“ Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound

turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley

hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids

(because fewer kids

smarter kids). Conley
encourages parents
to draw on the latest
data to rear children,
if only because that
level of engagement
with kids will produce

solid and happy ones.

Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley 's sassy kids show him the limits of his profession.
