretically informed and empirically grounded analysis of job loss and the new contours of journalistic work in a critical political, cultural, economic, and social industry. It will be an important resource for researchers and students in disciplines including journalism, media and communication studies, business, and the social sciences in general.

The Construction Chart Book presents the most complete data available on all facets of the U.S. construction industry: economic, demographic, employment/income, education/training, and safety and health issues. The book presents this information in a series of 50 topics, each with a description of the subject matter and corresponding charts and graphs. The contents of The Construction Chart Book are relevant to owners, contractors, unions, workers, and other organizations affiliated with the construction industry, such as health providers and workers compensation insurance companies, as well as researchers, economists, trainers, safety and health professionals, and industry observers.

**Safety and Health for the Stage: Collaboration with the Production Process is a practical guide**

to integrating safety and health into the production process for live entertainment in the context of compliance with applicable codes, standards, and recommended practices. This book explores the need for safety and health to become an integral aspect of theatre production and live entertainment, focusing on specific steps to take and policies to employ to bring a safety and health program into full collaboration in the production process. Readers will learn how to comply with legal codes and standards as they initiate and implement an effective safety and health program in their theatre production organization or academic theatre department. The book includes references and links to other industry-specific safety and health resources, as well as a Glossary of Safety and Health Terms to navigate the safety and health jargon in the context of theatre and live entertainment. *Safety and Health for the Stage: Collaboration with the Production Process* provides links to electronic versions of sample safety and health programs, industry-specific policies and recommended practices, and forms and templates related to many of the topics covered in the book. Written for practitioners who are engaged in all aspects of theatre production and live entertainment, as well as educators who train and influence the next generations of these practitioners, this book is an essential resource for creating a positive culture of safety in live entertainment.

"Addresses censorship as a worldwide issue from its earliest recorded form to the modern day ; Includes unique case studies of music censorship unfamiliar to Western audiences ; Documents censorship through a necessarily intersectional lens." --Oxford University Press.

What do the Economic Freedom Fighters (EFF) stand for? How do they propose to nationalize mines, banks, and land? Is Julius Malema, the founder of the EFF, equipped to legislate or to lead? These tough questions are asked in *The Coming Revolution: Julius Malema and the Fight for Economic Freedom*. Malema is tackled on his tax woes and on the "tenderpreneur" label by Ja Smith, an executive editor of the *Star*. Smith asks Malema to explain, contextualize, and motivate his political agenda and the genesis of the new party. Hard-hitting and informative, *The Coming Revolution* disrupts the dominant South African political narrative.

A clear, comprehensive overview of media legislation, case law, and doctrine, presented from the practitioner's point of view, this book is a valuable time-saving resource for all concerned with media and communication freedom. Lawyers representing parties with interests in South Africa will welcome this very useful guide, and academics and researchers will appreciate its value in the study of comparative media law.

Challenges & Innovations

*Thoroughly updated for its Sixth Edition, Principles and Practice of Pediatric Oncology provides a comprehensive review of the multiple disciplines that make up the care and research agendas for children with cancer. It is the most comprehensive textbook of pediatric oncology ever put together, covering biology and genetics and detailing the diagnosis, multimodal treatment, and long-term management of patients with cancer. The fundamental principles of supportive care and the psychosocial aspects of support for patients and families are also discussed.*

*For decades, manufacturers from around the world relied on asbestos from the town of Asbestos, Quebec, to produce fire-retardant products. Then, over time, people learned about the mineral's devastating effects on human health. Dependent on this deadly industry for their community's survival, the residents of Asbestos developed a unique, place-based understanding of their local environment; the risks they faced living next to the giant open-pit mine; and their place within the global resource trade. This book unearths the local-global tensions that defined Asbestos's proud and painful history to reveal the challenges similar resource communities have faced – and continue to face today.*

*Offers a detailed account of all the most important aspects of the judiciary in South Africa, both now and in the past. Provides a general survey of the judiciary as an institution.*
