In this 2012 edition of Advances in Knowledge-Based and Intelligent Information and Engineering Systems the latest innovations and advances in Intelligent Systems and related areas are presented by leading experts from all over the world. The 228 papers that are included cover a wide range of topics. One emphasis is on Information Processing, which has become a pervasive phenomenon in our civilization. While the majority of Information Processing is becoming intelligent in a very broad sense, major research in Semantics, Artificial Intelligence and Knowledge Engineering supports the domain specific applications that are becoming more and more present in our everyday living. Ontologies play a major role in the development of Knowledge Engineering in various domains, from Semantic Web down to the design of specific Decision Support Systems. Research on Ontologies and their applications is a highly active front of current Computational Intelligence science that is addressed here. Other subjects in this volume are modern Machine Learning, Lattice Computing and Mathematical Morphology. The wide scope and high quality of these contributions clearly show that knowledge engineering is a continuous living and evolving set of technologies aimed at improving the design and understanding of systems and their relations with humans.

Under the auspices of the Max Planck Institute for Intellectual Property and Competition Law (now the Max Planck Institute for Innovation and Competition). And Institutum Iurisprudentiae, Academia Sinica, a group of twenty scholars from around the world gathered to study the experiences made with regards to compulsory licensing. The results are demonstrated in this book. Different articles analyze how the international conventions on intellectual property may be interpreted and explore the related doctrinal groundwork surrounding compulsory patent licensing and beyond. It is shown how the compulsory licensing regime could be transformed into a truly workable mechanism facilitating the speedy use and dissemination of innovation and other subject matters of protection.
