Accounting Information Systems provides a comprehensive knowledgebase of the systems that generate, evaluate, summarize, and report accounting information. Balancing technical concepts and student comprehension, this textbook introduces only the most-necessary technology in a clear and accessible style. The text focuses on business processes and accounting and IT controls, and includes discussion of relevant aspects of ethics and corporate governance. Reliable real-world examples and abundant end-of-chapter resources reinforce Accounting Information Systems (AIS) concepts and their use in day-to-day operation. Now in its fourth edition, this popular textbook explains IT controls using the AICPA Trust Services Principles framework—a comprehensive yet easy-to-understand framework of IT controls—and allows for incorporating hands-on learning to complement theoretical concepts. A full set of pedagogical features enables students to easily comprehend the material, understand data flow diagrams and document flowcharts, discuss case studies and examples, and successfully answer end-of-chapter questions. The book's focus on ease of use, and its straightforward presentation of business processes and related controls, make it an ideal primary text for business or accounting students in AIS courses.

This report provides a detailed review of the tax treatment of philanthropic entities and philanthropic giving in 40 OECD member and participating countries. The report first examines the various arguments for and against the provision of preferential tax treatment for philanthropy. It then reviews the tax treatment of philanthropic entities and giving in the 40 participating countries, in both domestic and cross-border context. Drawing on this analysis, the report then highlights a range of potential tax policy options for countries to consider.

This innovative volume integrates social identity theory with research on teaching and education to shed new and fruitful light on a variety of different pedagogical concerns and practices. It brings together researchers at the cutting edge of new developments with a wealth of teaching and research experience. The work in this volume will have a significant impact in two main ways. First and foremost, the social identity approach that is applied will provide the theoretical and empirical platform for the development of new and creative forms of practice in educational settings. Just as the application of this theory has made significant contributions in organisational and health settings, a similar benefit will accrue for conceptual and practical developments related to learners and educators – from small learning groups to larger institutional settings – and in the development of professional identities that reach beyond the classroom. The chapters demonstrate the potential of applying social identity theory to education and will stimulate increased research activity and interest in this domain. By focusing on self, social identity and education, this volume investigates with unprecedented clarity the social and psychological processes by which learners' personal and social self-concepts shape and enhance learning and teaching. Self and Social Identity in Educational Contexts will appeal to advanced students and researchers in education, psychology and social identity theory. It will also be of immense value to educational leaders and practitioners, particularly at tertiary level.

Value Creation and Capture - Implications for Developing Countries

Governance and Auditing

The Institute of Internal Auditors' (IIA's) International Professional Practices Framework (IPPF) is the authoritative guidance on the internal audit profession. The IPPF presents current, relevant, internationally consistent information that is required by internal audit professionals worldwide. The new IPPF features improved clarity, increased transparency, measurable accountability, a defined cycle of review for all guidance, and availability in hard copy and as a fully interactive CD-ROM.

The Digital Economy Report 2019 on "Value creation and capture: Implications for developing countries" takes stock of recent trends in the global digital landscape and discusses the development and policy implications of data and digital platforms. A key feature of the evolving digital economy is the increasing role of digital data as an economic resource, together with digital platforms as new influential actors, with capacity to collect, process, analyze and monetize data. The report considers policy options for countries to help ensure that they capture a fair part of the value created in the digital economy for inclusive development. Key issues include the market impact of emerging technologies and digital platforms, the impact on smaller businesses in developing countries and the implications for infrastructure, entrepreneurship, skills, competition, data flows, data protection, taxation and other relevant policies.

This guide is designed to assist all those who are responsible for providing or overseeing formal education or practical experience that forms part of the initial professional development of aspiring professional accountants, or the continuing professional development of professional accountants. It is particularly relevant to professional accountancy organizations. It is also intended for policy makers and regulators who determine which organizations are licensed to certify professional accountants and related specializations, for example, audit professionals. The purpose of the guide is to • increase understanding of the gap between the current skills of many accountants in some regions and the skills that are relevant in increasingly digitized and globalized economies; • convey the essential features of Competency-Based Accounting Education, Training, and Certification (CBAETC); • provide a common reference framework for organizations pursuing CBAETC and the consultants working with them; • assist countries in developing in-country plans and implementing in-country processes that produce accountants with higher-order skills relevant to their economy's rapidly evolving needs; and • improve financial reporting, auditing, and regulation. This guide complements and builds on International Education Standards (IES®) of the International Accounting Education Standards Board™ (IAESB®).

'It can be seen from the foregoing that this book constitutes a wide-ranging selection of good quality and interesting papers on a topic area of ongoing concern. . . Peter Moizer's introduction is succinct, cogent and provides a compelling structure within which to consider the papers. A further particularly nice feature of the selection is, that by often including two papers in a specific area, the manner in which extensions of ideas and refinements in method are highlighted, and thus the reader is given a flavour of how papers in a given area have developed: one gains a sense of living literatures. . . readers are unlikely to be disappointed. . . this volume constitutes a nicely judged and good selection of papers in the area of governance and auditing that is a useful addition to the shelves of anyone with an interest in this area.' - Pelham Gore, European Accounting Review This authoritative new collection contains reprints of seminal articles on the subject of auditing and its relationship to the way in which outside stakeholders monitor the activities of corporate management. Whilst the primary audience is students in upper-level undergraduate and graduate accounting courses, the book should also be of use to existing researchers, as it collects together the 'must read' articles on the subject in a readily accessible form.

This open access book offers pioneering insights and practical methods for promoting diversity and inclusion in higher education classrooms and curricula. It highlights the growing importance of international education programs in Asia and the value of understanding student diversity in a changing, evermore interconnected world. The book explores diversity across physical, psychological and cognitive traits, socio-economic backgrounds, value systems, traditions and emerging identities, as well as diverse expectations around teaching, grading, and assessment. Chapters detail significant trends in active learning pedagogy, writing programs, language acquisition, and implications for teaching in the liberal arts, adult learners, girls and women, and Confucian heritage communities. A quality, relevant, 21st Century education should address multifaceted and intersecting forms of diversity to equip students for deep life-long learning inside and outside the classroom. This timely volume provides a unique toolkit for educators, policy-makers, and professional development experts.

About 50km outside of Cape Town lies the beautiful town of Stellenbosch, nestled against vineyards and blue mountains that stretch to the sky. Here reside some of South Africa's wealthiest individuals: all male, all Afrikaans – and all stinking rich. Johann Rupert, Jannie Mouton, Markus Jooste and Christo Weis, to name a few. Julius Malema refers to them scathingly as 'The Stellenbosch Mafia', the very worst example of white monopoly capital. But who really are these mega-wealthy individuals, and what influence do they exert not only on Stellenbosch but more broadly on South African society? Author Pieter du Toit begins by exploring the roots of Stellenbosch, one of the wealthiest towns in South Africa and arguably the cradle of Afrikanerdom. This is the birthplace of apartheid leaders, intellectuals, newspaper empires and more. He then closely examines this 'club' of billionaires. Who are they and, crucially, how are they connected? What network of boardroom membership, alliances and family connections exist? Who are the 'old guard' and who are the 'inkomers', and what about the youngsters desperate to make their mark? He looks at the collapse of Steinhoff: what went wrong, and whether there are other companies at risk of a similar fate. He examines the control these men have over cultural life, including pulling the strings in South African rugby.

International Professional Practices Framework (IPPF)

Education, Assessment, and the Desire for Dissonance aims to address the contentious practice of assessment in schools and universities within a poststructuralist educational paradigm. Within the theoretical paradigm of Foucault's (1994) notions of governmentality, subjectification and dissonance, the book examines why, through which and in which ways (how) educational assessment should unfold considering the challenges of globalized and cosmopolitan dimensions of educational change that have beset educational institutions. Waghid and Davids show how conceptual derivatives of Foucauldian governmentality, in particular the notions of power, panopticon and surveillance, dispositive, freedom and resistance—as relational concepts—affect assessment in universities and schools. The authors argue why universities and schools cannot be complacent or non-responsive to current understandings and practices of assessment. In the main, the authors contend that a Foucauldian notion of powerful, subjectified and dissonant assessment can, firstly, be extended to an Agambenian (2011) notion of a profane, denudified and rhythmic form of assessment; and secondly, be enhanced by a Derridian (1997) idea of friendship that bridges a Foucauldian view of governmental assessment with an Agambenian view of ethical assessment. Friendship allows people to act responsibly towards one another—that is, teachers and students acting responsibly towards one another—and resonates with an ongoing pursuit of rhythmic assessment practices. Such a form of assessment opens up an attentiveness to the incalculable and unexpected encounters that bear the responsibility of acting with one another. The authors conclude that an assessment with teaching and learning can transcend the limitations of an assessment of learning and an assessment for learning.

This publication provides an overview of major trends and challenges on regulatory and institutional developments at global, regional and national levels. It also discusses some of the major challenges such as a need to develop mechanisms to ensure consistent application of international standards and monitoring of compliance, with a higher demand for non-financial reporting and a greater pressure for stakeholder coordination at all levels. Case studies on financial reporting aspects include one on Romania and one on Turkey. Also included are four case studies on non-financial reporting aspects on Romania, corporate climate change-related reporting, Japan disclosure, and stock exchanges role in reporting developments. More case studies cover the human capacity aspect on the training of professional accountants and on professional accounting qualification systems. Integrate is an easy read guide for people in business about the new way of thinking in running a company today. Businesses, large and small, have the same issues to contend with: greater expectations of their stakeholders, rising consumer power in the digital information age, environmental constraints, economic uncertainty in the aftermath of the global financial crisis, and social uncertainty on rising income inequality. Doing business today is quite different from the past. Different corporate tools are needed. One of the four corporate tools for today's business is integrated thinking. This extends strategy and daily management beyond the pure financial to encompass the social and environmental factors that deeply affect a company's future viability in the 21st century. Integrated thinking leads to another tool – the integrated report. This tells the company's story of how it creates value and how it can create value in the future. The global financial crisis showed that a more understandable and holistic form of company reporting is crucially needed. This book offers practical guidance on integrated thinking and the integrated report.

2012 Review

Managing solid waste is one of the major challenges in urbanization. A survey conducted in all 58 municipalities of Nepal in 2012 found that the average municipal solid waste generation was 317 grams per capita per day. This translates into 1,435 tons per day or 524,000 tons per year of municipal solid waste generation in Nepal. Many of these technically and financially constrained municipalities are still practicing roadside waste pickup from open piles and open dumping, creating major health risks.

For courses in Experimental Methods and in Research Methods in Political Science and Sociology An informative and unmitigated look at the basics of research in the social and behavioral sciences Exploring Research makes research methods accessible for students - describing how to collect and analyze data, and providing thorough instruction on how to prepare and write a research proposal and manuscript. Author Neil Sakind covers the research process, problem selection, sampling and generalizability, and the measurement process. He also incorporates the most common types of research models used in the social and behavioral sciences, including qualitative methods. The Ninth Edition explores the use of electronic sources (the Internet) as a means to enhance research skills, includes discussions about scientific methods, and places a strong emphasis on ethics. NOTE: This ISBN is for a Pearson Books a la Carte edition: a convenient, hole-punch-bound, loose-leaf text. In addition to the flexibility offered by this format, Books a la Carte editions offer students great value, as they cost significantly less than a bound textbook.
