In today’s pluralistic society, not every approach to sharing the gospel will work with all people. Being ready to give reasons for the hope we have in Christ means understanding the contextual framework of the people we are addressing. In the Holman QuickSource Guide to Christian Apologetics, Renaissance man Doug Powell defends the Christian faith in a new key; taking timehonored approaches in apologetics and freshly presenting them for a new generation. Chapters include: 1. What Is Apologetics? 2. The Cosmological Argument for God’s Existence 3. The Teleological Argument for God’s Existence 4. The Axiological Argument for God’s Existence 5. Which God Exists? 6. Where Did the New Testament Come From? 7. Is the New Testament Reliable? 8. ExtraBiblical Evidence for Jesus 9. Is the Old Testament Reliable? 10. The Fulfillment of Prophecy 11. What About Miracles? 12. Was Jesus Raised from Death? 13. Did Jesus Claim to Be God? Is He the Only Way? 14. How can God allow Evil, Pain, and Suffering?

In 1972, Bob Cohen, an American science teacher serving in the Peace Corps, found himself halfway around the world, in the holy village of Mayapur, West Bengal, on a search for spiritual enlightenment. There, in a small bamboo hut, he found a teacher able to answer his questions. Perfect Questions, Perfect Answers is the record of his transformative talks with Srila Prabhupada.

This book is a practical guide to using Argus Developer, the world’s most widely used real estate development feasibility modeling software. Using practical examples and many case studies, it takes readers beyond basic training and provides the in-depth knowledge required to analyze potential real estate deals and help ensure a profitable development. Argus Developer in Practice fills an important gap in the market. Argus Developer, and its predecessor Circle Developer, has long had a dominant position as the primary real estate development appraisal tool. It is used all over the world on a variety of projects ranging from simple residential projects to huge and complex master planned, mixed-use, commercial, residential, and leisure projects. It also shines when used to appraise "refurbs"—taking an existing building or complex and upgrading it or turning it into something entirely different. Argus Developer in Practice,the first book that concentrates on the practical application and use of the program, goes beyond the manual that comes with it by taking you through the development/project appraisal process step by step. In addition, author Tim Havard has over 25 years of experience in carrying out development appraisals both in practice and in teaching at the postgraduate level in UK and Australian universities. He started using the DOS version of Circle Developer in 1990, then worked for both Circle and Argus training clients on the software in the UK, continental Europe, and the Middle East. Besides showing you how to use the program, Havard shows you how to think like a successful real estate developer. Using an extensive array of screenshots, Argus Developer in Practice delves deeply into practical use of the program by offering case studies of varying complexity that will help real estate professionals not just analyze development projects but also learn how the best minds in real estate analyze a project’s potential. You will learn: How to model both simple projects and complex mixed-use and multi-phased investment schemes How to model new uses for existing properties How to think through real estate project problems How to analyze a potential development project in depth By using the program efficiently and making use of its more advanced features, you can help ensure a profitable project without the surprises that accompany most real estate ventures. Argus Developer in Practice therefore provides something priceless—peace of mind.

This book provides a complete snapshot of the field of computer-aided drug design and associated experimental approaches. Topics covered include X-ray crystallography, NMR, fragment-based drug design, free energy methods, docking and scoring, linear-scaling quantum calculations, QSAR, pharmacophore methods, computational ADME-Tox, and drug discovery case studies. A variety of authors from academic and commercial institutions all over the world have contributed to this book, which is illustrated with more than 200 images. This is the only book to cover the subject of structure and ligand-based drug design, and it provides the most up-to-date information on a wide range of topics for the practising computational chemist, medicinal chemist, or structural biologist. Professor Kenneth Merz has been selected as the recipient of the 2010 ACS Award for Computers in Chemical & Pharmaceutical Research that recognizes the advances he has made in the use of quantum mechanics to solve biological and drug discovery problems.

Set against the backdrop of one of the most colorful countries in the world, A Glimpse of Eternal Snows is an inspiring story of courage, love and a family’s determination to give their child the best life possible. In pulsating, polluted Kathmandu and an idyllic village on a river island at the foot of the Himalayas, ‘Doctor Jane’ and her engineer husband Simon hope to make a difference: Jane to fulfil her vision to heal and advocate for the poor, Simon to avert the floods that threaten to devastate the land every monsoon season. The Nepali people are accepting of whatever fate flings at them and here the family find sanity, compassion and joy with baby David, who in England was little more than an ‘interesting case’. This is a tale of Himalayan highs and monsoon lows, of cultural complexities, unexpected wildlife and rugged terrain, of vivid color, superstition and spicy smells.

When it comes to knitting, who knows better than our nan? If you get tangled in a ball of wool, she's always the first person you call to help you sort your cross stitch from your cable. While recruiting for her fledgling online knitwear company, Katie Mowat swiftly realised that it was mainly older women, namely grannies, who were volunteering their services, and so Grannies Inc. was born. Since 2009 they have gone from strength to strength, and from one product (beanies), they now design and produce a whole range of knitwear. Her crack squad of 15 grannies will be contributing their 'purls' of wisdom and patterns to help the new knitting generation in this attractive book. With knitting patterns, snoods, legwarmers, slouch socks, laptop cases and beanies, you'll be cool and cosy in no time. As the grannies say, 'May your bobbin always be full.'

From youth culture to adolescent sexuality to the consumer purchasing power of children en masse, studies are flourishing. Yet doing research on this unquestionably more vulnerable—whether five or fifteen—population also poses a unique set of challenges and dilemmas for researchers. In Representing Youth, Amy Best has assembled an important group of essays that address these concerns head on, providing scholars with thoughtful and often practical answers to their many methodological concerns. These original essays range from how to conduct research on youth in ways that can be empowering for them, to issues of writing and representation, to respecting boundaries and to dealing with issues of risk and responsibility to those interviewed.Contributors include: Amy L. Best, Sari Knopp Biklen, Elizabeth Chin, Susan Driver, Marc Flacks, Kathryn Gold Hadley, Madeline Leonard, C.J. Pascoe, Rebecca Raby, Alyssa Richman, Jessica Taft, Michael Ungar, Yvonne Vissing, and Stephani Etheridge Woodson.
