For one night she had everything. Pro snowboarder Stella Lazarus has always loved her brother's best friend. **Raffaella A. Del Sarto examines the creation of Israel's neo-revisionist consensus about security threats and regional order, which took hold of Israeli politics and society after 2000 and persists today. The failed Oslo peace process and the trauma of the Second Palestinian**

***Intifada triggered this shift to the right. Conflicts with Hamas and Hezbollah and Iran's inflammatory rhetoric later created a feeling of being under siege. While Israel faces real security threats, Israeli politics and society have also been besieged by the politics of the neo-revisionist right. Lively political debate has been replaced by a general acceptance of the no-compromise approach to security and the Palestinians. The right, represented by Benjamin Netanyahu and Likud, has turned Israel away from the peace process and pushes maximalist territorial ambitions.***

***But they have failed to offer a vision for an end to conflict, and there has been little debate about whether or not the hardline policies are counterproductive. Del Sarto explains this disappearance of dissent and examines the costs of Israel's policies. She concludes that Israel's feeling of being under siege has become entrenched, a two-state solution with the Palestinians is highly unlikely for the foreseeable future, and Israel's international isolation is likely to increase.***

He was a shadow, ever shifting and insinuating, able to blend in everywhere and anywhere. Now calling himself Graeme, he hides in plain sight, terrifyingly close to his goal. A rogue Bengal Breed, he is

loyal to no one but himself. And he has a need for vengeance that surges hot and swift through his veins. Graeme plans to wage an extreme and ruthless vendetta against those who wronged him—Breed and human alike. All will suffer his wrath: those who created him, those who pretended to love him, and those who betrayed him. Euphoria and Dystopia: The Banff New Media Institute Dialogues is a compendium of some of the most important thinking about art and technology to have taken

place in the last few decades at the international level. Based on the research of the Banff New Media Institute (BNMI) from 1995 to 2005, the book celebrates the belief that the creative sector, artists and cultural industries, in collaboration with scientists, social scientists and humanists, have a critical role to play in developing technologies that work for human betterment and allow for a more participatory culture. The book is organized by key themes that have underscored the dialogues of the BNMI and within each are carefully edited transcriptions drawn from thousands of hours of audio material documenting BNMI events such as the annual

Interactive Screen and the numerous summits and workshops. Each chapter is introduced by an essay from the book editors that discusses the roles of research and artistic co-production at Banff from 1990 to 2005 and a commissioned essay from a leading new media theorist. Includes the catalogue for 'The Art Formerly Known As New Media' exhibition, Walter Phillips Gallery, 2005. Edited by Sarah Cook and Sara Diamond. Foreword by Kellogg Booth and Sidney Fels. Essays by Sandra Buckley; Steve Dietz; Jean Gagnon; N. Katherine Hayles; Eric Kluitenberg; Jeff Leiper, Allucquere Rosanne Stone. Afterword by Susan Kennard. Cases and Conversations

Perhaps you 've always wondered how public radio gets that smooth, well-crafted sound. Maybe you 're thinking about starting a podcast, and want some tips from the pros. Or maybe storytelling has always been a passion of yours, and you want to learn to do it more effectively. Whatever the

case—whether you're an avid NPR listener or you aspire to create your own audio, or both—*Sound Reporting: The NPR Guide to Audio Journalism and Production* will give you a rare tour of the world of a professional broadcaster.

Jonathan Kern, who has trained NPR's on-air staff for years, is a gifted guide, able to narrate a day in the life of a host and lay out the nuts and bolts of production with equal wit and warmth. Along the way, he explains the importance of writing the way you speak, reveals how NPR books guests ranging from world leaders to

neighborhood newsmakers, and gives sage advice on everything from proposing stories to editors to maintaining balance and objectivity. Best of all—because NPR wouldn't be NPR without its array of distinctive voices—lively examples from popular shows and colorful anecdotes from favorite personalities animate each chapter. As public radio's audience of millions can attest, NPR's unique guiding principles and technical expertise combine to connect with listeners like no other medium can. With today's technologies allowing more people to turn their home computers into broadcast

As the American election administration landscape changes as a result of major court cases, national and state legislation, changes in professionalism, and the evolution of equipment and security, so must the work of on-the-ground practitioners change. This Open Access title presents a series of case studies designed to highlight practical responses to these changes from the national, state, and local levels. This book is designed to be a companion piece

to The Future of Election Administration, which surveys these critical dimensions of elections from the perspectives of the most forward-thinking practitioner, policy, advocacy, and research experts and leaders in these areas today. Drawing upon principles of professionalism and the practical work that is required to administer elections as part of the complex systems, this book lifts up the voices and experiences of practitioners from around the country to describe, analyze, and anticipate the key areas of election administration systems on which students, researchers, advocates, policy makers, and practitioners should focus. Together, these

books add to the emerging body of literature that is part of the election sciences community with an emphasis on the practical aspects of administration.

*Covering a transformative period of L.A. history, from the 1992 riots to the 2008 recession, Scott Cummings presents an unflinching account of five pivotal campaigns in which lawyers ally with local movements to challenge the abuses of garment sweatshops, the criminalization of day labor, the gentrification of downtown retail, the incursion of Wal-Mart groceries, and the misclassification of port truck drivers. Through these campaigns, lawyers and activists define the city as a space for redefining work in vital industries transformed by deindustrialization, outsourcing, and immigration. Organizing arises outside of traditional labor law, powered by*

*community-labor and racial justice groups using levers of local government to ultimately change the nature of labor law itself. Challenging accounts of lawyers' negative impact on movements, Cummings argues that the L.A. campaigns have achieved meaningful reform, while strengthening the position of workers in local politics, through legal innovation.
