In order to establish technical prerequisites for efficient electronic business and education on the Internet, appropriate system support is needed as a vital condition for maximization of both short-term and long-term profits. Electronic Business and Education: Recent Advances in Internet Infrastructures

Online Library Service Manual Samsung Vc 9640 File Type

discusses current research topics in the domain of system support for e-business and e-education on the Internet, and stresses the synergistic interaction of these two components. Attention is given to both scientific and engineering issues. Electronic Business and Education: Recent Advances in Internet Infrastructures is suitable as a secondary text for a graduate level course and as a reference for

This book covers the nutritional and nutraceutical profiles

Online Library Service Manual Samsung Vc 9640 File Type

of a wide range of popularly consumed vegetables and nuts. The first half of the book focuses on popular vegetables, and describes how higher vegetable consumption reduces the risk of diseases ranging from diabetes to osteoporosis, diseases of the gastrointestinal tract, cardiovascular diseases, autoimmune diseases and cancer. The book also includes an interesting section on the antioxidant

Online Library Service Manual Samsung Vc 9640 File Type

potential of mushrooms. In turn, the second half discusses the nutritional value of various nuts. Nuts are nutrient-dense foods with complex matrices rich in unsaturated fats, high-quality protein, fiber, minerals, tocopherols, phytosterols and phenolics. The respective chapters illustrate how the consumption of nuts could ward off chronic diseases like hypertension, cancer,

Online Library Service Manual Samsung Vc 9640 File Type

inflammation, oxidative stress, high blood pressure, coronary heart disease etc. In order to effectively promote vegetable and nut consumption, it is necessary to know and understand the nutritional and nutraceutical profiles of vegetables & nuts. Given its scope, the book will be of interest to students, researchers, food scientists, olericulturists, dietitians and

and predominantly autonomous researchers from around the globe collect and share information better than ever—yet, there is still a lack of an effective centralized structure for an R&D organization manager to integrate the efforts from many disparate individuals into a unified plan. Managing Research, Development, and Innovation, Third Edition covers the management skills and leadership theories essential to generating products and excelling in today's global economy. Topics of interest include how to design jobs, organize hierarchies, resolve conflicts, motivate employees, and create an innovative work environment. Discover how superior management skills can

The condition of the fuel and energy sector reflects the state of the economy around the world. New technologies in the energy sector and management of its development, together with a dynamically changing environment, as well as care for sustainable development and energy security, make the energy and automotive industry the most important sectors of the economy, whose dynamic

Online Library Service Manual Samsung Vc 9640 File Type

development has been observed for many years. It should be emphasized that an important factor mobilizing the search for modern technologies, especially in energy and transport, is progressive climate change, closely related to greenhouse gas emissions. The Special Issue "Bioenergy and Biofuels" of the journal Sustainability was dedicated to the publication of works on obtaining energy from biological sources. Obviously, bio-based biomass contains mainly carbon and hydrogen and can be converted into various types of fuel or burned directly to provide heat. From the composition of biomass, it can be easily deduced that its combustion mainly causes the emission of carbon dioxide

Online Library Service Manual Samsung Vc 9640 File Type

and water. Carbon dioxide from biomass is assumed to have been absorbed from the atmosphere during plant growth and will be reabsorbed. Therefore, it is not a source of climate warming, and it only temporarily increases the concentration of carbon dioxide in the atmosphere. This situation is the main reason for the use of plant biomass for energy purposes. Due to the variety of applications, there are many technologies for obtaining energy from biomass. New technologies for obtaining as well as technologies for converting bio-based fuels into various forms of energy may also emerge. The use of renewable energy sources is governed by a number of legal provisions on various aspects of

the conversion of biomass into fuels, the use of waste biomass, etc.

This book provides essential knowledge for creating treatment plans for adult dental patients. Treatment planning strategies are presented to help with balancing the ideal with the practical, with emphasis placed on the central role of the patient – whose needs should drive the treatment planning process. The focus is on planning of treatment, not on the comprehensive

details of every treatment modality in dentistry. CD-ROM bound into book presents five cases of varying difficulty with interactive exercises that allow users to plan treatment. What's the Evidence? boxes link clinical decision-making and treatment planning strategies to current research. In Clinical Practice boxes highlight specific clinical situations faced by the general dentist. Review Questions and Suggested Projects, located at the end of each chapter, summarize

and reinforce important concepts presented in the book. Key Terms and Glossary highlights the terms that are most important to the reader. Suggested Readings lists included at the end of most chapters provide supplemental resources. Chapter on Treatment Planning for Smokers and Patients with Oral Cancer addresses the dentist's role in managing patients with oral cancer, recognizing oral cancer and differential diagnosis of oral lesions, planning treatment for

patients undergoing cancer therapy, and smoking cessation strategies.

Chapter on Treatment Planning for the Special Care/Special Needs Patient examines the role of the general dentist in the management of patients with a variety of conditions including physical handicaps, mental handicaps, head trauma, hemophilia, and patients' needs before, during, or after major surgery. Chapter on Treatment Planning for the Alcohol and Substance Abuser discusses the

challenges of treating this patient population, as well as how to recognize the problem, delivery of care, scope of treatment, and behavioral/compliance issues. Expanded content on Ethical and Legal Issues in Treatment Planning reflects new accreditation guidelines. Dental Team Focus boxes highlight the relevance of chapter content to the dental team. Ethics Topics boxes emphasize the ethical topics found within each chapter. International Tooth Numbering is listed alongside the U.S. tooth

numbers in examples and illustrations.

Geared to primary care practitioners, The Washington Manual® of Outpatient Internal Medicine focuses on common ambulatory medical problems encountered in each medical subspecialty. The book has a quick-reference format similar to The Washington Manual® of Medical Therapeutics, with a standard chapter template, a bulleted style, numerous tables and figures, and a two-color design. All chapters are written by

house staff and faculty at Barnes-Jewish Hospital and Washington University School of Medicine. Coverage includes the traditional internal medicine subspecialties and other areas where problems are frequently seen in the ambulatory setting, such as dermatology, neurology, ophthalmology, otolaryngology, and psychiatry. Most subspecialties have separate symptom- and disease-based chapters. The Washington Manual® is a registered mark belonging

Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators

were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation. encourage farmers to grow high-protein food legume crops in their fields for domestic consumption. This, however, could be possible if farmers are provided with new cultivars with high yield, and resistance to major insects, diseases, and key abiotic stresses. The major food legume crops are chickpea, cowpea, common bean, groundnut, lentil, pigeonpea, and soybean. Predominantly, the legume crops are grown under a subsistence level and, therefore, in comparison to cereals and

horticultural crops their productivity is low and highly variable. The crop breeders around the globe are engaged in breeding suitable cultivars for harsh and changing environments but success has been limited and not up to needs. With the recent development of new technologies in plant sciences, efforts are being made to help underprivileged farmers through breeding new cultivars which will produce more protein per unit of land area. In this book, the contributors analyze the

constraints, review new technologies, and propose a future course of crop breeding programs in seven cold and warm season legume crops.
