A Tale Told in Ten Blocks

Everywhere, Wonder

Discover the surprising origins of the legendary caped crusader in this entertaining picture book biography for young fans of Batman and superheroes Batman’s biggest secret is not Bruce Wayne . . . Every Batman story is marked with the words, “Batman created by Bob Kane.” But that isn’t the whole truth. A struggling writer named Bill Finger was involved from the beginning. Bill helped invent Batman, from concept to costume to character. He dreamed up Batman’s haunting origins and his colorful nemeses. Despite his brilliance, Bill worked in obscurity. It was only after his death that fans went to bat for Bill, calling for acknowledgment that he was co-creator of Batman. Cartoonist and popular Batman artist Ty Templeton brings Marc Tyler Nobleman’s exhaustive research to life. Perfect for reluctant readers and those bridging from easy readers to longer narratives, this classic underdog story will inspire all readers to take ownership of, and pride in, their work.

A young girl gets quite a surprise when the text of a library book she is reading transforms her surroundings into those of a teaming-with-life coral reef!

Formerly titled *Losing Our Minds: Gifted Children Left Behind*, this book describes differences in developmental stages within the gifted population. The children are classified into five levels of giftedness based on behaviors and developmental milestones, giving parents and educators a reference guide to compare with their own gifted children or students. A child’s intellectual level can thus be estimated, after which the book provides different educational approaches and practical advice, including how to find the best type of school for each level.

A Selected and Annotated Bibliography of Recent Air Age Education Textbooks

Wouldn't it be a disgrace if we lost the brightest students now attending our nation's schools? Dr. Deborah L. Ruf establishes that there are far more highly gifted children than previously imagined, yet large numbers of very bright children are "never discovered" by their schools. Using 78 gifted and highly gifted children as her examples, she illustrates five levels of giftedness. Parents will be able to estimate which of the five levels of giftedness their child fits by comparing their own child's developmental milestones to those of the children described in the book. This book contains practical advice for parents, including how to find a school that works for your child. Book jacket.
