Writing a research proposal is one of the most important tasks

Online Library

facing academics,
researchers and
postgraduate students.

Yet there is a good
deal of
misinformation and a
great lack of guidance
about what constitutes
a good research
proposal and what can
be done to maximise
one's chances of
writing a successful

Denicolo and Becker

recognise the

importance of

Research Proposals
will help readers to
understand the context
within which their

what the reviewers are
looking for and will

while also supporting
the development of
relevant skills through

cover a range of areas
from presenting

essential reading for

academic context.

This book describes
meaning, stages and
methods of writing a

this book follows a

beginners can use
without complications
and many
terminologies and
technical terms have
been translated into
Arabic. The book
explains the structure
of a thesis and
proposal including

title, abstract,
introduction, literature

methods, results,
discussion, biography
and appendix (if there

and often without
limiting oneself to the

Each year tens of
thousands of
students will, after

years of hard work
and enormous
amounts of money,
earn their Ph.D.

And each year only
a small percentage
of them will land a
job that justifies
and rewards their
investment. For
every comfortably
tenured professor
or well-paid former
academic, there are

more who simply

who do make it
share an important
asset that separates
them from the pack:
they have a plan.
They understand
exactly what they
need to do to set

themselves up for success. They know what really moves the needle in academic job searches, how to avoid the all-too-common mistakes that sink so many of their peers, and how to decide when to point their Ph.D. toward other, non-academic options.

Karen Kelsky has made it her mission to help readers join the select few who get the most out of their Ph.D. As a former tenured professor and department head who oversaw numerous academic job searches, she knows from experience exactly

what gets an academic applicant a job. And as the creator of the popular and widely respected advice site The Professor is In, she has helped countless Ph.D. ' s turn themselves into stronger applicants and land their dream careers.
