John Kretschmer is sailing's practical philosopher – as much a doer as a thinker. And that is the overarching theme of this chronicle of a sailing life. Often amusing, sometimes poignant, occasionally terrifying but always inspiring, his deeply personal account is a welcome reminder of the good life waiting at sea. With hundreds of thousands of nautical miles under his keel, John's adventures have taken him several times around the world, with challenging crossings of the Atlantic and the Pacific, a narrow escape from a coup in Yemen, an unlikely deliverance from a coral reef off Belize as well as more serene, introspective passages where trade winds are blowing and stories are flowing. His crew has included CEOs, actors, writers, teachers, kids – in essence, everyone. John's narrative is interwoven with practical tips and advice in seamanship, but also, and just as importantly, his hard-won insights about making the most of our lives. He truly believes we find out who we really are, and what we are capable of, far from the shackles of land, when we find a place where time changes shape – days may merge into one another, but minutes are memorable. To live adventurously is to live more fully, and that is the life John Kretschmer continues to live. In this book he shares his simple profundities that will inspire those who live to sail, and those seeking something more rewarding from life.

What Jesus began on and around the Sea of Galilee, Paul continued on and around the Mediterranean Sea. With Acts as the stage, the biblical narrative shifts from land to sea. Paul is the central actor in this part of the drama. Luke, the playwright, traveling with Paul on portions of his journeys, was deeply impressed by Paul's challenges and his creative engagement with both the pagans and the Jews living in the Roman Empire. In With Paul at Sea, Linford Stutzman, himself an accomplished sailor, relates key highlights of his personal experience of sailing Paul's voyages two thousand years later. Including examples of discoveries in the cities and harbors of Acts, combined with historical, archeological, and biblical evidence, Stutzman demonstrates the contribution and relevance of Paul for Christians in the twenty-first century. Portraying the modern world as a sea, the church as a ship, and a life of faith as sailing, With Paul at Sea is an invitation for today's Christians to travel with Paul.

A comprehensive examination of the effects of the shifting seasons on maritime trade, warfare and piracy during antiquity, this book overturns many long-held assumptions concerning the capabilities of Graeco-Roman ships and sailors.

Go Dinghy Sailing

A clear and authoritative handbook on sail trim—the art of setting sails in response to the varying conditions imposed by the wind, waves, boat speed and desired course.

Assuming no prior knowledge, this entry level guide aims to inspire novices of all ages to give sailing a try. Conveying the fun, accessibility and exhilaration of sailing, it covers everything the beginner needs to learn about, whether they are young, middle aged or taking up sailing as a family. Topics include: - How to get started - Where (and how) to find a club - Choosing the right type of boat - The differences between cruising and racing a dinghy - Learning to sail - Trolleying, trailing, launching and recovery - and much, much more Colour photographs illustrate each section. Also included is a DVD featuring the authors demonstrating what they've described in the book, which should inspire newcomers by showing them that they too can learn how to sail a dinghy even if they've never been on the water before.

An autonomous sailboat robot is a boat that only uses the wind on its sail as the propelling force, without remote control or human assistance to achieve its mission. Robotic sailing offers the potential of long range and long term autonomous wind propelled, solar or wave-powered carbon neutral devices. Robotic sailing devices could contribute to monitoring of environmental, ecological, meteorological, hydrographic and oceanographic data. These devices can also be used in traffic monitoring, border surveillance, security, assistance and rescue. The dependency on changing winds and sea conditions presents a considerable challenge for short and long term route and stability planning, collision avoidance and boat control.

Building a robust and seaworthy sailing robot presents a truly complex and multi-disciplinary challenge for boat designers, naval architects, systems/electrical engineers and computer scientists. Over the last decade, several events such as Sailbot, World Robotic Sailing Championship and the International Robotic Sailing Conference (WRSC/IRSC) and Microtransat

have sparked an explosion in the number of groups working on autonomous sailing robots. Many of the challenges in building truly autonomous sailing robots still remain unsolved. These proceedings present the work of researchers on current and future challenges in autonomous sailboat development, presented at the WRSC/IRSC 2014 in Galway, Ireland, 8th – 12th September 2014.

The official learn-to-sail manual of the American Sailing Association and the United States Coast Guard Auxiliary, with over 150 line drawings and photographs. Written by America's foremost instructional authority, the new edition of Sailing Fundamentals combines the training programs of the American Sailing Association and the United States Coast Guard Auxiliary. The official learn-to-sail manual of the American Sailing Association, it is also used in the programs of many yacht clubs, colleges, and sailing groups. Unlike most introductory sailing books, which reflect the biases and idiosyncrasies of their authors, Sailing Fundamentals has been extensively pretested by ASA professional instructors to ensure that it offers the fastest, easiest, most systematic way to learn basic sailing and basic coastal cruising. This book covers every aspect of beginning sailing—from hoisting sail to docking and anchoring—and specifically prepares the learner to qualify for sailing certification according to international standards. Widely acclaimed author Gary Jobson has won several major races, including the 1977 America's Cup victory as tactician aboard Courageous. He was head sailing coach at the US Naval Academy, and has conducted sailing clinics across the country.

‘God’s got a plan for your life’ is an aphorism frequently heard by Christians. But how do you discover that plan? The Spirit Said Go is designed to help believers find God’s will. Using Paul’s journeys in Acts as examples, Wilson discusses twenty lessons on guidance drawn from these journeys. Using his firsthand experience traveling along these routes in the Eastern Mediterranean, he reads between the lines offering additional insights into Luke’s account. He also provides important geographical and archaeological information to illustrate Paul’s world among the Jews, Greeks, and Romans. Wilson then illustrates each lesson with autobiographical vignettes drawn from his own spiritual pilgrimage of over forty years as a

follower of Jesus. Friends and colleagues also share stories of similar experiences of guidance. Each chapter ends with reflection questions that help the reader integrate the lesson into Christian living. The volume offers an inductive Bible study combined with practical, spiritual insights regarding how God guides his people then and now.

Throughout history sailing has been instrumental in the development of civilization, affording humanity greater mobility than travel over land, whether for trade, transport or warfare, and the capacity for fishing. Sailing has contributed to many great explorations in the world. In 1889, Knight sailed to the island of Trindade off the coast of Brazil in a 64-foot cutter named the Alerte. He was in search of treasure. In The Classic Guide to Sailing, E. F. Knight, the soldier, journalist and war correspondent, relates some of his experiences and lays down the basic principles of sailing and boatcraft for the budding sailor.

Why must a boat make leeway in order to sail to windward? How can a helmsman prevent downwind rolling? Why is a sail able to produce a force at right angles to the wind direction? These and many other important questions are addressed by the authors in this detailed study of the motive forces of a yacht.

For those who love sailing and you-are-there travel literature. Also for those who enjoy studying the life and times of the Apostle Paul. But definitely for those who love adventure, or at least reading about it! Seafaring isn't for the faint of heart. It wasn't for the Apostle Paul in the first century A.D.—shipwrecked, imprisoned, and often a stranger in foreign lands. And it turned out to be a heart-stopping task some two thousand years later, when a religion professor and his wife undertook a 14-month journey by sailboat! They stopped in eight countries, visiting every site where Paul stopped on his tumultuous missionary journeys. "Sailing Acts" traces this 21st-century voyage from Volos, Greece, to Rome, Italy, by car, by foot, by motorized scooter, but mostly on a 33-foot boat, logging more than 3600 nautical miles over two sailing seasons. "Explorers are easy to admire or despise, but very difficult to understand without going on the trip," writes Stutzman. "To really appreciate the experiences, the drama, and development of Paul the explorer, you need to sail with him." So begins Sailing Acts, inviting readers to come on board. Stutzman draws thoughtful comparisons from his own travel mishaps and adventures to the ones Paul experienced on his journeys. This book is in the tradition of Bruce Feiler's Walking the Bible. Stutzman's knowledge of the socio-political

setting in the first-century Roman empire provides an informative backdrop to understanding Paul and reading his epistles in a new light. The book includes dozens of photos, maps showing the couple's travel routes, a list of all the repairs and replacements Stutzman made to the aging boat which he bought sight-unseen, and an itinerary of places they visited. Skyhorse Publishing, as well as our Sports Publishing imprint, is proud to publish a broad range of books for readers interested in sports—books about baseball, pro football, college football, pro and college basketball, hockey, or soccer, we have a book about your sport or your team.
