

# Scientific Journals Impact Factor Ranking

**The Yearbook addresses the overriding question: what are the effects of the 'opening up' of science to the media? Theoretical considerations and a host of empirical studies covering different configurations provide an in-depth analysis of the sciences' media connection and its repercussions on science itself. They help to form a sound judgement on this recent development.**

### **Communication and its Repercussions**

Scientific communication depends primarily on publishing in journals. The most important indicator to determine the influence of a journal is the Impact Factor. Since this factor only measures the average number of citations per article in a certain time window, it can be argued that it does not reflect the actual value of a periodical. This book defines five dimensions, which build a framework for a multidimensional method of journal evaluation. The author is winner of the Eugene Garfield Doctoral Dissertation Scholarship

2011.

Communicate Science Papers, Presentations, and Posters Effectively is a guidebook on science writing and communication that professors, students, and professionals in the STEM fields can use in a practical way. This book advocates a clear and concise writing and presenting style, enabling users to concentrate on content. The text is useful to both native and non-native English speakers, identifying best practices for preparing graphs and tables, and offering practical guidance for writing equations. It includes content on significant

## File Type PDF Scientific Journals Impact Factor Ranking

figures and error bars, and provides the reader with extensive practice material consisting of both exercises and solutions. Covers how to accurately and clearly exhibit results, ideas, and conclusions Identifies phrases common in scientific literature that should never be used Discusses the theory of presentation, including “before and after examples highlighting best practices Provides concrete, step-by-step examples on how to make camera ready graphs and tables

Quantum Probability and Related Topics is a series of volumes based on material discussed at the

## File Type PDF Scientific Journals Impact Factor Ranking

various QP conferences. It aims to provide an update on the rapidly growing field of classical probability, quantum physics and functional analysis.

An analysis of journal rankings based on five commonly used bibliometric indicators (impact factor, article influence score, Source Normalized Impact per Paper, SCImago Journal Rank, and the Hirsch index) has been conducted. It is shown that despite a high correlation, these single indicator-based rankings are not identical. Therefore, a new approach to ranking academic journals is proposed

## File Type PDF Scientific Journals Impact Factor Ranking

based on the aggregation of single bibliometric indicators using threshold aggregation. The main property of this procedure is its non-compensability, which reduces opportunities for manipulation.

Global Higher Education

# File Type PDF Scientific Journals Impact Factor Ranking

## University Rankings

### A Survey

*Global University Rankings explores the novel topic of global university rankings and their effects on higher education in Europe. The contributions in this volume outline different discourses on global university rankings and explore the related changes concerning European higher education policies, disciplinary traditions and higher education institutions. The first global university rankings were published less than a decade ago, but these policy instruments have become highly influential in shaping the approaches and institutional realities of higher education. The rankings have portrayed European academic*

## File Type PDF Scientific Journals Impact Factor Ranking

*institutions in a varying light. There is intense reflexivity over the figures, leading to ideational changes and institutional adaptation that take surprisingly similar forms in different European countries. The contributions in this book critically assess global university rankings as a policy discourse that would seem to be instrumental to higher education reform throughout Europe.*

*The collection contains more than 60 original papers and reflects current research topics in linguistics and text analysis. Most of the papers present recent results of empirical quantitative investigations; others focus on methodological issues, whereas some of them are of a more theoretical, systems-theoretical/semiotic character. Finally, a number of contributions*

## File Type PDF Scientific Journals Impact Factor Ranking

*form typical integrative deductive-inductive studies. The volume is a valuable source of information about the current state-of-the-art in quantitative linguistic research, presented by renowned representatives of the field.*

*Gábor Lövei's scientific communication course for students and scientists explores the intricacies involved in publishing primary scientific papers, and has been taught in more than twenty countries. Writing and Publishing Scientific Papers is the distillation of Lövei's lecture notes and experience gathered over two decades; it is the coursebook many have been waiting for. The book's three main sections correspond with the three main stages of a paper's journey from idea to print: planning, writing, and publishing. Within the book's chapters, complex questions*

## File Type PDF Scientific Journals Impact Factor Ranking

*such as 'How to write the introduction?' or 'How to submit a manuscript?' are broken down into smaller, more manageable problems that are then discussed in a straightforward, conversational manner, providing an easy and enjoyable reading experience. Writing and Publishing Scientific Papers stands out from its field by targeting scientists whose first language is not English. While also touching on matters of style and grammar, the book's main goal is to advise on first principles of communication. This book is an excellent resource for any student or scientist wishing to learn more about the scientific publishing process and scientific communication. It will be especially useful to those coming from outside the English-speaking world and looking for a comprehensive guide for*

## File Type PDF Scientific Journals Impact Factor Ranking

*publishing their work in English.*

*English Abstract: Nowadays to make effective administrative decisions in the sphere of science it has become necessary to create a system of objective assessment of the efficiency of scientific activity. The article highlights the problem of using scientometrical indicators in the evaluation of research results, considers the use of the impact factor as a tool for comparing and ranking scientific journals. It presents a review of existing methods to form the impact factor and analyzes the capabilities of the Russian Science Citation Index to calculate the impact factor of journals on the example of publications in Economics. The analysis results show that the RSCI has accumulated a certain resource, applicable to compare scientific journals. The*

## File Type PDF Scientific Journals Impact Factor Ranking

*impact factor, which can be selected as a basis for ranking, should not be applied without taking into account other factors affecting the citation. It is also important to bear in mind that scientific journals comparing, based on scientometrical indicators, should be confirmed by the expert assessment.*

## File Type PDF Scientific Journals Impact Factor Ranking

This groundbreaking book arrives at a time of growing concern for the future of true scholarship. Calling for coordinated efforts to reorganise the scholarly ecosystem, Morten Huse reflects on the past and looks to the future to uncover a communal approach to scholarship that comprises an open, innovative and impact-driven attitude to research that can change the academic game.

The present study attempts to examine the numerical correlation between web ranking of electronic scientific journals and impact factor of these journals using the method of regression analysis. Regression analysis allows the option of investigating and predicting the numerical

## File Type PDF Scientific Journals Impact Factor Ranking

relationship between website ranking of scientific journals on the World Wide Web and the value of impact factor of the journals. A sample of 57 publishers with 6,272 scientific journals and 50 standalone scientific journals was analyzed during research procedure. In this study, two different indicators about websites classification on World Wide Web were examined separately for 57 publishers and 50 standalone journals, Alexa rank and Statscrop rank. The electronic databases through the internet constitute the main information resources of this study about the impact factors. The general conclusion that arises is that the impact factor of electronic scientific

## File Type PDF Scientific Journals Impact Factor Ranking

journals illustrates a very strong positive correlation with classification of websites on the World Wide Web.

Furthermore, it is concluded that the change of web ranking as a function of impact factor is governed by a Gaussian function or rational function with lower Pearson coefficient and presents non-linearly correlation. Even if there is very strong correlation between impact factor and web rank for electronic journals, the prediction of impact factor from web rank is not possible and presents many divergences.

Delivering quality education to students while remaining competitive at an international level is only one of the

## File Type PDF Scientific Journals Impact Factor Ranking

many challenges universities face today. To attain their goals, universities must adopt new strategies to achieve academic excellence. World University Rankings and the Future of Higher Education is a pivotal reference source for the latest scholarly research on the implementation of a ranking system for higher education institutions, providing a thorough overview of the impacts of these rankings on educational quality. Exploring the benefits and challenges of this system in a global context, this book is ideally designed for academicians, researchers, students, administrators, and policy makers interested in the effects of university rankings in the education sector

## File Type PDF Scientific Journals Impact Factor Ranking

and beyond.

Using an online survey, we have asked the researchers in the field of environmental and resource economics how they themselves would rank a representative list of journals in their field. The results of this ranking are then compared to the ordering based on the journals' impact factors as published by Thomson Scientific. The two sets of rankings seem to be positively correlated, but statistically the null hypothesis that the two rankings are uncorrelated cannot be rejected. This observation suggests that researchers interpret the current quality of journals based on other factors in addition to the impact factors.

Numerical Correlation between Impact Factor and Web Ranking of Electronic Scientific Journals Using Regression Analysis

Who are scientists? What kind of people are they? What capacities and virtues are thought to stand behind their considerable

## File Type PDF Scientific Journals Impact Factor Ranking

authority? They are experts—indeed, highly respected experts—authorized to describe and interpret the natural world widely trusted to help transform knowledge into power and profit. But are they morally different from other people? The Scientific is historian Steven Shapin's story about who scientists are, who think they are, and why our sensibilities about such things matter. Conventional wisdom has long held that scientists are neither better nor worse than anyone else, that personal virtue does not necessarily accompany technical expertise, and that scientific practice is profoundly impersonal. Shapin, however, here shows how the uncertainties attending scientific research make the virtues of individual researchers intrinsic to scientific work. From the early twentieth-century origins of corporate research laboratories to the high-flying scientific entrepreneurship of the present, Shapin argues

## File Type PDF Scientific Journals Impact Factor Ranking

that the radical uncertainties of much contemporary science have made personal virtues more central to its practice than ever before and he also reveals how radically novel aspects of late modern science have unexpectedly deep historical roots. His elegantly conceived history of the scientific career and character ultimately encourages us to reconsider the very nature of the technical and moral worlds in which we now live. Building on the insights of Shapin's last three influential books, featuring an utterly fascinating cast of characters, and brimming with bold and original claims, *The Scientific Life* is essential reading for anyone wanting to reflect on late modern American culture and how it has been shaped.

Management science in engineering (MSE) is playing an increasingly important role in modern society. In particular, the

# File Type PDF Scientific Journals Impact Factor Ranking

development of efficient and innovative managerial tools has significantly influenced the research progress of management science. As research is vital for the propagation of leading-edge methods, journal evaluation and classification are critical for scientists, researchers, engineers, practitioners, and graduate students. This book identifies the main research categories of MSE and evaluates and classifies each MSE journal. It represents the outcome of joint efforts from scientific board members, research fellows, and members of various professional societies. It is ideal for scientists, researchers, practitioners, engineers, graduate students and upper-level undergraduates in engineering management, civil engineering, industrial engineering, environmental engineering, energy engineering, information engineering, and agricultural engineering.

## File Type PDF Scientific Journals Impact Factor Ranking

Examines current issues in journals publishing and reviews how industry will develop over the next few years. With contribution from leading academics and industry professionals, the book provides an authoritative and balanced view of this fast-changing area. There are a variety of views surrounding the future of journals and these are covered using a range of contributors.

Online access is now taken for granted - 90 per cent of journals published are now available online, an increase from 75 per cent in 2003. Looks at a fast moving and vital area for academics and publishers Contains contributions from leading international figures from universities and publishers

The transmission of information transcends time. Since the beginning of humanity, people have shared stories, dreams, wishes and findings. Within a scientific context, the delivery of information

## File Type PDF Scientific Journals Impact Factor Ranking

is especially important. Researchers have been sharing their ideas and building on the work of others for as long as we have studied our world. How can a researcher ensure their ideas will be shared most effectively with the next generation, though? In *How Scientists Communicate*, Alan Kelly accompanies readers through the many processes of scholarly communication within the field of science. The chapters include an analysis of modern scientific communication, an overview of the historical development of scientific communication, the nature and goals of a scientific research paper, as well as practical and applicable information for researchers. The book explores scientific communication from various perspectives, including the writing process, stages of writing, evaluation through peer review, publication, and what happens afterwards. This exploration into scientific writing emphasizes the importance of

## File Type PDF Scientific Journals Impact Factor Ranking

readability and writing for the intended audience. Kelly engages with landmark historical papers, but he doesn't shy away from his own experiences and opinions. This treatise on the art of scientific communication is interesting for readers with various levels of experience, making this book a go-to resource for anyone trying to share their ideas within the scientific community, or interested in how the outputs of science impact our world.

Detailed annotations (100-150 words) on some 500 items focus on articles, books, and book chapters published from 1980 through 1991 and important classic items published prior to 1980. With both scholarly/theoretical and practical how-to perspectives, the book covers material concerning research, university, college, community college, and special libraries. Major chapters discuss an overview of the collection evaluation process, methods and methodology, use studies, availability studies, the RLG Conspectus, serials evaluation (including serials review case studies), citation analysis (including structure of disciplines), journal ranking, standards, and application of automation to the collection evaluation process. The book will be useful to academic library practitioners, students, teachers, and researchers in library and information science education.

This contributed volume contains fourteen papers based on selected

## File Type PDF Scientific Journals Impact Factor Ranking

presentations from the European Conference on Game Theory SING11-GTM 2015, held at Saint Petersburg State University in July 2015, and the Networking Games and Management workshop, held at the Karelian Research Centre of the Russian Academy of Sciences in Petrozavodsk, Russia, also in July 2015. These papers cover a wide range of topics in game theory, including recent advances in areas with high potential for future work, as well as new developments on classical results. Some of these include A new approach to journal ranking using methods from social choice theory; A differential game of a duopoly in which two firms are competing for market share in an industry with network externalities; The impact of information propagation in the model of tax audits; A voting model in which the results of previous votes can affect the process of coalition formation in a decision-making body; The Selten-Szidarovsky technique for the analysis of

## File Type PDF Scientific Journals Impact Factor Ranking

Nash equilibria of games with an aggregative structure; Generalized nucleoli and generalized bargaining sets for games with restricted cooperation; Bayesian networks and games of deterrence; and A new look at the study of solutions for games in partition function form. The maturity and vitality of modern-day game theory are reflected in the new ideas, novel applications, and contributions of young researchers represented in this collection. It will be of interest to anyone doing theoretical research in game theory or working on one its numerous applications.

This ground-breaking and exhaustive analysis of university ranking surveys scrutinizes their theoretical bases, methodological issues, societal impact, and policy implications, providing readers with a deep understanding of these controversial comparators. The authors propose that university rankings are misused by policymakers and

## File Type PDF Scientific Journals Impact Factor Ranking

institutional leaders alike. They assert that these interested parties overlook the highly problematic internal logic of ranking methodologies even as they obsess over the surveys' assessment of their status. The result is that institutions suffer from short-termism, realigning their resources to maximize their relative rankings. While rankings are widely used in policy and academic discussions, this is the first book to explore the theoretical and methodological issues of ranking itself. It is a welcome contribution to an often highly charged debate. Far from showing how to manipulate the system, this collection of work by key researchers aims to enlighten interested parties.

This book, first published in 2002, gathers some of America's top subject expert librarians to determine the most influential journals in their respective fields. 32 contributing authors reviewed journals from over twenty countries that have successfully shaped the evolution of
