*Buku ini membincangkan aspek pengurusan sungai menurut undang-undang. Isu yang diketengahkan dan menjadi perkara utama perbincangan ialah sungai yang menjadi sumber utama membekalkan air kepada manusia. Namun, akibat daripada faktor yang pelbagai termasuk aktiviti manusia, kualiti air sungai berada pada tahap yang membimbangkan. Pencemaran yang berlaku terhasil daripada pembuangan sisa industri, domestik dan sebagainya menjejaskan kualiti air sungai yang sepatutnya membekalkan air bersih untuk kehidupan. Undang-undang dilihat sebagai salah satu mekanisme luaran yang mampu menjamin pengurusan sungai yang sempurna supaya terhindar dari sebarang unsur pencemaran. Selain itu, kerangka perundangan yang sedia ada diaplikasi di Malaysia menjadi punca perwujudan kerangka institusi yakni agensi atau jabatan yang ditubuhkan bagi tujuan melaksana dan menguatkuasakan perundangan tersebut. Atas dasar ini maka skop perbincangan adalah tertumpu kepada tiga perkara iaitu masalah pencemaran dan pengurusan sungai, peruntukan undang-undang yang terpakai di Malaysia, dan agensi yang terlibat dalam melaksana dan menguatkuasakan undang-undang.*

*Port work is still considered an occupation with very high accident rates. This essential code of practice, intended to replace both the second edition of the ILO Code of Practice on Safety and Health in Dock Work (1977) and the ILO Guide to Safety and Health in Dock Work (1976), provides valuable advice and assistance to all those charged with the management, operation, maintenance and development of ports and their safety. Offering many detailed technical illustrations and examples of good practice, the provisions of this code cover all aspects of port work where goods or passengers are loaded or unloaded to or from ships. It is not limited to international trade but applies equally to domestic operations, including those on inland waterways. New topics are: traffic and vehicular movements of all types; activities on shore and on ship; amended levels of lighting provision; personal protective equipment; ergonomics; provisions for disabled persons; and the specific handling of certain cargoes, for example logs, scrap metal and dangerous goods.*

*The design and implementation of an ISO 14001 environmental management system (EMS) need not be complicated or costly, and this book focuses on getting a basic yet effective EMS in place with minimal effort so that the organization can move quickly towards the environmental performance improvements that will be needed to meet the growing international demand for corporate environmental stewardship. The real benefit of ISO 14001 is that it can significantly improve an organization's environmental performance while greatly improving its bottom line at the same time. Unfortunately, most companies that have implemented ISO 14001 have not yet moved beyond compliance and have not yet realized these dual benefits. In order to support the goal of quick and easy ISO 14001 implementation, dozens of tools, checklists, procedure templates, and spreadsheets applicable to organizations of all sizes are provided on an accompanying CD-ROM. These tools not only speed the design and implementation of the EMS, they also provide for efficient and effective ongoing maintenance of the system.*

**What if we allow speculation, messiness and befoggedness to set the conditions for documentary gestures and practices? Contemporary documentary practice has a crucial role to play within art, mainstream media and activism. It constitutes less a genre, and more ?a critical method? in its own right. How can we rethink the documentary attitude conceptually, formally and methodologically? Uncertainty has become documentary?s given. What if this unfinished business of the documentary, creates even more possibilities for speculation and imagination? How can we make decentralized, deformatted and polycentric documentaries, even if we assume that we will never fully succeed? 00Trigger #2 on the issue of UNCERTAINTY is made in collaboration with The School of Speculative Documentary (associated with KASK Conservatorium / School of Arts Gent in Belgium) and FOMU (Photography Museum, Antwerp). With contributions by, amongst others, Liz Orton, Petra Van Brabant, T.J. Demos, Duncan Forbes, Max Pinckers, Georges Senga, Hoda Afshar, Fred Ritchin and Wilco Versteeg.**

Corporate governance principles provide guidance on how corporations should operate. Adoption of international corporate governance best practices leads to long-term sustainability and resilience, and can be a competitive tool to attract foreign investments. The Asian Development Bank, in partnership with the ASEAN Capital Markets Forum, have jointly developed the ASEAN Corporate Governance Scorecard, an assessment based on publicly available information and benchmarked against international best practices that encourage publicly listed companies to go beyond national legislative requirements. This report can be used by capital market regulators and other stakeholders as a reference to understand the current corporate governance standards across the region. It is also a useful diagnostic tool to guide improvement of corporate governance standards.
