Why do we still have nits? What exactly are 'purity rules'? And why have baths scarcely changed in 200 years? The long history of personal hygiene and purity is a fascinating subject that reveals how closely we are linked to our deeper past. In this pioneering book, Virginia Smith covers the global history of human body-care from the Neolithic to the present, using first-hand accounts and sources. From pre-historic grooming rituals to New Age medicine, from ascetics to cosmetics, Smith looks at how different cultures have interpreted and striven for personal cleanliness and shows how, throughout history, this striving for purity has brought great social benefits as well as great tragedies. It is probably safe to say that no-one who reads this book will look at his or her body (or bathroom) in quite the same way again.

Principles of Yacht Design has established itself as the standard book on the subject for practising designers, naval architecture students, discerning boat owners as well as the boatbuilding industry as a whole. The fifth edition is completely revised and expanded. It examines every aspect of the process of yacht and powerboat design. The new edition includes new findings from recent research in aero and hydrodynamics, as well as covering the most recent changes to building standards. The authors have used a newly built 41-foot performance cruiser to demonstrate the practical application of yacht design theory. This new edition includes photos of the building process and detailed explanations.

Fundamentals and maps

An orthopedic surgeon and a physical therapist join forces to create an exercise program that helps sufferers of knee pain prevent further injury while alleviating pain.

"...profoundly moving..." -Publishers Weekly
Nelson Mandela's two great-grandchildren ask their grandmother, Mandela's youngest daughter, 15 questions about their grandad - the global icon of peace and forgiveness who spent 27 years in prison. They learn that he was a freedom fighter who put down his weapons for the sake of peace, and who then became the President of South Africa and a Nobel Peace Prize-winner, and realise that they can continue his legacy in the world today. Seen through a child's perspective, and authored jointly by Nelson Mandela's great-grandchildren and daughter, this amazing story is told as never before to celebrate what would have been Nelson's Mandela 100th birthday.

These fun faux matchsticks are printed with prompts and talking points that will get loved ones laughing, connecting, and playing together. A perfect way to liven up family gatherings and road trips, this colorful box of joy makes an extra-sweet gift for Mother's Day or Father's Day.

This book provides a comprehensive account of the role of echocardiography in patients with mitral valve disease. The normal echocardiographic anatomy of the mitral valve is first presented, and the applications of echocardiography in mitral valve disease are then covered in detail by experts from different subspecialties in cardiology. Topics include etiology, pathophysiology, diagnosis, assessment of severity, and role of echocardiography in percutaneous and surgical techniques. The highly readable text is supported by a wealth of color images obtained with 3D echocardiography, currently the gold standard for the evaluation of mitral valve disease. The interdisciplinary approach used in describing the diagnostic and therapeutic applications will make this book useful for the clinical cardiologist as well as the echocardiographer. It will allow cardiologists to advance their knowledge in the field and will serve as an excellent updating tool for professionals engaged in echocardiography and cardiac diagnostic imaging. ?

War Against the People focuses on Israel's unique role in international affairs, highlighting how it promotes a global system of militarism and domestic control - a form of "global Palestine." Jeff Halper investigates how Israel exports the weaponry and techniques of occupation. He shows how it uses the West Bank and Gaza as a "laboratory" for the development of these weapons, instruments of population control and models of permanent pacification. These are used not only to armies but internal security agencies and police forces as well. Halper locates Israel's system of pacification within the broader project of global "transcapital pacification." War Against the People provides a valuable window into the workings of pacification on a global level and the latest in military and counter-insurgency doctrine, outlining critical aspects of global politics that activists often miss in their struggle for global justice.

Nephrology and Urology of Small Animals provides veterinarians with the knowledge needed to effectively diagnose and treat urologic

diseases in canine, feline, and exotic patients. Serving as an easy-to-use, comprehensive clinical reference, the text takes an evidence-based approach to detailed coverage of specific diseases and disorders, including etiology and prevalence, clinical signs, diagnosis, treatment, prevention, prognosis, controversies, and references. Coverage also includes practical review of anatomy and physiology of the urinary system, fundamentals of diagnostic testing and therapeutic techniques.

LOWTRAN 7 is a low-resolution propagation model and computer code for predicting atmospheric transmittance and background radiance from 0 to 50,000 cm^{-1} at a resolution of 20 cm^{-1} . The code is based on the LOWTRAN 6 (1983) model. Multiple scattered radiation has been added to the model as well as new molecular band model parameters and new ozone and molecular oxygen absorption parameters for the UV. Other modifications include a wind dependent desert model, new cirrus cloud models, and new cloud and rain models. The code also includes new representative (geographical and seasonal) atmospheric models and updated aerosol models with options to replace them with user-derived values. An improved extra-terrestrial solar source function is also included. Six modes of program execution are allowed with the new model and computer code for a given slant path geometry. This report contains a description to users for operating the LOWTRAN 7 computer code. It summarizes the capabilities of the new code, provides complete operating instructions as well as input and output from test cases for user validation. Also included are operating instructions for three programs that utilize LOWTRAN 7 output (plot, filter and scanning function programs). Keywords: Computer program documentation, Subroutines, Radiative transfer, Aerosols, Clouds, Attenuation, Lowtran, Computer code, Ultraviolet, Visible, Infrared.

Biomass, Biofuels, Biochemicals: Biofuels: Alternative Feedstocks and Conversion Processes for the Production of Liquid and Gaseous Biofuels, Second Edition, provides general information, basic data and knowledge on one of the most promising renewable energy sources—liquid and gaseous biofuels—and their production and application. The book delineates green technologies for abating environmental crisis and enabling the transformation into a sustainable future. It provides date-based scientific information on the most advanced and innovative technology on biofuels, as well as the process scale-up and commercialization of various liquid and gaseous biofuels, detailing the functional mechanisms involved, various operational configurations, influencing factors and integration strategies. All chapters have been updated, with new chapters covering topics of current interest, including sustainability and biohydrogen. Presents a holistic view of biofuels in research, operation, scale-up and application Widens the scope of the existing technologies, providing state-of-the-art information and knowledge Provides strategic integrations of various bioprocesses that are essential in establishing a circular biorefinery Contains interdisciplinary knowledge on the environment, molecular biology, engineering, biotechnology, microbiology and economic aspects Integrates various subjects, including biotechnology, bioengineering, molecular biology, environmental science, sustainability science and chemical engineering

Clinical Adult Neurology

Echocardiography in Mitral Valve Disease

The ITF Transport Outlook provides an overview of recent trends and near-term prospects for the transport sector at a global level, as well as long-term prospects for transport demand to 2050, for freight (maritime, air and surface), passenger transport (car, rail and air) and CO2 emissions.

Extensively illustrated and liberally laced with clinically helpful tools, Clinical Adult Neurology is an affordable reference for all clinicians and residents. With emphasis on diagnostic tools and strategies as well as management pearls and perils, Clinical Adult Neurology will meet the needs of all health care practitioners caring for patients with neurologic disorders. The book is organized into three sections, with Section 1 covering all aspects of neurologic evaluation, Section 2 describing common clinical problems in neurology, and Section 3 discussing all aspects of neurologic diseases. All sections and chapters emphasize the clinical approach to the patient with consistently useful pedagogical tools, including Features tables for diagnostic help with all neurologic diseases, Pearls and Perils boxes that represent pithy distillations of clinical wisdom from leading experts, Key Clinical Questions boxes that help clinicians frame patient diagnosis and management; and annotated bibliographies that highlight the most important references for further study. The book's organization, format, and features all stress the efficient and well-rationed use of medical care for patients with neurologic disease. Succinct content presentations make all information easy to locate and digest. The format will also be a helpful tool for those preparing for examinations. Highlights include: An emphasis on diagnosis, management, and all pertinent clinical issues Heavily illustrated Contributions by the foremost experts on all aspects of neurologic diseases Extensive use of clinically helpful tables, charts, and boxes with practical advice on all aspects of diagnosis and management

English description: With the rediscovery of Mariano Taccola's technical manuscripts, a primary source has been found for drawings and texts in treatises and sketchbooks of Francesco di Giorgio Martini. Taccola first conceived a new subject in Renaissance literature: rational descriptions and illustrations of utilitarian structures built by master masons, carpenters, millwrights, and artisans in the service of military lords. Taccola's complex and fascinating manuscript is being published fully in facsimile. It was a gift to Johann Albrecht Widmannstetter who studied law (1533-1542) in Siena, probably at the Studio or University where Taccola had been secretary while writing in the building arts. The volume that Taccola entitled "Liber primus leonis" and "Liber secundis draconis" was modified into a "Notebook" when he, in 1435-1438, added many small sketches around each main drawing existing on a folio, and added quires of paper after Book II for additional and later drawings. This edition includes, in the editors' introduction, a short biography of Mariano Taccola, a history of his "Notebook", a description of its sections, an account of Taccola's contribution to the history of the technology, and a study of his influence. Each of Taccola's several hundred drawings is identified, his Latin texts and notes are all transcribed and then translated into English. In one Appendix, the editors illustrate and interpret eight drawings identified as copies of Taccola's originals lost from his "Notebook", and a second Appendix concerns the designs of mills, pile-drivers, and water-supply devices of a Machine Complex that other engineers developed from prototypes in Taccola's "Notebook". German description: Mit der Wiederentdeckung der technischen Handschriften Mariano Taccolas wurde auch die Quelle für die Zeichnungen und Texte in den Abhandlungen und Skizzenbüchern Francesco di Giorgio Martinis entdeckt. Taccola behandelte als erster ein neues Thema in der

Renaissanceliteratur: die rationale Beschreibung und Illustration von Zweckbauten. Das Werk, das Taccola ursprünglich als "Liber primus leonis" und "Liber secundus draconis" angelegt hatte, bekam nach und nach den Charakter eines Notizbuchs, als den Hauptzeichnungen mehrere kleinere Skizzen hinzugefügt und mehrere lose Blätter mit technischen Zeichnungen beigelegt wurden. Die Handschrift war ein Geschenk an Johann Albrecht Widmannstetter, der sich einige Jahre in Siena aufhielt. Aus der Sammlung dieses Humanisten gelangte sie anschliessend nach München. Die vorliegende Faksimileausgabe enthält neben einer kurzen Biographie Mariano Taccolas die Geschichte dieses Notizbuchs, eine Beschreibung der einzelnen Abschnitte sowie Taccolas Bedeutung für Wissenschaft und Technik der Renaissance. Jede der mehreren hundert Zeichnungen wird erläutert, Taccolas lateinische Beschreibungen der Maschinen werden in Transkription wiedergegeben und ins Englische übersetzt. Ein Anhang enthält die Zeichnungen zu Mühlen, Pfahlrammen und Entwürfen zu Wasserleitungssystemen, die später nach Taccolas Modellen aus dem "Notebook" entwickelt wurden.

Retells the stories of the prophets, in graphic novel format.

Dictionary of Architecture Place this useful little dictionary in your library if you want a handy source for the spelling, pronunciation (if unusual), and concise definition of terms met in the study, historical reading, and practice of architecture. Fashioned over a ten-year period by one of America's leading architects, the Dictionary can be used by architects, students, builders, and building lovers from savant to sidewalk supervisor. Verb, adjective, and adverb forms are usually omitted when the noun is listed, to save space and reader time. Only those technical terms from other fields that have a real bearing on architecture are included. Illustrations are restricted to objects that are difficult or impossible to describe in words alone. These are grouped in plates at the end of the dictionary. Phonetic spelling is used for unusual words rather than the shower of diacritical symbols which often discourages users of giant lexicons. From abaciscus to zwinger, the Dictionary of Architecture serves as a modest aid to those who would know the vocabulary of this mother of the arts.

The second edition of this modern classic encompasses the latest research, which sees bainitic alloys at the forefront of a new wave of "designed" steels. Contents include: Nomenclature; Introduction; Bainitic Ferrite; Carbide Precipitation; Tempering of Bainite; Thermodynamics; Kinetics; Upper and Lower Bainite; Stress and Strain Effects; Reverse Transformation from Bainite to Austenite; Acicular Ferrite; Other Morphologies of Bainite; Mechanical Properties; Modern Bainitic Alloys; Other Aspects; The Transformation of Steel.

Anthropometric source book

Spanish, Grade 3

An Introduction to Social Research

Tools for Business Decision Making 5E CA Edition

The Portfolio and the Diagram

A history of modern architecture as a discursive practice.

This pocket-sized Dictionary offers huge coverage for the 40,000+ people studying or working in architecture, construction or any of the built environment fields. From Abaciscus to Zophorus, the reader is able to quickly track down precisely the term they are looking for. The book is illustrated with stunning drawings that provide a visual as well as a textual definition of both key concepts and subtle differences in meaning. Compact and affordable; Davies and Jokiniemi's work is the miniature version of the Dictionary of Architecture and Building Construction. The Architect's Illustrated Pocket Dictionary can be used on site or quickly at the desk and is suitable for all those interested in the buildings that surround us.

This book offers a novel perspective on starting-up new business ventures through examining the process by which they become part of the existing business environment. The book highlights the importance of inter-organizational business relationships. Asserting that new ventures need to interact and connect with customers and suppliers, alongside policy actors and universities, Starting up in Business Networks demonstrates how beginning a new venture demands initiating and developing business relationships. Noting a lack of prior research into the process by which start-ups embed into an existing business network, this book presents examples from countries such as Sweden, Italy, the Netherlands and China to analyse the emergence and evolution of start-up business networks.

Brighter Child(R) Spanish for Grade 3 helps students master beginning foreign language skills. Practice is included for learning action words, greetings, food words, and more. School success starts here! Workbooks in the popular Brighter Child(R) series are packed with plenty of fun activities that teach a variety of essential school skills. Students will find help for math, English and grammar, handwriting, and other important subject areas. Each book contains full-color practice pages, easy-to-follow instructions, and an answer key.

*The first digital turn in architecture changed our ways of making; the second changes our ways of thinking. Almost a generation ago, the early software for computer aided design and manufacturing (CAD/CAM) spawned a style of smooth and curving lines and surfaces that gave visible form to the first digital age, and left an indelible mark on contemporary architecture. But today's digitally intelligent architecture no longer looks that way. In *The Second Digital Turn*, Mario Carpo explains that this is because the design professions are now coming to terms with a new kind of digital tools they have adopted—no longer tools for making but tools for thinking. In the early 1990s the design professions were the first to intuit and interpret the new technical logic of the digital age: digital mass-customization (the use of digital tools to mass-produce variations at no extra cost) has already changed the way we produce and consume almost everything, and the same technology applied to commerce at large is now heralding a new society without scale—a flat marginal cost society where bigger markets will not make anything cheaper. But today, the unprecedented power of computation also favors a new kind of science where prediction can be based on sheer information retrieval, and form finding by simulation and optimization can replace deduction from mathematical formulas. Designers have been toying with machine thinking and machine learning for some time, and the apparently unfathomable complexity of the physical shapes they are now creating already expresses a new form of artificial intelligence, outside the tradition of modern science and alien to the organic logic of our mind.*

Based on the expertise of thirty leading experts on confiscation in the EU, this is the first book to analyse the practice of proceeds from crime confiscation in the original fifteen EU Member States. It examines the implementation of confiscation provisions in all three (investigative, judicial and disposal) phases of confiscation proceedings. It quantifies the enforcement of confiscation provisions in the EU, using an innovative and unique methodology and thereby furnishes understanding of obstacles and best practices. The conclusion of the book is that the 'tough on criminal wealth' philosophy is largely alien to the everyday practice of law enforcement agencies. Putting criminals behind bars is still the main aim of the system, and most of the scarce resources available are devoted to achieving this. This title is of interest to academics and students in the fields of criminology, sociology, and law, as well as to law enforcement officers, public prosecutors, and policymakers.

Why Relationships Matter in Entrepreneurship

When the chance to run arrives, Beldon doesn't think twice about escaping into the shadows of an enchanted castle locked in an eternal winter. He wants to bury a secret. But the castle is a cold, cruel place and his host is less than welcoming. The sparks that fly between them are tension building until one night it almost costs Beldon his life. Then things change. Beldon's attention turns to the shadowy Beast and the Beast surrounds him. There is a curse to be broken after all and Beldon promised to help find a mysterious figure known as Beauty. However, he does not expect his secret to resurface within this frozen castle and as such he is forced to confront himself and answer one question. As he approaches closer, does he want this Beauty found?~~~~ The original draft for the community who wanted a physical copy~

This book discusses the ecology, diversity and environmental impact of Siberia. Chapter One discusses cultural interaction and mutual influences between the civilisations of the Ancient World and the Middle Ages: China, Japan, Korea, Iran, Central Asian nomadic empires, Turkic Khanate, Byzantine Empire, kingdoms, the Ottoman Empire and the Arab Caliphate to Siberia and the Urals. Chapter Two presents issues regarding the current status of Siberia in the world, and focuses on agricultural development of Siberian land within Russia and the world and its hidden productive potential, and how the process of time will have greater economic importance. Chapter Three reviews the impact of recent climate changes and technogenic carbon dioxide and fluorides emitted by aluminum smelters on the microbial transformation of carbon, the regimes of functioning, and the state of agroecological forest soils (Luvic Greyzemic Phaeozems) in the forest-steppe zone of the Baikal region on the basis of data of the long-term agroecological monitoring. Chapter Four studies the ecological interactions that take place within the vast region of Siberia among the avian reservoir hosts and vectors and the environment they utilise. Chapter Five presents the results of hydro-chemical research conducted in the spring of 2013 and in the northern part of Western Siberia. Chapter Six presents the results of research on selected terrestrial surface waters in the arctic region of Siberia conducted during the Spring of 2013, Fall of 2014, and Winter of 2015.

Credit Analysis and Lending Management is a new Australasian text that focuses on the core lending functions of financial institutions, credit management, credit risk assessment and analysis, lending policy formulation and management, and the rise of new product development in the financial services sector. The value of any financial institution is measured by its ability to effectively manage and reduce its credit risk through the structure of the credit organisation, including loan markets. Relevant financial statements are presented to develop students' interpretive and analytical understanding of financial statements. Features: * Developments in loan marketing and new loan products are profiled and discussed in chapter 17.) * Problem loan management is discussed as a growing professional issue (see chapter 16). * Detailed case studies at the end of each chapter present a diverse set of professional scenarios that can be used for assignment, assessment and group work activities. * 'Industry insights' boxes highlight current professional issues and identify industry developments. * 'A day in the life of...' boxes highlight the diversity of professional roles in the industry.
