This test preparation guide is designed to assist security guards in preparing for the ministry's mandatory test. The guide will outline key areas that security guards should be familiar with to ensure they perform their duties in accordance with the Private Security and Investigative Services Act, 2005 (PSISA) and its regulations. The subjects covered align with the ministry's Training Syllabus for Security Guards. Although the guide is meant to assist candidates in preparing for and writing the test, it does not constitute a training manual, and is not a substitute for an in-person training course. At the end of each section of this test preparation guide, you will find links to external resources that may be of further assistance to you. Many of these will bring you to various laws and regulations; it is recommended that you have an overall understanding of these and how they relate to key topics covered in the test. Other links will bring you to existing training materials available to the public. While these materials may contain valuable information, please keep in mind that they were not specifically designed for Ontario's security guard and private investigator training and testing program.

About the Test The ministry's tests were developed by subject matter experts (SMEs) in the private security and investigative services industry who worked with the ministry's test development consultant, CASTLE Worldwide Inc. The SMEs developed the test questions using a protocol of writing and review that conforms to the best practices of psychological and test development standards. They comprehensively reviewed and validated each question for appropriateness of

the answers and correct answer keys. A panel of SMEs also reviewed and tested the questions and participated in setting the cut scores (pass marks) for the tests. The security guard test is in a written, 60 question, multiple choice format. Test appointments are 2 hours in duration, 75 minutes of which is the allotted test completion time.

The Effective Security Officer's Training Manual, Third Edition teaches today's security officers the most important aspects of performing the job of a security officer professionally and effectively.

The Role of the Security Officer

The Road To Success - A Spider Web Doctrine

All states have different regulations, laws, licensing and requirements for security guards. This is especially true regarding the use of deadly force, power of detain, arrest and many other legal aspects of being a security guard. It is the responsibility of the school, instructor, to know the laws relating to security guard activities for the State, County or City in which they train, and for which they train. These laws and regulations are easy to find and free to print because they are of the public domain. While all states may have different laws, almost all states includes in their armed security guard training and educational requirements firearm knowledge and technical skills so the armed security guard can effectively use a firearm in the defense of

At the age of just 19, JW Murphey didn't have access to large amounts of private security industry experience, a bunch of cash, an eBook or the Internet to help him start his security guard company. But, he didn't want to spend years as another cog inside of a large security corporation. Instead of staying employed with a big corporation, he struck out on his own and started his own security agency. Now, in its 4th edition, published by The Security Officer Network, the popular How to Start a Security Guard Company book includes Murphey's creative strategies for building a private security agency with a minimal up-front investment. This isn't another generic "how to form a business" book. You will easily find a plethora of free resources on the Internet where you can learn business startup basics. This book won't waste your time repeating this information; instead, readers receive immediately actionable advice that's specifically

tailored to the private security industry. Written by an author who actually started his own agency, the book details his innovative approaches and strategies; imparts instruction on quantifying the cost of providing security services; gives tips for under bidding and competing against the big security companies; details tricks to minimize overhead and keep costs low and much, much more. Constantly updated and relevant, with the most recent update made in December of 2017, the book includes an array of helpful, must-have resources including a private security business plan and numerous free-to-use forms and templates.

Capitalist Nigger

Arizona

Capitalist Nigger is an explosive and jarring indictment of the black race. The book asserts that the Negroid race, as naturally endowed as any other, is culpably a non-productive race, a consumer race that depends on other communities for its culture, its language, its feeding and its clothing. Despite enormous natural resources, blacks are economic slaves because they lack the 'devil-may-care' attitude and the 'killer instinct' of the Caucasian, as well as the spider web mentality of the Asian. A Capitalist Nigger must embody ruthlessness in pursuit of excellence in his drive towards achieving the goal of becoming an economic warrior. In putting forward the idea of the Capitalist Nigger, Chika Onyeani charts a road to success whereby black economic warriors employ the 'Spider Web Doctrine' – discipline, self-reliance, ruthlessness – to escape from their victim mentality. Born in Nigeria, Chika Onyeani is a journalist, editor and former diplomat. With clear explanations and detailed subject review this concise guide prepares you to pass the unarmed security examination. Offered by private security companies, unarmed security schools and state licensing authorities, the exam tests the participants' knowledge of security industry best practices, report taking, licensing laws and much more. Upon completion of this guide, readers are given access to the free online practice testing engine and are allowed to retake the practice test as many times as

necessary. The guide is the official unarmed test prep of The Security Officer Network. It is a must have for any officer who plans to take the test or just wants to brush up on his or her security knowledge. The Security Officer's Handbook fulfills the distinct need for a single method of setting up the field operations needed to provide adequate protection to the client, firm or individual. The Standard Operating Procedure System asks all the questions required to survey any protection objective. In addition, the system provides all the basic information needed to answer those questions and leads to the implementation of the tactical or mission standard operating procedure. The Standard Operating Procedure System may be applied to any type of security or protection operation and may be modified, expanded or contracted, without needing to rewrite or redesign an existing security program. Details a system to survey, implement, and maintain at full operational effectiveness many types of assets protection programs. Provides the basis for the vital training required by every security or physical
