another book called the Sales Ledger or Customers' Ledger, while the creditors' accounts are kept in the Purchase or Creditors' Ledger. The original Ledger, now much reduced in size, is called the General Ledger. The Trial Balance now refers to the accounts in the

This book discusses theories of monetary and financial innovation and applies them to key monetary and financial innovations in history – starting with the use of silver bars in Mesopotamia and ending with the emergence of the Eurodollar market in London. The key monetary

innovations are coinage (Asia minor, China, India), the payment of interest on loans, the bill of exchange and deposit banking (Venice, Antwerp, Amsterdam, London). The main financial innovation is the emergence of bond markets (also starting in

An unprecedented number of people is currently on the move seeking refuge in Europe. Large parts of European societies respond with anxiety and mistrust to the influx of people.

Nationalist, anti-migrant parties from

migration. In doing so, it identifies why receiving countries are in many ways part of the problem. To eschew an overtly Euro-centric perspective and stimulate a debate between science and politics, it contains contributions by academics and practitioners alike from both shores of the Mediterranean.

Controlling the level of noise in electrical motors is critical to overall system performance. However, predicting noise of an electrical motor is more difficult and less accurate than for other characteristics such as torque-speed. Recent advances have produced powerful computational

It is also the first to include noise prediction for permanent magnet (PM) synchronous motors. Complete coverage of all aspects of electromagnetic, structural, and vibro-

Moving to applications,

Immersive Analytics is a new research initiative that aims to remove barriers between people, their data and the tools they use for analysis and decision making. Here the

aims of immersive analytics research are clarified, its opportunities and historical context, as well as providing a broad research agenda for the field. In addition, it is reviewed how the term immersion has

experiments in film translation during the transition to sound from 1927 to 1934 and later, as markets adjusted to the demands of synchronised film. The Translation of Films, 1900-1950 argues for a broader understanding of film translation: far from being limited to language transfer, it

encompasses editing, localisation, censorship, paratextual framing, and other factors. It advocates for film translation to be considered as a crucial contribution not only to the worldwide circulation of films, but also to the art of cinema.

war - has an introduction and extensive background notes by the modern English historian Paul Harris.

The end of the Pleistocene (c. 75-15 ka) is a key period for the prehistory of the Nile Valley. The climatic fluctuations documented during this period have

led human populations from the Middle and Late Palaeolithic to adapt to a changing Nile. In particular, the global shift to more arid conditions regionally translated into the expansion of the Sahara, the lowering of sea levels and the desiccation of some major

eastern African lakes. These climatically-induced environmental changes influenced the behaviour of the Nile —although how exactly is still debated— and its role as an ecological refugium for human populations living in its vicinity. Genetic and fossil

evidence highlight a strong population substructure in Africa during this period, suggesting the alternation of phases of major dispersals of modern humans within the continent, as well as out-of and back-into Africa, with phases of relative isolation of

environmental changes and/or possible contacts between different human populations is critical in this context. The best-preserved evidence for past human behavior are archaeological assemblages, most often lithic assemblages. However, the use of

different terminologies, whether they refer to cultural or techno-typological entities, hampers any systematic comparison between the Nile Valley on one hand and neighbouring regions on the other hand. An outcome of this practice is the artificial ‘ isolation ’ of
