

Sample Nursing Sbar Postpartum Report

Interprofessional teamwork and collaborative practice are emerging as key elements of efficient and productive work in promoting health and treating patients. The vision for these collaborations is one where different health and/or social professionals share a team identity and work closely together to solve problems and improve delivery of care. Although the value of interprofessional education (IPE) has been embraced around the world - particularly for its impact on learning - many in leadership positions have questioned how IPE affects patient, population, and health system outcomes. This question cannot be fully answered without well-designed studies, and these studies cannot be conducted without an understanding of the methods and measurements needed to conduct such an analysis. This Institute of Medicine report examines ways to measure the impacts of IPE on collaborative practice and health and system outcomes. According to this report, it is possible to link the learning process with downstream person or population directed outcomes through thoughtful, well-designed studies of the association between IPE and collaborative behavior. Measuring the Impact of Interprofessional Education on Collaborative Practice and Patient Outcomes describes the research needed to strengthen the evidence base for IPE outcomes. Additionally, this report presents a conceptual model for evaluating IPE that could be adapted to particular settings in which it is applied. Measuring the Impact of Interprofessional Education on Collaborative Practice and Patient Outcomes addresses the current lack of broadly applicable measures of collaborative behavior and makes recommendations for resource commitments from interprofessional stakeholders, funders, and policy makers to advance the study of IPE.

The new edition of Nursing Care Planning Made Incredibly Easy is the resource every student needs to master the art of care planning, including concept mapping. Starting with a review of the nursing process, this comprehensive resource provides the foundations needed to write practical, effective care plans for patients. It takes a step-by-step approach to the care planning process and builds the critical thinking skills needed to individualize care in the clinical setting. Special tips and information sections included throughout the book help students incorporate evidence-based standards and rationales into their nursing interventions.

Designated a Doody's Core Title and Essential Purchase! "Without question, this book should be on every nurse educator's bookshelf, or at least available through the library or nursing program office. Certainly, all graduate students studying to be nurse educators should have a copy." --Nursing Education Perspectives "This [third edition] is an invaluable resource for theoretical and practical application of evaluation and testing of clinical nursing students. Graduate students and veteran nurses preparing for their roles as nurse educators will want to add this book to their library." Score: 93, 4 stars --Doody's "This 3rd edition. . . has again given us philosophical, theoretical and social/ethical frameworks for understanding assessment and measurement, as well as fundamental knowledge to develop evaluation tools for individual students and academic programs." -Nancy F. Langston, PhD, RN, FAAN Dean and Professor Virginia Commonwealth University School of Nursing All teachers need to assess learning. But often, teachers are not well prepared to carry out the tasks related to evaluation and testing. This third edition of Evaluation and Testing in Nursing Education serves as an authoritative resource for teachers in nursing education programs and health care agencies. Graduate students preparing for their roles as nurse educators will also want to add this book to their collection. As an inspiring, award-winning title, this book presents a comprehensive list of all the tools required to measure students' classroom and clinical performance. The newly revised edition sets forth expanded coverage on essential concepts of evaluation, measurement, and testing in nursing education; quality standards of effective measurement instruments; how to write all types of test items and establish clinical performance parameters and benchmarks; and how to evaluate critical thinking in written assignments and clinical performance. Special features: The steps involved in test construction, with guidelines on how to develop test length, test difficulty, item formats, and scoring procedures Guidelines for assembling and administering a test, including design rules and suggestions for reproducing the test Strategies for writing multiple-choice and multiple-response items How to develop test items that prepare students for licensure and certification examinations Like its popular predecessors, this text offers a seamless blending of theoretical and practical insight on evaluation and testing in nursing education, thus serving as an invaluable resource for both educators and students.

Clinical Case Studies for the Family Nurse Practitioner is a key resource for advanced practice nurses and graduate students seeking to test their skills in assessing, diagnosing, and managing cases in family and primary care. Composed of more than 70 cases ranging from common to unique, the book compiles years of experience from experts in the field. It is organized chronologically, presenting cases from neonatal to geriatric care in a standard approach built on the SOAP format. This includes differential diagnosis and a series of critical thinking questions ideal for self-assessment or classroom use.

This public inquiry report into serious failings in healthcare that took place at the Mid Staffordshire NHS Foundation Trust builds on the first independent report published in February 2010 (ISBN 9780102964394). It further examines the suffering of patients caused by failures by the Trust: there was a failure to listen to its patients and staff or ensure correction of deficiencies. There was also a failure to tackle the insidious negative culture involving poor standards and a disengagement from managerial and leadership responsibilities. These failures are in part a consequence of allowing a focus on reaching national access targets, achieving financial balance and seeking foundation trust status at the cost of delivering acceptable care standards. Further, the checks and balances that operate within the NHS system should have prevented the serious systemic failure that developed at Mid Staffs. The system failed in its primary duty to protect patients and maintain confidence in the healthcare system. This report identifies numerous warning signs that could and should have alerted the system to problems developing at the Trust. It also sets out 290 recommendations grouped around: (i) putting the patient first; (ii) developing a set of fundamental standards, easily understood and accepted by patients; (iii) providing professionally endorsed and evidence-based means of compliance of standards that are understood and adopted by staff; (iv) ensuring openness, transparency and candour throughout system; (v) policing of these standards by the healthcare regulator; (vi) making all those who provide care for patients, properly accountable; (vii) enhancing recruitment, education, training and support of all key contributors to the provision of healthcare; (viii) developing and sharing ever improving means of measuring and understanding the performance of individual professionals, teams, units and provider organisations for the patients, the public, and other stakeholders.

The 10th edition of the Nursing Diagnosis Handbook makes formulating nursing diagnoses and creating individualized care plans a breeze. Updated with the most recent NANDA-I approved nursing diagnoses, this convenient reference shows you how to build customized care plans in three easy steps: assess, diagnose, plan. Authors Elizabeth Ackley and Gail Ladwig use Nursing Outcomes Classification (NOC) and Nursing Interventions Classification (NIC) to guide you in creating care plans that include desired outcomes, interventions, patient teaching, and evidence-based rationales. Unique! Care Plan Constructor on the companion Evolve website offers hands-on practice creating customized plans of care. Alphabetical thumb tabs allow quick access to specific symptoms and nursing diagnoses. Suggested NIC interventions and NOC outcomes in each care plan. Recent and classic research examples promote evidence-based interventions and rationales. NEW! 4 Color text NEW! Includes updated 2012-2014 NANDA-I approved nursing diagnoses NEW! Provides the latest NIC/NOC, interventions, and rationales for every care plan. NEW! QSEN Safety interventions and rationales NEW! 100 NCLEX exam-style review questions are available on the companion Evolve website. NEW! Root Causing Thinking and Motivational Interviewing appendixes on the companion Evolve website.

Maternity Nursing Care (Book Only)

Saving Lives, Improving Mothers' Care

"Where was this book when I was a new nurse just learning the ropes of labor and delivery? This is a true gem of a book-a must for any new grad going into labor and delivery! I recommend this book for every labor and delivery floor." Cindy Curtis, RNC, IBCLC Family Birth Center Culpeper Regional Hospital Lignum, VA "The best one stop reference book for the experienced and novice Labor and Delivery RN...Finally an excellent Labor and Delivery book by RN's -- for RN's." Garla DeWall, RNC Presbyterian Hospital in Albuquerque, New Mexico Labor and delivery nursing requires critical thinking, constant caring, teamwork, and communication. As the first line of defense to prevent injury, labor and delivery nurses take on some of the most difficult and trying challenges in healthcare. Huelsmann present this clinically oriented guide to help labor and delivery nurses make wise decisions in the delivery room. The authors provide a wealth of insight on how to maximize both maternal and fetal outcomes. This book provides authoritative guidance of patient-centered plans of care, and improved communication with other members of the obstetrics team. Special Features: Explains the stages and phases of delivery, pain management, patient assessment, and much more Features references, relevant guidelines, and questions at the end of each section Useful for RNs new to the field, seasoned practitioners looking for updated methods and data, and nurses preparing for certification and licensure With this book, nurses will gain the confidence and competence to approach labor and delivery care and efficiency.

This novel resource for course content review of pediatric nursing and NCLEX-RN preparation features a potent learning technique, the use of unfolding case studies to enhance critical thinking skills and enable students to think like a practicing nurse. Covering concepts of caring for children and families, this format embeds required content into compelling, real-life scenarios that evolve over time. These unfolding case studies are of particular value because they closely mimic real-life situations in nursing and provide an opportunity to assist students with problem-solving and critical thinking techniques. All content areas required for NCLEX-RN success are interwoven in an enjoyable format that dispels the drudgery of straightforward memorization. A variety of NCLEX-style questions are included to familiarize students with the exam format and to help them assess their own learning. The book includes engaging eResources for enriched learning experiences. It will also be of value to faculty as a make-up guide for students who miss clinical hours, and to students who are standardized patients or role-play situations. Key Features: Uses unique unfolding case study method that embeds basic and advanced pediatric nursing care concepts Promotes active learning and knowledge retention Helps to foster problem-solving and critical thinking skills Includes NCLEX-style questions for exam preparation Includes eResources throughout for enhanced learning opportunities

Clinical Case Studies for the Family Nurse Practitioner John Wiley & Sons

The #1 maternity book in the market is getting even better. Maternity and Women's Health Care, 11th Edition provides evidence-based coverage of everything you need to know about caring for women of childbearing age. Not only does this text emphasize the importance of maternity care, it also addresses wellness promotion and management of women's health problems. In describing the continuum of care, it integrates the importance of understanding family, culture, and community-based care. Boasting new medication alerts and updated information on the new maternal levels of care, and the revised AAP policy on breastfeeding and infant sleep. Expert authors of the market-leading maternity nursing textbook deliver the most accurate, up-to-date content. Clinical reasoning case studies provide you with critical analytical skills and to apply knowledge in various settings. Community Activity boxes focus on maternal and newborn activities that can be pursued in local community settings and illustrate nursing care in a variety of settings. Cultural Considerations boxes explore the beliefs and health practices of patients from various cultures when providing care. Emergency boxes provide information about various emergency situations and offer a quick reference in critical situations. Family-Centered Care boxes highlight the needs and preferences of patients and families to consider to provide family-centered care. Medication guides provide an important reference of drugs and their interactions. Nursing care plans include rationales for interventions and provide you with an overview of, and specific guidelines for, delivering effective care. Highlighted and integrated within the content draw attention to developing competencies related to safe nursing practice. Signs of potential complications highlight vital concerns, alerting you to signs and symptoms of complications and the immediate interventions. Management boxes highlight important information that nurses need to communicate to patients and families for follow-up care.

Passing the HESI Admission Assessment Exam is the first step on the journey to becoming a successful healthcare professional. Be prepared to pass the exam with the most up-to-date HESI Admission Assessment Exam Review, 5th Edition! From the testing experts at HESI, this user-friendly guide walks you through the topics and question types found on admission exams, including: math, reading comprehension, vocabulary, grammar, biology, chemistry, anatomy and physiology, and physics. The guide includes hundreds of sample questions as well as step-by-step explanations, illustrations, and comprehensive practice exams to help you review various subject areas and improve test-taking skills. Plus, the pre-test and post-test help identify your specific weak areas so study time can be focused where it's needed most. HESI Hints boxes offer valuable test-taking tips, as well as rationales, suggestions, examples, and reminders for specific topics. Step-by-step explanations and sample problems in the math section show you how to work through each and know how to answer. Sample questions in all sections prepare you for the questions you will find on the A2 Exam. A 25-question pre-test at the beginning of the text helps assess your areas of strength and weakness before using the text. A 50-question comprehensive post-test at the back of the text includes rationales for correct and incorrect answers. Easy-to-read format with consistent section features (introduction, key terms, chapter outline, and a bulleted summary) help you organize your review time and understand the information. NEW! Updated, thoroughly reviewed content helps you prepare to pass the HESI Admission Assessment Exam. NEW! Comprehensive practice exams with over 200 questions on the Evolve companion site help you become familiar with the types of test questions.

With comprehensive coverage of maternal, newborn, and women's health nursing, Maternity & Women's Health Care, 10th Edition provides evidence-based coverage of everything you need to know about caring for women of childbearing age. It's the #1 maternity book in the market -- and now respected authors Dr. Deitra Leonard Lowdermilk, Dr. Shannon E. Perry, Kitty Cashion, and Kathryn R. Alden have improved readability and provided a more focused approach! Not only does this text emphasize childbearing issues and concerns, including care of the newborn, it addresses wellness promotion and management of common women's health problems. In describing the continuum of care, it integrates the importance of understanding family, culture, and community-based care. New to this edition is the most current information on care of the late preterm infant and the 2008 updated fetal monitoring standards from the National Institute of Child Health and Human Development. A logical organization builds understanding by presenting wellness content first, then complications. Critical Reasoning exercises offer real-life situations in which you can develop analytical skills and apply their knowledge. Teaching for Self-Management boxes offer a guide to communicating follow-up care to patients and their families. Signs of Potential Complications boxes help you recognize the signs and symptoms of complications and provide immediate interventions. Procedure boxes offer easy-to-use, step-by-step instructions for maternity skills and procedures. Emergency boxes may be used for quick reference in critical situations. Medication Guide boxes provide an important reference for common drugs and their interactions. Cultural Considerations boxes stress the importance of considering the beliefs and health practices of patients from various cultures when providing care. Family content emphasizes the importance of including family in the continuum of care. Nursing Care Plans include specific guidelines and rationales for interventions for delivering effective nursing care. Community Activity exercises introduce activities and nursing care in a variety of local settings. Student resources on the companion Evolve website include assessment and childbirth videos, animations, case studies, critical thinking exercises with answers, nursing skills, anatomy reviews, a care plan constructor, review questions, an audio glossary, and more.

Guide to Evidence-Based Practice

When you understand the whys of each step the nursing process, it's easier easy to understand how to apply them in the real world in which you will practice. Take an interactive, step-by-step approach to developing the diagnostic reasoning and problem-solving skills you need to think like a nurse with the resources you'll find in this unique workbook style text.

SBAR Basics: A Guide for Healthcare Managers Susan Hendrickson Is effective communication of vital information a challenge at your healthcare facility? We can help. Start with the basics! "SBAR Basics: A Resource Guide for Healthcare Managers" provides examples of what to do--and what not to do--to ensure SBAR (Situation, Background, Assessment, and Recommendation) works. Tips for getting buy-in at many levels and a variety of customizable tools are offered in addition to the basic, easy-to-understand information to provide you with everything you need to implement and ensure the success of your SBAR system! SBAR is a proven system to standardize the communication of critical information. Regulatory agencies are heightening their attention to patient safety, and poor communication remains one of the most-cited reasons for medication errors as well as delays in care. "SBAR Basics: A Resource Guide for Healthcare Managers" is the perfect resource to help you meet The Joint Commission's standards and create a culture of safety. Communicate critical information and save patient lives. This valuable resource offers: A non-intimidating, primer approach Clear explanations of what SBAR can and cannot do Proven benefits to your facility An easy-to-follow guide to the SBAR process Useful diagrams, tips, and strategies Helpful activities to gain buy-in throughout your facility A list of additional resources And much more!

The delivery of high quality and equitable care for both mothers and newborns is complex and requires efforts across many sectors. The United States spends more on childbirth than any other country in the world, yet outcomes are worse than other high-resource countries, and even worse for Black and Native American women. There are a variety of factors that influence childbirth, including social determinants such as income, educational levels, access to care, financing, transportation, structural racism and geographic variability in birth settings. It is important to reevaluate the United States' approach to maternal and newborn care through the lens of these factors across multiple disciplines. Birth Settings in America: Outcomes, Quality, Access, and Choice reviews and evaluates maternal and newborn care in the United States, the epidemiology of social and clinical risks in pregnancy and childbirth, birth settings research, and access to and choice of birth settings.

Developed by WHO and the International Committee of the Red Cross in collaboration with the International Federation for Emergency Medicine Basic Emergency Care (BEC): Approach to the acutely ill and injured is an open-access training course for frontline healthcare providers who manage acute illness and injury with limited resources. BEC teaches a systematic approach to the initial assessment and management of time-sensitive conditions where early intervention saves lives. It includes modules on: the ABCDE and SAMPLE history approach trauma difficulty in breathing shock and altered mental status. The practical skills section covers the essential time-sensitive interventions for these key acute presentations. The BEC package includes a Participant Workbook and electronic slide decks for each module. BEC integrates the guidance from WHO Emergency Triage Assessment and Treatment (ETAT) for children WHO Pocket Book of Hospital Care for Children WHO Integrated Management of Pregnancy and Childbirth and the Integrated Management of Adult/Adolescent Illness (IMAI).

Fast Facts for the L&D Nurse, Second Edition

Named a 2013 Doody's Core Title! 2012 Second Place AJN Book of the Year Award Winner in Maternal and Child Health! This up-to-date handbook of narrative practice guidelines for use in obstetric triage and emergency settings provides speedy access to critical information needed by healthcare providers in obstetrics, midwifery, emergency medicine, and family care medicine. It includes narrative practice protocols that offer point of service management guidelines, diagnostic parameters, ultrasound imaging and other diagnostic modalities, and easy to follow algorithms and tables in each chapter. This information will enable practitioners to easily recognize and understand symptomatology, lab results, diagnostic imaging and clinical workings. Chapters address over 30 clinical conditions and are consistently organized to include presenting symptomatology, history and data collection, physical exam findings, lab and imaging studies, differential diagnosis and clinical management and follow up. The book disseminates the contributions of expert midwives, nurse practitioners, obstetricians, gynecologists, and radiologists who evaluate more than 30,000 obstetric visits each year. Key Features: Pocket-sized and easy-to-use Includes current guidelines for more than 30 clinical situations requiring obstetric triage or emergency care Offers plentiful diagnostic and imaging guidelines with accompanying figures and images Presents algorithms, diagnostic images, and best evidence for each condition

The rapidly growing developments in medicine and science in the last few decades has evoked a greater need for modern institutions, with modern medicine, advanced technologies, and cutting edge research. Today, the modern hospital is a highly competitive, multibillion dollar industry that plays a large role in our healthcare systems. Far different from older institutions, modern hospitals juggle the dynamics of running a business that proves financially fruitful and sustainable, with maintaining and staying ahead of medical developments and offering the best possible patient care. This comprehensive book explores all aspects of the inner workings of a modern hospital, from research and technology driven treatment and patient centered care, to the organizational, functional, architectural, and ergonomic aspects of the business. The text is organized into three parts. The first part covers a number of important aspects of the modern hospital including hospital transformation over the centuries, the new medical world order, overall concept, academic mission and economics of new healthcare. Additionally, experts in the field address issues such as modern design functionally and creating an environment

that is ergonomically friendly, technologically advanced, and easy to navigate for both worker and patient. Other topics covered include, the role of genomics and nano-technologies, controversies that come with introducing new technologies, the world-wide pharmaceutical industry, electronic medical health records, informatics, and quality of patient care. Part II addresses nine specific elements of modernization of the hospital that deal with high acuity, life and death situations, and complex medical and surgical diseases. These chapters cover the organization of new emergency departments, trauma room, hybrid operating rooms, intensive care units, radiology, pharmaceutical and nutritional support, and most essential, patient and public relation services. These nine elements reflect the most important and most visible indicators of modernization and transformation of the hospital. Part III examines and highlights the team approach as a crucial component of the transformation, as well as specific perspectives on the modern hospital from nurses, physicians, surgeons and administrators. Finally, a chapter dedicated to patient perspective is also presented. The Modern Hospital provides an all-inclusive review of the hospital industry. It will serve as a valuable resource for administrators, clinicians, surgeons, nurses, and researchers. All chapters will be written by practicing experts in their fields and include the most up-to-date scientific and clinical information.

Praise for the First Edition: "Where was this book when I was a new nurse just learning the ropes of labor and delivery? This is a true gem of a book—a must for any new grad going into labor and delivery. I recommend this book for every labor and delivery floor." -Cindy Curtis, RNC, IBCLC, CCE Former Director, The Family Birth Center Culpeper Regional Hospital Lignum, VA "The best one-stop reference book for the experienced and novice Labor and Delivery RN....Finally an excellent Labor and Delivery book by RN's -- for RN's." -Garla DeWall, RNC Presbyterian Hospital in the Family Birthing Center Albuquerque, New Mexico *The clinically oriented guide to nursing care during childbirth is distinguished by its strong focus on evidence-based practice as well as its engaging style and user-friendly format. It reviews the nursing process from admission to delivery focusing on proper surveillance and care, comprehensive data acquisition, interpretation, and teamwork. The second edition continues to help labor and delivery nurses make wise decisions in the delivery room, optimizing both maternal and fetal outcomes. It clearly explains the stages and phases of labor, delivery, and pain assessment and management—all supported by proven research. This text provides authoritative guidance on intervention options, creating patient-centered care plans, and improving communication with other members of the obstetrics team. New to the Second Edition: Proper analysis of the partograph to facilitate appropriate patient interventions Updated information about clinical pelvimetry New information on psyche, including the religious, spiritual, and cultural dimensions of care Setting priorities in triage and care related to postpartum hemorrhage Identification of “myths” related to childbirth Individualized patient care related to fetal distress and nonreassuring fetal status Oxytocin infusion and its relationship to permanent Erb’s palsy and autism Updated information on technology, including connectivity between smart IV pumps and the EMR How to distinguish functional from mechanical dystocia and intervene to enhance fetal and maternal safety Key Features: Applies to nursing care of childbearing clients world-wide Focuses on evidence-based practices Written in engaging, easy-to-understand style for new nurses, seasoned practitioners, and nurses seeking certification Enhances effective decision-making to optimize patient care and outcomes Replete with informative references, relevant graphics, and review questions Incorporates research to clearly explain concepts and best practices Provides orientation fundamentals, checklists, and log charts Nurses who are new to the labor and delivery (L&D) environment will welcome this newly updated, succinct, easy-to-use orientation guide for everyday labor and birth management practices. It is designed for speedy access to fundamental information about the most common L&D procedures and encourages the development of independence and confidence for new RNs orienting to this practice environment. The second edition has been revised to include new and updated practice guidelines for cesarean delivery, episiotomy, labor pain management, postpartum hemorrhage, preterm labor and birth, shoulder dystocia, umbilical cord blood storage, vaginal delivery, and breastfeeding. A completely new entry addresses meconium aspiration syndrome and two new appendices feature quick-reference charts and tables and an alphabetical synopsis of pertinent drug-related information. New illustrations depict and facilitate understanding of effacement and dilation of cervix, breech presentation and delivery, umbilical cord prolapse, placental abruption, and other topics. Designed to fit in a pocket, the resource provides clear, step-by-step descriptions of commonly occurring practices and procedures in bulleted format. It covers L&D terminology, equipment, labs, medications, complications, and algorithms to help foster critical thinking and establish a concrete knowledge base. The book highlights potential OB complications and is full of examples and pearls of wisdom concerning the handling of emergencies and unexpected outcomes. New to the Second Edition: A completely new entry on meconium, with information on meconium aspiration syndrome New quick-reference charts and tables (Apgar score, Bishop score, drug tables, and more) New illustrations for labor and delivery protocol Key Features: Provides speedy access to fundamental L&D information Presents succinct, step-by-step descriptions of commonly occurring procedures*

Labor and Delivery Nursing

Nursing Care Planning Made Incredibly Easy!

Clinical reference that takes an evidence-based approach to the physical examination. Updated to reflect the latest advances in the science of physical examination, and expanded to include many new topics.

Psychosocial and holistic approaches to assessment have become a central feature of modern mental health care. This practical and comprehensive book guides students through the theory and practice of psychosocial assessments to help them integrate the data as preparation for the effective planning of treatment and interventions. Key features: step-by-step guide on how to undertake each stage of the assessment process in practice clinical staff and service users voices describing their experiences of the process end of chapter exercises reflections and considerations for practice This is essential reading for pre-registration nursing students and mental health professionals.

Developed through theoretical thinking and tested by nurse education researchers, the NLN Jeffries Simulation Theory helps to articulate phenomena that exist within clinical simulation. By establishing and communicating known relationships within these phenomena, this theory provides a strong foundation for research and education, and enables future discovery of best practices in simulation. Through rigorous research and literature review, and by incorporating the perspectives of nurses immersed in simulation activities, The NLN Jeffries Simulation Theory is an effective guide to implementation and further research.

Nursing is an evolving profession that requires continued knowledge updates in formulating a foundation for practice. In order to promote patient safety and satisfaction, it is imperative that nurses monitor publications and increase their knowledge base. Each patient is different; each care management situation requires an individualized plan of care. These require the nurse to develop a personal framework for practice that continually develops from this information. This mandates an evolving knowledge base which this edition will supply for nurses who work to deliver care that is research based and protocol driven. This issue of Nursing Clinics will be both timely and relevant as it will combine two clearly important topics for nurses in care management, pathophysiological updates as well as research based protocols that are important to continuity of validated evidence based care delivery. This will give nurses across organizations the opportunity to see care from a perspective of patient wholeness and not truncate care in order to address total components. With care reimbursement dependent on outcomes, it is important for the nurse to see care as a continuum and not finite. This issue will give nurses this perspective.

Labour Midwifery Skills

A Guide to Evidence-Based Practice

Survival Guide

Use this convenient resource to formulate nursing diagnoses and create individualized care plans! Updated with the most recent NANDA-I approved nursing diagnoses, Nursing Diagnosis Handbook: An Evidence-Based Guide to Planning Care, 9th Edition shows you how to build customized care plans using a three-step process: assess, diagnose, and plan care. It includes suggested nursing diagnoses for over 1,300 client symptoms, medical and psychiatric diagnoses, diagnostic procedures, surgical interventions, and clinical states. Authors Elizabeth Ackley and Gail Ladwig use Nursing Outcomes Classification (NOC) and Nursing Interventions Classification (NIC) information to guide you in creating care plans that include desired outcomes, interventions, patient teaching, and evidence-based rationales. Promotes evidence-based interventions and rationales by including recent or classic research that supports the use of each intervention. Unique! Provides care plans for every NANDA-I approved nursing diagnosis. Includes step-by-step instructions on how to use the Guide to Nursing Diagnoses and Guide to Planning Care sections to create a unique, individualized plan of care. Includes pediatric, geriatric, multicultural, and home care interventions as necessary for plans of care. Includes examples of and suggested NIC interventions and NOC outcomes in each care plan. Allows quick access to specific symptoms and nursing diagnoses with alphabetical thumb tabs.

Unique! Includes a Care Plan Constructor on the companion Evolve website for hands-on practice in creating customized plans of care. Includes the new 2009-2011 NANDA-I approved nursing diagnoses including 21 new and 8 revised diagnoses.

Illustrates the Problem-Etiology-Symptom format with an easy-to-follow, colored-coded box to help you in formulating diagnostic statements. Explains the difference between the three types of nursing diagnoses. Expands information explaining the difference between actual and potential problems in performing an assessment. Adds detailed information on the multidisciplinary and collaborative aspect of nursing and how it affects care planning. Shows how care planning is used in everyday nursing practice to provide effective nursing care.

Featuring the most accurate, current, and clinically relevant information available, Maternal Child Nursing Care in Canada, 2nd Edition, combines essential maternity and pediatric nursing information in one text. The promotion of wellness and the care for women experiencing common health concerns throughout the lifespan, care in childbearing, as well as the health care of children and child development in the context of the family. Health problems including physiological dysfunctions and children with special needs and illnesses are also featured. This text provides a family-centred care approach that recognizes the importance of collaboration with families when providing care. Atraumatic Care boxes in the pediatric unit teach you how to provide competent and effective care to pediatric patients with the least amount of physical or psychological stress. Nursing Alerts point students to critical information that must be considered in providing care. Community Focus boxes emphasize community issues, supply resources and guidance, and illustrate nursing care in a variety of settings. Critical thinking case studies offer opportunities to test and develop analytical skills and apply knowledge in various settings. Emergency boxes guide you through step-by-step emergency procedures. Family-Centred Teaching boxes highlight the needs or concerns of families that you should consider to provide family-centred care. NEW! Content updates throughout the text give you the latest information on topics such as perinatal standards, mental health issues during pregnancy, developmental and neurological issues in pediatrics, new guidelines including SOGC, and CAPWHN, NEW! Increased coverage on health care in the LGBTQ community and First Nations, Metis, and Inuit population NEW! Medication Alerts stress medication safety concerns for better therapeutic management. NEW! Safety Alerts highlighted and integrated within the content draw attention to developing competencies related to safe nursing practice.

Based on detailed multi-disciplinary analyses of more than 800 recorded handover interactions, audits of written handover documentation, interviews and survey responses, the contributing authors identify features of effective and ineffective clinical handovers in diverse hospital contexts. The authors then translate their descriptive findings into practical protocols, communication strategies and checklists that clinicians, managers and policy makers can apply to improve the safety and quality of clinical handovers. All the contributors are affiliated with the International Research Centre for Communication in Healthcare (IRCCH), an international multidisciplinary organisation of over 90 healthcare professionals from more than 17 countries committed to improving improving communication in healthcare systems around the world. The authors have created a new and tightly woven systems safety net that will, if implemented, significantly reduce the occurrence of errors resulting from cumulative communication failures.' -H. Esterbrook Longmaid III, MD, FACR, President of Medical Staff, Beth Israel Deaconess-Milton Hospital, Milton, MA USA 'Uncommonly valuable for the rigorous, original communication research it reports and for the careful translation of the research findings into practical strategies that actually improve clinical handovers in the real world of practice.' -Professor Suzanne Kurtz, Washington State University 'This clear, plain English book is an outstanding resource for the training of all involved in healthcare.' -Elizabeth Trickett, (Former) Director of Safety and Quality, ACT Health, Australia

This pocket-sized book, presented in an easy-to-follow format, is designed as a tool for students and professionals to carry in any setting, providing a quick reference guide to supporting women during labour. Used as a platform for wider reading,

this text is an ideal reference point for any student or professional involved with the care of childbearing women.

AWHONN's Perinatal Nursing

Nursing Concept Care Maps for Providing Safe Patient Care

Covering the full range of nursing interventions, Nursing Interventions Classification (NIC), 6th Edition provides a research-based clinical tool to help in selecting appropriate interventions. It standardizes and defines the knowledge base for nursing practice while effectively communicating the nature of nursing. More than 550 nursing interventions are provided – including 23 NEW labels. As the only comprehensive taxonomy of nursing-sensitive interventions available, this book is ideal for practicing nurses, nursing students, nursing administrators, and faculty seeking to enhance nursing curricula and improve nursing care. More than 550 research-based nursing intervention labels with nearly 13,000 specific activities Definition, list of activities, publication facts line, and background readings provided for each intervention. NIC Interventions Linked to 2012–2014 NANDA–I Diagnoses promotes clinical decision-making. New! Two-color design provides easy readability. 554 research-based nursing intervention labels with nearly 13,000 specific activities. NEW! 23 additional interventions include: Central Venous Access Device Management, Commendation, Healing Touch, Dementia Management: Wandering, Life Skills Enhancement, Diet Staging: Weight Loss Surgery, Stem Cell Infusion and many more. NEW! 133 revised interventions are provided for 49 specialties, including five new specialty care interventions. NEW! Updated list of estimated time and educational level has been expanded to cover every intervention included in the text.

An official publication of the Association of Women’s Health, Obstetric and Neonatal Nurses (AWHONN), Perinatal Nursing, Fourth Edition presents up-to-date information based on the most rigorous evidence and offers suggestions for best practices. This new edition of the authoritative, comprehensive text used by perinatal nurses worldwide features a wealth of new content to keep practice current. New chapters related to patient safety and the development of a highly reliable perinatal unit, inform nurses how to conduct team training and drills for obstetric emergencies, create checklists, and effectively handoff patients. It features expanded coverage of high-risk pregnancy, from bleeding in pregnancy to preterm labor and birth, diabetes, cardiac disease, pulmonary complications, multiple gestation, and maternal-fetal transport. An all-new chapter on obesity in pregnancy covers risks to the mother and fetus, care from preconception to postpartum, as well as bariatric surgery. An expanded chapter on newborn nutrition includes new sections on the infant feeding decision, benefits of breastfeeding, nutritional components, and preterm milk and lactation.

Written by the foremost experts in maternity and pediatric nursing, Maternal Child Nursing Care, 5th Edition offers the accurate, practical information you need to succeed in the classroom, the clinical setting, and on the NCLEX® examination. This new edition offers numerous content updates throughout the text to keep you up-to-date on the latest topics and best practices. Plus hundreds of illustrations, alert boxes, and tables clarify key content and help you quickly find essential information. Atraumatic Care boxes in the pediatric unit teach you how to provide competent and effective care to pediatric patients with the least amount of physical or psychological stress. Community Focus boxes emphasize community issues, supply resources and guidance, and illustrate nursing care in a variety of settings. Critical thinking case studies offer opportunities to test and develop your analytical skills and apply knowledge in various settings. Emergency boxes in the maternity unit guide you through step-by-step emergency procedures. Expert authors of the market-leading maternity and pediatric nursing textbooks combine to ensure delivery of the most accurate, up-to-date content. Family-Centered Care boxes highlight the needs or concerns of families that you should consider to provide family-centered care. NEW! Content updates throughout the text give you the latest information on topics such as the late preterm infant, fetal heart rate pattern identification, obesity in the pregnant woman, shaken baby syndrome/traumatic brain injury, Healthy People 2020, car restraints, immunizations, and childhood obesity. NEW! Updated Evidence-Based Practice boxes including QSEN KSAs (knowledge, skills, attitudes) provide the most current practice guidelines to promote quality care. NEW! Medication Alerts stress medication safety concerns for better therapeutic management. NEW! Safety Alerts highlighted and integrated within the content draw attention to developing competencies related to safe nursing practice.

Addresses the challenges of managing critically ill obstetric patients, with chapters authored by intensivists/anesthesiologists and obstetricians/maternal-fetal medicine specialists.

Master care planning with concept maps! A concept map is an easy-to-construct, visual tool that helps you organize your assessment data, identify patient problems, determine the appropriate nursing diagnoses and interventions, and assess the outcomes. Nursing Concept Care Maps for Providing Safe Patient Care presents 200 sample care maps covering the diseases and disorders you'll encounter most often in clinical practice. They'll also help you develop the critical-thinking skills you need to plan safe and effective nursing care. You'll immediately see the relationship between the patient's problem, the underlying condition and your clinical response. You'll also see the relationships between medical and nursing diagnoses, history and physical assessment data, treatments, medications and laboratory data.

MATERNITY NURSING CARE, 2nd Edition delivers all of the core components of obstetrical nursing, along with in-depth study features to help you develop and enhance analytical skills. Starting with women's health issues and pregnancy care, the chapters progress through labor and childbirth, postpartum care, and newborn development, addressing the nursing considerations for both normal and high-risk scenarios where appropriate. Written from a nursing perspective, MATERNITY NURSING CARE, 2ND Edition emphasizes overall patient care as opposed to medical treatment alone, and illustrates the critical importance of fostering the nurse-patient relationship. MATERNITY NURSING CARE, 2ND Edition is also bound with a helpful StudyWARETM online, which includes case studies, NCLEX-style review questions, videos, activities, a glossary, and many other features to help you meet and exceed the highest standards of obstetrical nursing care.
