¡Hola! Hello! Did you understand this first Spanish word? Yes, you did! Why? Because it was presented to you using a new technique that is making learning languages easier than ever – the Bilingual Reading. We created this book using this technique so that you can learn Spanish in a fast and fun way and whenever you want. How does this work? It is simple: Bilingual Reading works by reading two versions of the same book or text at once. One

version will be on the language you want to learn (in this case we will help you to learn Spanish) and the other version will be in your native language or some other language you are comfortable with - here we will use English. Using this method, you will quickly start discovering the meaning of the words in Spanish and accumulating vocabulary that will soon allow you to read texts that are more complex without having to spend hours and hours looking for every word meaning on a dictionary and

trying hard to memorize it. In order to make it easier for you to learn Spanish in a fun way, we gathered in a word a very special group of 12 Spanish short stories. These 12 Spanish short stories for beginners were written using straightforward grammar that is comprehensible for beginners and that will help you rapidly gain more Spanish vocabulary and comprehension. Using Spanish English parallel text, this book will increase your bilingual reading comprehension skills and

maximize the time you invest in reading. The book is organized as a Spanish learning book: you can start by reading each paragraph of each story in the two languages (in Spanish English parallel text), then move to read the full story in each language, rereading to consolidate the Spanish fundamentals whenever is necessary. This way you will feel the progress of Spanish language learning when moving from story to story and see your Spanish vocabulary grow as your bilingual reading

comprehension increases - allows you to learn Spanish easily and more than that, you can learn Spanish in a fast and fun way. You can even dedicate it a few moments every day so you can even learn Spanish in 10 minutes a day if you want! Let's Start?

Human Resource Information Systems: Basics, Applications, and Future Directions is a one-of-a-kind book that provides a thorough introduction to the field of Human Resource Information Systems (HRIS) and shows how organizations today can leverage HRIS to make better people decisions and manage talent more effectively. Unlike other texts that overwhelm students with technical

information and jargon, this revised Fourth Edition offers a balanced approach in dealing with HR issues and IT/IS issues by drawing from experts in both areas. It includes the latest research and developments in the areas of information security, privacy, cloud computing, social media, and HR analytics. Numerous examples, best practices, discussion questions, and case studies, make this book the most student-friendly and current text on the market.

This book over the years has

proved to be a great architect in shaping student's ability to master Logical Reasoning and Data Interpretation for CAT examination. The fifth edition covers all the fundamental and advanced topics, supported by ample number of worked out examples, caselets, and exercises . It also provides clarity and knowledge of the concepts and questions that are asked in various MBA entrance examinations such as XAT, SNAP, IIFT, IRMA, MAT, NMAT, etc.

The Future of Industrial Man is the only book by Peter Drucker in which he systematically develops a basic social theory. He presents the requirements for any society to be functioning and legitimate, and then applies these general concepts to the special case of the industrial society. In his new introduction, Drucker explains that his reference to mercantilism in The Future of Industrial Man can today be called neoconservatism, which, he asserts, denies rather than affirms the

reality of industrial and postindustrial society. Drucker outlines the major shifts of previous centuries. He describes the move from an agrarian to an industrial economy, illustrates the structure and dynamics of this new industrial order, and warns of the abuses inherent in the system if attempts are made to maintain it under anachronistic social conventions. He emphasizes the fact that the new industrial order must operate under a "legitimate" system of political power supported by social authority. He

discusses the particular roles of the owners, the workers, the managers—the corporation itself—as he pinpoints the problem that he considers the most central and the most critical: how to maintain the continuing freedom of the individual in an increasingly intricate, bureaucratized world. Following the initial publication of this work, Jacques Barzun wrote in *The New Republic*, "Here is a book which is so perfectly planned and so transparently written as to read with almost indecent ease. . . .

What are the prerequisites for reforming education, and how can these reforms be seen in school development and culture? How should teacher

education support this reform process? What are the principles and practices underlying the functioning of the schools of tomorrow? These questions are examined in this unique volume. The authors in this book argue that the central function of teacher education and education in general is to respond to the challenges brought on by the twenty-first century. According to this approach, the competencies and skills needed in the future are not merely a new addition to school activities, but rather something requiring a comprehensive reform of school culture encompassing teacher education, curricula, and

teaching methods. Such a fundamental process of change in the action and thinking models used by schools would be an effort to achieve a complete transformation, the result of which would be schools developing into organizations that are both creative and imbued with a strong sense of community. A central attribute is that the creation of new knowledge is not just restricted to the classroom but also takes place in out-of-school environments. This would link learning to its natural context, eventually leading to an ideal instruction that is actively problem oriented, holistic, and

Drucker on Asia is written in two parts (Times of Challenge & Time to Reinvent) which is the result of a dialogue between Peter Drucker and Isao Nakauchi on international themes.

Drucker On Asia is the result of extensive dialogue between two of the world's leading business figures, Peter F Drucker and Isao Nakauchi. Their dialogue considers the changes occurring in the economic world today and identifies the challenges that free markets and free enterprises now face with specific reference to China and Japan. * What do these economic changes mean for an individual country and its economy? * What do these changes mean to Japan? * What do these changes mean to society; the individual

company; the individual professional and executive? These are the questions that Drucker and Nakauchi address in their brilliant insight into the future economic role of Asia.

Synge, who came from a middle-class Protestant family near Dublin, created a huge scandal at the Abbey Theatre in Dublin, where *The Playboy* was staged in 1907, because its audience did not take kindly to a comedy that seemed to portray the Irish as violent, superstitious sots and swaggerers. Synge relied on and at the same time mocked the Irish dramatic movement and its ambition to create realistic drama that was also poetically beautiful. The play is set 'near a village, on a wild coast of Mayo'. On the first day, a stranger arrives and declares that he is on the run because he

The Age of Discontinuity: Guidelines to Our Changing Society describes the discontinuities that are changing the structure and the meaning of economy, politics, and society. Major discontinuities exist in four areas: the knowledge technologies; changes in the world's economy; a society of organizations; and the knowledge society. This book is organized into four parts encompassing 17 chapters. Each part represents the four areas of discontinuities. Part I highlights the growth in major industries and businesses, along with economic policies related to tax incentives. Part II looks into the status of the global economy, the disparity between the rich and poor countries, and the concepts and application of the economic theory demonstrating a

closed economy controlled from within by national, monetary, credit, and tax policies. Part III examines the changes in the political matrix of social and economic life. This part deals particularly with the theory of pluralism and organizations, as well as the creation of socio-political reality. Part IV focuses on the changes in the cost center and the crucial resource of the economy. Knowledge changes involve changes in labor forces and work. This book will prove useful to economists, public servants, sociologists, and researchers.
