

Safer Home Assessment Tool

A staple of family medicine training for 30 years, Essentials of Family Medicine offers a comprehensive introduction to this specialty designed just for clerkship students. Covering principles of family medicine, preventive care, and a full range of common ambulatory care problems, it provides all the guidance you need to succeed on a clinical rotation in family medicine.

This handbook is designed to guide public sector managers and development practitioners through the process of large-scale housing reconstruction after major disasters, based on the experiences of recent reconstruction programs in Aceh (Indonesia), Sri Lanka, Pakistan, Gujarat (India) and Bam (Iran).

Focusing on practical, need-to-know information, Community/Public Health Nursing Practice helps you learn how to apply the nursing process at the community and family level. It features an engaging, easy-to-understand writing style, as well as assessment tools, detailed case studies, and clinical examples that demonstrate how key concepts apply to real-world practice. Additional resources on the companion Evolve website expand and enhance content within the text.

Practical features including Case Studies, Ethics in Practice, and The Nursing Process in Practice illustrate real-world applications of key community/public health nursing concepts. A complete unit on the community as client helps you understand how the assessment, diagnosis, planning, intervention, and evaluation steps of the nursing process apply to the community, as opposed to an individual. A chapter devoted to community assessment provides a complete assessment tool and shows you how the tool applies to two different types of communities. UNIQUE! A chapter on screening and referral promotes population-focused practice, which is the crux of community/public health nursing. A separate unit on the family emphasizes the importance of viewing the family as a singular client. A complete discussion of the Minnesota Wheel helps you better understand this widely-accepted framework for community/public health nursing practice.

Helpful sections such as Focus Questions, Chapter Outlines, Key Ideas, and Learning by Experience and Reflection help you pinpoint essential information. NEW! Healthy People 2020 objectives throughout the text help you identify common health risk factors in populations and families. NEW! Coverage of health care reform, including the Patient Protection and Affordable Care Act of 2010 (PPACA), explores how current health care legislation impacts community/public health nursing. NEW! Discussions of community health "hot button" issues, such as human trafficking, genital circumcision, and bullying, introduce you to today's health care challenges. NEW! Information on weather-related disaster fatalities, bioterrorism, and national and state planning responses familiarize you with current, relevant issues which affect the health of populations worldwide and shape the role of the community/public health nurse.

Designed to help students become effective, reflective practitioners, this fully updated edition of the most widely used occupational therapy text for the course continues to emphasize the [i]why[s] as well as the [i]how-to[s] of holistic assessment and treatment. Now in striking full color and co-edited by renowned educators and authors Diane Powers Dirette and Sharon Gutman, Occupational Therapy for Physical Dysfunction, Eighth Edition features expert coverage of the latest assessment techniques and most recent trends in clinical practice. In addition, the book now explicitly integrates [i]Frames of Reference[s] to help students connect theories to practice and features a new six-part organization, thirteen all-new chapters, new pedagogy, and more.

Antipatterns and Patterns for Business Agility

Willard and Spackman’s Occupational Therapy

Risk Factors and Strategies for Prevention

Child Neglect

Kohlman Evaluation of Living Skills (KELS)

Falls in Older People

Patient Safety and Quality

In a health care environment, risks abound. This must-have book provides organizations with the tools and know-how to conduct effective assessments of potential risks and take steps to minimize them. Whether the risk issue is infant and pediatric abduction, infection control during construction, fire safety, or potential disaster emergencies, Environment of Carer Risk Assessment guides organ assessment process and suggests potential high-profile, high-risk areas for consideration. It shows how to use existing standards tools such as the Periodic Performance Review, Interim Life Safety Measures, the hazard vulnerability analysis, and more. And, it provides case studies, examples, and worksheets for assessing and minimizing risk and includes a CD-ROM with interactive risk assessment assessments can help organizations avoid OSHA fines, accreditation noncompliance, and more. But the bottom line is that by performing prudent and timely risk assessments, organizations can help ensure patient, staff, and visitor safety.

This guidebook presents the SAFERR (Screening & Assessment for Family Engagement, Retention, & Recovery) model for helping staff of public & private agencies respond to families affected by substance use disorders. The SAFERR model & this guidebook were developed by the Nat. Center on Substance Abuse & Child Welfare (NCSACW), a training & technical assistance resource center. NCSACW response to frequent requests from managers of child welfare agencies for a [i]tool[s] that caseworkers could use to screen parents for potential at use disorders in order to make decisions about children’s safety. Illustrations.

Be prepared for the growing opportunities in community and population health practice with the 3rd Edition of this groundbreaking resource. The New Edition reflects the convergence of community and population health practice with expanded content on health promotion, well-being, and wellness. Drs. Scaffa and Reitz present the theories underpinning occupational therapy practice in community health practice. The authors provide practical guidance in program needs assessment, program development, and program evaluation. Both new practitioners and students will find practice-applicable coverage, including expanded case examples, specific strategies for working in the community, and guidance on securing funding for community and population health programs.

This textbook on assessment and outcome measurement is written for both occupational therapy and physiotherapy students and qualified therapists. It begins by defining what is meant by assessment, outcome, evaluation and measurement and discussing the complexity of therapy assessment and measurement, including the challenge of measuring human behaviour and the impact of factors including the environment. Methods of data collection (e.g. observation, interview, standardised testing) and sources (e.g. self-report, proxy) for collecting information about clients are then reviewed, and the main purposes of assessment (e.g. descriptive, evaluative, predictive, discriminative) presented. The book then addresses the topics of standardisation, levels of measurement, reliability, validity and measurement error. A chapter describing and applying models for categorizing levels of function to aid assessment and measurement. The concept of clinical reasoning and reflective practice is then explored. Application of principles is supported through detailed case studies and worksheets and the criteria for test critique and guidelines for choosing a particular assessment approach are discussed.

Behaviour Diaries: An Assessment Tool for Supporting Children with Behavioural Difficulties

Creating a Cleaner, Greener, Safer Home

An Evidence-based Handbook for Nurses

Handbook of Assessment in Clinical Gerontology

Health Care Comes Home

From Impairment to Participation

Neuropsychology of Everyday Functioning

Learn how to create a cleaner, greener, safer home with Christopher Gavigan and the trusted experts at Healthy Child Healthy World. Healthy Child Healthy World is the essential guide for parents! All parents want a happy and healthy child in a safe home, but where do they start? It starts with the small steps to creating a healthier, less toxic, and more environmentally sound home, and this is the definitive book to get you there. Unfortunately, tens of millions of Americans, overwhelmingly children, now face chronic disease and illnesses including cancer, autism, asthma, allergies, birth defects, ADD/ADHD, obesity/diabetes, and learning and developmental disabilities. The number gets higher each year and more parents ask WHY? Scientific evidence increasingly finds chemicals in everyday products like cleaning supplies, beauty care and cosmetics, home furnishings, plastics, food, and even toys that are contributors to these ailments. The good news is that you can something to protect your children with a few simple changes! Inside, you'll find practical, inexpensive, and easy lifestyle advice for every stage of parenting including: *Advice on preparing a nontoxic nursery for a new baby *What every expectant mom needs to do to have a safer pregnancy *Clarifying which plastics and baby products to avoid and the healthier solutions *Tips to take to the grocery store, including the most and least pesticide-laden fruits and vegetables and the best healthy kid-approved snacks *Which beauty care / cosmetic products pose the biggest risk to health *The best recipes for healthy snacks, low-cost and safe homemade cleaners, and non-toxic art supplies *How to easily minimize allergens, dust, and lead *A greener garden, yard, and outdoor spaces *Tips to keep your pets healthy, and the unwanted pests out naturally *Renovation ideas, naturally fresher indoor air, and safer sleeping options. *An 27 page extensive shopper’s guide to most trusted and best products every home needs Inside is also packed with over 40 featured contributions from renowned doctors, environmental scientists, and public-health experts like Dr. Harvey Karp, Dr Philip Landrigan, and William McDonough, as well as many celebrity parents like Gwyneth Paltrow, Tobey Maguire, Sheryl Crow, Erin Brockovich and Tom Hanks. A special featured contribution from First Lady Michelle Obama on her best ways of coping with her daughter’s asthma.

It’s no secret that we are living in the Digital Age. Technology companies make up seven of the world’s ten largest firms by market capitalization. And the key to their success is the key to all modern organizations. Jonathan Smart, business agility practitioner, thought leader, and coach, reveals the patterns and antipatterns that will help organizations from every industry deliver better value sooner, safer, and happier through high levels of engagement, inclusion, and empowerment. Through his decades of experience in the technology world, Smart provides business leaders with a blueprint for creating a world-class organization of the future. Through Agile and Lean ways of working, business leaders can empower teams to improve production, grow together, and create better services for their customers. These better ways of working have overflowed from the IT department to every corner of successful organizations, taking root in every industry from aerospace to accounting, insurance to shipping. This book is not about software development. It is not a book about the computer industry. This book is about applying agility across the entire organization. It’s a book that will put you at the front of change and ahead of the competition.

"Nurses play a vital role in improving the safety and quality of patient car -- not only in the hospital or ambulatory treatment facility, but also of community-based care and the care performed by family members. Nurses need know what proven techniques and interventions they can use to enhance patient outcomes. To address this need, the Agency for Healthcare Research and Quality (AHRQ), with additional funding from the Robert Wood Johnson Foundation, has prepared this comprehensive, 1,400-page, handbook for nurses on patient safety and quality -- Patient Safety and Quality: An Evidence-Based Handbook for Nurses. (AHRQ Publication No. 08-0043)."--Online AHRQ blurb, http://www.ahrq.gov/qual/nurseshdbk.

New trends in mental healthcare practice and a rapid increase in the aged population are causing an explosion in the fields of clinical gerontology and geropsychology today. This comprehensive second edition handbook offers clinicians and graduate students clear guidelines and reliable tools for assessing general mental health, cognitive functioning, functional age, psychosocial health, comorbidity, behavior deficits, and more. Psychopathology, behavioral disorders, changes in cognition, and changes in everyday functioning are addressed in full, and a wide range of conditions and disorders common to this patient population are covered. Each chapter provides an empirical review of assessment instruments, assessment scales in their totality, a review of how these instruments are used with and adapted for different cultural groups, illustration of assessments through case studies, and information on how to utilize ongoing assessment in treatment and/or treatment planning. This combination of elements will make the volume the definitive assessment source for clinicians working with elderly patients. The most comprehensive source of up-to-date data on gerontological assessment, with review articles covering: psychopathology, behavioral disorders, changes in cognition, and changes in everyday functioning Consolidates broadly distributed literature into single source, saving researchers and clinicians time in obtaining and translating information and improving the level of further research and care they can provide Chapters directly address the range of conditions and disorders most common for this patient population - i.e. driving ability, mental competency, sleep, nutrition, sexual functioning, demntias, elder abuse, depression, anxiety disorders, etc Fully informs readers regarding conditions most commonly encountered in real world treatment of an elderly patient population Each chapter cites case studies to illustrate assessment techniques Exposes reader to real-world application of each assessment discussed

Home Care Nursing: Surviving in an Ever-Changing Care Environment

Aging Research and Practices in Malaysia

Manual for Undertaking National Urban Assessments

An Instrument for Assessing and Analysing Accessibility Problems in Housing

A Practical Guide to Transforming Professional Practice

Occupational Therapy for Physical Dysfunction

Better Living With Dementia: Implications for Individuals, Families, Communities, and Societies highlights evidence-based best practices for improving the lives of patients with dementia. It presents the local and global challenges of these patients, also coupling

foundational knowledge with specific strategies to overcome these challenges. The book examines the trajectory of the disease, offers stage-appropriate practices and strategies to improve quality of life, provides theoretical and practical frameworks that inform on ways to

support and care for individuals living with dementia, includes evidence-based recommendations for research, and details global examples of care approaches that work. Weaves research evidence and theories with practical know-how. Identifies support strategies for home, community, and health care settings. Provides stage-appropriate strategies relative to dementia severity. Summarizes dementia pathology, diagnosis, and progression. Considers the changing needs of both the individual with dementia and family and formal caregivers. Offers evidence-informed recommendations for research, practice, policy, and how to make things better at home, in the community, in healthcare and service settings, and through national policies. Provides local and global exemplars of what works. Provides case vignettes to illustrate key points with real examples. Contains brief conversations with national and international experts.

The definitive work on occupational therapy for physical dysfunction returns in its Sixth Edition, with reputable co-editors and clinical, academic, and consumer contributors. This text provides a current and well-rounded view of the field- from theoretical rationale to evaluation, treatment, and follow-up. Through the Occupational Functioning Model (OFM), the Sixth Edition continues to emphasize the conceptual foundation and scientific basis for practice, including evidence to support the selection of appropriate assessments and interventions. NEW TO THIS EDITION: Student DVD with video clips demonstrating range of motion, manual muscle testing, construction of hand splints, and transferring patients Evidence Tables summarize the evidence behind key topics and cover Intervention, Participants, Dosage, Type of Best Evidence, Level of Evidence, Benefit, Statistical Probability, and Reference Assessment Tables summarize key assessment tools and cover Instrument and Reference, Description, Time to Administer, Validity, Reliability, Sensitivity, and Strengths and Weaknesses

This volume brings together well-known experts to present recent advances in the neuropsychological assessment of key, real-world capacities: the ability to live independently, work, manage medications, and drive a car.

This unique and engaging open access title provides a compelling and ground-breaking account of the patient safety movement in the United States, told from the perspective of one of its most prominent leaders, and arguably the movement’s founder, Lucian L. Leape, MD.

Covering the growth of the field from the late 1980s to 2015, Dr. Leape details the developments, actors, organizations, research, and policy-making activities that marked the evolution and major advances of patient safety in this time span. In addition, and perhaps most importantly, this book not only comprehensively details how and why human and systems errors too often occur in the process of providing health care, it also promotes an in-depth understanding of the principles and practices of patient safety, including how they were influenced by today’s modern safety sciences and systems theory and design. Indeed, the book emphasizes how the growing awareness of systems-design thinking and the self-education and commitment to improving patient safety, by not only Dr. Leape but a wide range of other clinicians and health executives from both the private and public sectors, all converged to drive forward the patient safety movement in the US. Making Healthcare Safe is divided into four parts: I. In the Beginning describes the research and theory that defined patient safety and the early initiatives to enhance it. II. Institutional Responses tells the stories of the efforts of the major organizations that began to apply the new concepts and make patient safety a reality. Most of these stories have not been previously told, so this account becomes their histories as well. III. Getting to Work provides in-depth analyses of four key issues that cut across disciplinary lines impacting patient safety which required special attention. IV. Creating a Culture of Safety looks to the future, marshalling the best thinking about what it will take to achieve the safe care we all deserve. Captivatingly written with an “insider’s” tone and a major contribution to the clinical literature, this title will be of immense value to health care professionals, to students in a range of academic disciplines, to medical trainees, to health administrators, to policymakers and even to lay readers with an interest in patient safety and in the critical quest to create safe care.

An Assessment Tool for Supporting Children with Behavioural Difficulties

Occupational Therapy in Community and Population Health Practice

Using the Assess-a-pet Protocol to Better Understand Aggression

The Housing Enabler

Since publication of the original edition in 1996, this book has established itself as an essential text for occupational therapists. It offers an understanding of the law relating to their practice, but is written to be accessible for those who have no prior legal knowledge. The text provides valuable information for occupational therapists employed in health and social services, as well as the law relevant to private practitioners. The book includes chapters on all the main client groups and presents the relevant specialist law. Students and teachers of occupational therapy will find the chapters on professional registration, education, training and research of particular interest. The third edition has been substantially revised to cover significant changes in legislation since the previous version. There is also a brand new chapter on the subject of death and dying. Legal Aspects of Occupational Therapy remains a key resource for the occupational therapy student, practitioner and service manager.

Tina M. Marrell’s new book, Home Care Nursing: Surviving in an Ever-Changing Care Environment is a practical and comprehensive guidebook written concisely and without jargon or insider acronyms, making the book accessible to anyone whose work is connected to home care nursing services. Designed to provide chapters as stand-alone resources for readers with previous experience seeking updated guidance, Home Care Nursing is also an excellent guide for course or orientation material. Each chapter is packed with practical questions, discussion topics, and additional resources, such as a complete Medicare Benefit Policy for reference. Additionally, offering more than just an overview of the healthcare and home care markets, this book discusses the unique practice setting and environment of home care nursing, the laws regulations, and quality, and how to make the leap into the field, document your home visit, and improve your professional growth and development.

Wall Street Journal Bestseller! Next Big Idea Club selection - chosen by Malcolm Gladwell, Susan Cain, Dan Pink, and Adam Grant as one of the “two most groundbreaking new nonfiction reads of the season!” "A must-read that topples the idea that emotions don’t belong in the workplace." --Susan Cain, author of Quiet A hilarious guide to effectively expressing your emotions at the office, finding fulfillment, and defining work-life balance on your own terms. How do you stop the office grouch from ruining your day? How do you enjoy a vacation without obsessing about the unanswered emails in your inbox? If you’re a boss, what should you do when your new, eager hire wants to follow you on Instagram? The modern workplace can be an emotional minefield, filled with confusing power structures and unwritten rules. We’re expected to be authentic, but not

too authentic. Professional, but not stiff. Friendly, but not an oversharer. Easier said than done! As both organizational consultants and regular people, we know what it's like to experience uncomfortable emotions at work - everything from mild jealousy and insecurity to panic and rage. Ignoring or suppressing what you feel hurts your health and productivity -- but so does letting your emotions run wild. Our goal in this book is to teach you how to figure out which emotions to toss, which to keep to yourself, and which to express in order to be both happier and more effective. We'll share some surprising new strategies, such as: * Be selectively vulnerable: Be honest about how you feel, but don't burden others with your deepest problems. * Remember that your feelings aren't facts: What we say isn't always what we mean. In times of conflict and miscommunication, try to talk about your emotions without getting emotional. * Be less passionate about your job: Taking a chill pill can actually make you healthier and more focused. Drawing on what we've learned from behavioral economics, psychology, and our own experiences at countless organizations, we'll show you how to bring your best self (and your whole self) to work every day.

The invaluable resource provides a sophisticated technique for teachers to observe, assess, plan and evaluate to improve pupil behaviour. The book recognises the diverse demands of the modern classroom and explores ways in which asking the right question can help in the development of effective solutions. This is far more than ticking check lists as it will: develop a more rigorous approach to the tracking and assessment of behaviour related issues; deepen understanding about biological, psychological and social factors influencing behaviour; give examples of reflective and diagnostic practice, informing planning for successful interventions; and explore ways of collecting appropriate information to support requests for interventions from other agencies. The pack includes a CD ROM with reflective tasks, diagnostic tools, illustrative poems and a staff Powerpoint for professional development sessions.

Home Fall Hazards

A Pocket Guide

(SAFERR)

No Hard Feelings

Incorporating Daily Life Into Medicine

In the United States, health care devices, technologies, and practices are rapidly moving into the home. The factors driving this migration include the costs of health care, the growing numbers of older adults, the increasing prevalence of chronic conditions and diseases and improved survival rates for people with those conditions and diseases, and a wide range of technological innovations. The health care that results varies considerably in its safety, effectiveness, and efficiency, as well as in its quality and cost. Health Care Comes Home reviews the state of current knowledge and practice about many aspects of health care in residential settings and explores the short- and long-term effects of emerging trends and technologies. By evaluating existing systems, the book identifies design problems and imbalances between technological system demands and the capabilities of users. Health Care Comes Home recommends critical steps to improve health care in the home. The book's recommendations cover the regulation of health care technologies, proper training and preparation for people who provide in-home care, and how existing housing can be modified and new accessible housing can be better designed for residential health care. The book also identifies knowledge gaps in the field and how these can be addressed through research and development initiatives. Health Care Comes Home lays the foundation for the integration of human health factors with the design and implementation of home health care devices, technologies, and practices. The book describes ways in which the Agency for Healthcare Research and Quality (AHRQ), the U.S. Food and Drug Administration (FDA), and federal housing agencies can collaborate to improve the quality of health care at home. It is also a valuable resource for residential health care providers and caregivers.

Occupational therapists are expected to maintain their knowledge of best practice by independently keeping up to date on the latest research. With this work, the authors have assembled the evidence for effectiveness of occupational therapy for adults and older adults. It brings together the latest published peer-reviewed literature, conceptual approaches, outcome measures, and intervention approaches to address the three main areas by: Identifying a finite set of interventions which occupational therapists deliver most often, and providing details of those intervention approaches; Identifying where the research evidence shows that occupational therapists can achieve specific positive effects as a result of those interventions; Identifying the outcome measures most commonly and reliably used by researchers in occupational therapy to demonstrate the effects of interventions. The authors have comprehensively reviewed all of the intervention effectiveness literature for occupational therapy provided for adults. The material reviewed crosses all diagnostic categories and areas of practice for adults and older adults. Analysis of over 500 research studies and systematic reviews form the basis for this book.

Occupational therapists require skills to access the daily living skills of their clients. This book uses a transactional approach to examine the home environment and the client. Current and future needs are assessed and this book addresses concerns and suggests solutions which will assist in helping the client remain in their own home.

Initial priorities for U.S. participation in the International Decade for Natural Disaster Reduction, declared by the United Nations, are contained in this volume. It focuses on seven issues: hazard and risk assessment; awareness and education; mitigation; preparedness for emergency response; recovery and reconstruction; prediction and warning; learning from disasters; and U.S. participation internationally. The committee presents its philosophy of calls for broad public and private participation to reduce the toll of disasters.

Elder Care in Occupational Therapy

Healthy Child Healthy World

Occupational Therapy Evaluation for Adults

Health for Families and Populations

A Handbook for Reconstructing after Natural Disasters

A Safer Future

The Secret Power of Embracing Emotions at Work

Elder Care in Occupational Therapy has been extensively revised into a new and completely updated second edition. This pragmatic text presents up-to-date information in a user-friendly format that seamlessly flows from one subject to the next. From wellness to hospice, Elder Care in Occupational Therapy, Second Edition offers a broad yet detailed discussion of occupational therapy practice that is devoted to older adults. A wide variety of topics are covered in a concise format, such as historical perspectives, theoretical insights, the aging process, and current interventional strategies, to name a few. Twenty informative appendices are also included that clarify issues such as Medicare coverage, community and clinical living arrangements, client-centered practice, exercise programs, evidence-based practice, and a summary of the newly adopted Occupational Therapy Practice Framework: Domain and Process. Additional features: Contains information about the most advanced scientific achievements that can ultimately affect occupational therapy. Lists new and updated resource materials. Presents case studies that provide theoretical considerations and Intervention methods. Clearly discusses exciting and new venues for occupational therapy programming. Explains fundamentals of documentation and current reimbursement issues. Perfect for the student or clinician, Elder Care in Occupational Therapy, Second Edition provides classic, professional information on theory, disease entities, and intervention in a comprehensive format.

This open access book presents the rise of technology-enabled methods and tools for objective, quantitative assessment of Quality of Life (QoL), while following the WHOQOL model. It is an in-depth resource describing and examining state-of-the-art, minimally obtrusive, ubiquitous technologies. Highlighting the required factors for adoption and scaling of technology-enabled methods and tools for QoL assessment, it also describes how these technologies can be leveraged for behavior change, disease prevention, health management and long-term QoL enhancement in populations at large. Quantifying Quality of Life: Incorporating Daily Life into Medicine fills a gap in the field of QoL by providing assessment methods, techniques and tools. These assessments differ from the current methods that are now mostly infrequent, subjective, qualitative, memory-based, context-poor and sparse. Therefore, it is an ideal resource for physicians, physicians in training, software and hardware developers, computer scientists, data scientists, behavioural scientists, entrepreneurs, healthcare leaders and administrators who are seeking an up-to-date resource on this subject.

Urbanization in Asia is expected to reach 55% by 2030 and 64% by 2050 to constitute 53% of the world's urban population and contribute half the world's gross domestic product. But as cities swell, they also struggle with environmental degradation, traffic congestion, inadequate urban infrastructure, and lack of basic civic services. This manual prepared by Urban Sector Group of the Asian Development Bank (ADB) provides guidelines for conducting rapid urban assessments. It is guided by the Urban Operational Plan 2012-2020 which outlines ADB's support to its members in developing their urban economies through the 3E approach (Economy, Environment, and Equity). It presents a framework providing a context for the city-level 3E tool kits (Tool Kit for Rapid Economic Assessment, Planning, and Development of Cities in Asia; Green City Development Tool Kit; and Enabling Inclusive Cities: Tool Kit for Inclusive Urban Development).

Fully revised to re flect the latest AOTA standards, Occupational Therapy Evaluation for Adults: A Pocket Guide, 2nd Edition is a quick, comprehensive reference to guide students and practitioners as they perform efficient evaluations of adults, identify problems, and plan and implement interventions to produce optimal therapeutic outcomes. Clinical examples illustrate the application of content, illustrations demonstrate assessment techniques, and extensive tables capture information in an easy-to-read manner. This completely revised and updated Second Edition covers a wide range of new assessments and tools for community-based practitioners, includes up-to-coverage of assessing clients in natural settings, and offers a strong focus on helping readers develop practical skills for the workplace.

LGBTQ-Inclusive Hospice and Palliative Care

Safer Homes, Stronger Communities

Legal Aspects of Occupational Therapy

This is the only handbook for hospice and palliative care professionals looking to enhance their care delivery or their programs with LGBTQ-inclusive care. Anchored in the evidence, extensively referenced, and written in clear, easy-to-understand language, LGBTQ-Inclusive Hospice and Palliative Care provides clear, actionable strategies for hospice and palliative physicians, nurses, social workers, counselors, and chaplains.

Since the first edition of this very successful book was written to synthesise and review the enormous body of work covering falls in older people, there has been an even greater wealth of informative and promising studies designed to increase our understanding of risk factors and prevention strategies. This second edition, first published in 2007, is written in three parts: epidemiology, strategies for prevention, and future research directions. New material includes recent studies covering: balance studies using tripping, slipping and stepping paradigms; sensitivity and depth perception visual risk factors; neurophysiological research on automatic or reflex balance activities; and the roles of syncope, vitamin D, cataract surgery, health and safety education, and exercise programs. This edition will be an invaluable update for clinicians, physiotherapists, occupational therapists, nurses, researchers, and all those working in community, hospital and residential or rehabilitation aged care settings.

Celebrating 100 years of the Occupational Therapy profession, this Centennial Edition of Willard & Spackman's Occupational Therapy continues to live up to its well-earned reputation as the foundational book that welcomes students into their newly chosen profession. Now fully updated to reflect current practice, the 13th Edition remains the must-have resource that students that will use throughout their entire OT program, from class to fieldwork and throughout their careers. One of the top texts informing the NBCOT certification exam, it is a must have for new practitioners.

"MS is always in the back of your mind. If there is something you want to do, you always wonder if the MS will allow you do to it." —Darlene, living with MS for 22 years Living with multiple sclerosis (MS) is challenging and multidimensional. MS pervades all aspects of life: one's body becomes unpredictable and unreliable, one's identity and sense of self are tested, and relationships with others often change. MS symptoms emerge and remit; limitations evolve and progress. MS rehabilitation is an active, person-centered, and goal-oriented process embedded within a respectful and collaborative partnership between the person with MS and the members of his or her rehabilitation treatment team. Using the International Classification of Functioning, Disability and Health (ICF) as a guiding framework, Multiple Sclerosis Rehabilitation: From Impairment to Participation provides a comprehensive and evidence-based resource to inform and guide clinical reasoning and decision making during each phase of the MS rehabilitation process, from initial referral to post-discharge follow-up. With an emphasis on the application of evidence throughout the entire MS rehabilitation process, the specific objectives of the book are to increase the understanding of: The nature and impact of specific impairments, activity limitations, and participation restrictions experienced by people with MS How to select and use valid, reliable, and relevant assessment tools to inform the development of rehabilitation goals and intervention plans, and to evaluate outcomes This book provides information about the nature and impact of MS on the daily lives of people living with the disease, describes evidence-based assessment processes and instruments, and summarizes current knowledge that can inform goal setting and intervention planning. Thoughtful application of the knowledge contained in this book will inform and guide rehabilitation providers to work collaboratively with people with MS and enable them to achieve their goals for participation in everyday life.

Community/Public Health Nursing Practice - E-Book

Better Living With Dementia

Reducing the Impacts of Natural Disasters

Environmental gerontology – the research on aging and environment – evolved during the late 1960s, when the domain became a relevant topic due to societal concerns with the problems of housing for elderly people. The field proliferated during the 1970s and 1980s, and remains viable and active today on an international scale. However, in recent times, the viability of the field and its future has been brought into question. In this volume, international experts across diverse areas reflect on the current progress of their respective disciplines, illustrating research-grounded

benefits emerging from their work, and suggesting new agenda that can guide progress in the future. The contributors address a wide range of issues, including: evaluation of existing paradigms and new theories that might advance both research and training; issues and applications in methods, measures, and empirically-generated research agenda; innovative approaches to environmental transformations in home, community, and long-term care settings; and understudied populations and issues in environmental gerontology. This book was originally published as a special issue of the

Journal of Housing for the Elderly.

The rapid growth of home health care has raised many unsolved issues and will have consequences that are far too broad for any one group to analyze in their entirety. Yet a major influence on the safety, quality, and effectiveness of home health care will be the set of issues encompassed by the field of human factors research--the discipline of applying what is known about human capabilities and limitations to the design of products, processes, systems, and work environments. To address these challenges, the National Research Council began a multidisciplinary study to examine a diverse range of behavioral and human factors issues resulting from the increasing migration of medical devices, technologies, and care practices into the home. Its goal is to lay the groundwork for a thorough integration of human factors research with the design and implementation of home health care devices, technologies, and practices. On October 1 and 2, 2009, a group of human factors and other experts met to consider a diverse range of behavioral and human factors issues associated with the increasing migration of medical devices, technologies, and care practices into the

home. This book is a summary of that workshop, representing the culmination of the first phase of the study.
