*This book takes a developmental perspective at the use of scoring rubrics to assess student work. Citing developmental characteristics of each age, the author presents examples and adaptations of assessment rubrics on a variety of subjects for teachers from kindergarten through adult/college. After a presentation of foundation information on rubrics, separate chapters are devoted to each grade level from primary through adult. Written so that each chapter can be addressed independently, the book provides additional chapters devoted to assessing technological topics and using rubrics with students with special needs. The final chapters provide practical information to help teachers to create their own rubrics and to covert rubric scores to letter grades. An updated annotated listing of recommended rubric websites is included. The Pearson Complete Guide to the SAT offers a methodical, thoroughly class-tested approach designed to specifically meet the needs of Indian students. From the admission process, to the list of American universities, to sample essays, to the many practice tests, this book includes all that a student needs to excel at the SAT. Based entirely on the analyses of the tests, this book also includes tricks and tips that will provide students with a competitive edge.*

SAT prep can be very easy or very difficult. It all depends on how you prepare. Many students make the mistake of spending countless hours preparing for the SAT with little to no results. This guide was written by Dr. Steve Warner, a math professor and test prep expert that has been giving SAT math prep advice for over 15 years. After reading this book you will learn - how to prepare for SAT math with only 10 to 20 minutes of daily studying, - the best way to take the test, - how to avoid careless errors, - and much more...

Note that this SAT prep book is meant to teach effective, time-efficient preparation. This book does not contain SAT problem sets or practice tests. For SAT workbooks and lessons take a look at other books from Dr. Warner's "Get 800" collection such as the "28 SAT Math Lessons" series, or "320 SAT Math Problems."

SAT is a standardised test and the questions follow a pattern. So, if you practice well and regularly on these questions, you will do much better than your friends on the test. This book will help you learn the strategies needed to answer each algebra based question in the best and the most efficient manner. All the strategies explained in the book have been time tested on the new version of the test by more than 10,000 students across the globe. Once you have solved the questions in this book, all the questions, based on Algebra, will be a reflex on the real test and you will answer those questions instinctively. The author of the book graduated from Harvard in 2012 and since then have helped many students get admitted to the top school of their choice by helping them score high on the SAT and the ACT. He believes that every student can do great on the SAT math if he/she simply follow the logic to answer these questions. Each question has been carefully picked to make sure that you make the most effective use of your time to prep for the test. Hence, even you are a high scoring student, start from the first page itself and don't be tempted to jump directly to the hard questions. Be consistent in your practice. Review the questions in detail, especially the ones you get wrong or spend too much time solving.
