DISCIPLE IV UNDER THE TREE OF LIFE is the final study in the four-phase DISCIPLE program and is prepared for those who have completed BECOMING DISCIPLES THROUGH BIBLE STUDY. The study concentrates on the Writings (Old Testament books not in the Torah or the Prophets), the Gospel of John, and Revelation. Emphasis on the Psalms as Israel's hymnbook and prayer book leads natural to an emphasis on worship in the study. Present through the entire study is the sense of living toward completion – toward the climax of the message and the promise, extravagantly pictured in Revelation. The image of the tree and the color gold emphasize the prod and promise in the Scriptures for DISCIPLE IV: UNDER THE TREE OF LIFE. The word under in the title is meant to convey invitation, welcome, sheltering, security, and rest – home at last. Commitment and Time Involved 32 week study Three and one-half to four hours of independent study each week (40 minutes daily for leaders and 30 minutes daily for group members) in preparation for weekly group meetings. Attendance at weekly 2.5 hour meetings. DVD Set Four of the five videos in this set contain video segments of approximately ten minutes each that serve as the starting point for discussion in weekly study sessions. The fifth video is the unique component that guides an interactive worship experience of the book of Revelation. Under the Tree of Life Scriptures lend themselves to videos with spoken word, art, dance, music, and drama. Set decorations differs from segment to segment depending on the related Scripture and its time period. Set decoration for video segments related to the Writings generally has a Persian theme. Set decoration for the New Testament video segments emphasizes the simpler life of New Testament times.

Gilbert Albert Briggs was born into a humble family in a Yorkshire textile village in 1890. A passion for music and a love affair with the piano led him to an interest in loudspeakers and, as the textile industry collapsed, he started a sideline to make them, called Wharfedale Wireless Works. This is his story.

Ancient Greek and Imperial Chinese Case Narratives

Thinking in CasesAncient Greek and Imperial Chinese Case NarrativesWalter de Gruyter GmbH & Co KG

A seminal text in literary theory available in English for the first time Legend, saga, myth, riddle, saying, case, memorabile, fairy tale, joke: Andr é Jolles understands each of these nine “ simple forms ” as the reflection in language of a distinct mode of human engagement with the world and thus as a basic structuring principle of literary narrative. Published in German in 1929 and long recognized as a classic of genre theory, Simple Forms is the first English translation of a significant precursor to structuralist and narratological approaches to literature. Like Vladimir Propp ’ s Morphology of the Folktale, with which it is often compared, Jolles ’ s work is not only foundational for the later development of genre theory but is of continuing relevance today. A major influence on literary genre studies since its publication, Simple Forms is finally available in English.

Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies.Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration’s three region schools.It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook.This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation.Robert J. Who is afraid of case literature? In an influential article ("Thinking in Cases", 1996), John Forrester made a case for studying case literature more seriously, exemplifying his points, mostly, with casuistic traditions of law. Unlike in modern literatures, case collections make up a significant portion of ancient literary traditions, such as Mesopotamian, Greek, and Chinese, mostly in medical and forensic contexts. The genre of cases, however, has usually not been studied in its own right by modern scholars. Due to its pervasiveness, case literature lends itself to comparative studies to which this volume intends to make a contribution. While cases often present truly fascinating epistemic puzzles, in addition they offer aesthetically pleasing reading experiences, due to their narrative character. Therefore, the case, understood as a knowledge-transmitting narrative about particulars, allows for both epistemic and aesthetic approaches. This volume presents seven substantial studies of cases and case literature: Topics touched upon are ancient Greek medical, forensic, philosophical and mathematical cases, medical cases from imperial China, and 20th-century American medical case writing. The collection hopes to offer a pilot of what to do with and how to think about cases.
