This is an account of the wanderings of a spiritualist, geographical and speculative. Should the reader have no interest in psychic things-if indeed any human being can be so foolish as not to be interested in his own nature and fate, -then this is the place to put the book down. It were better also to end the matter now if you have no patience with a go-as-you-please style of narrative, which founds itself upon the conviction that thought may be as interesting as action, and which is bound by its very nature to be intensely personal. I write a record of what absorbs my mind which may be very different from that which appeals to yours. But if you are content to come with me upon these terms then let us start with my apologies in advance for the pages which may bore you, and with my hopes that some may compensate you by pleasure or by profit. I write these lines with a pad upon my knee, heaving upon the long roll of the Indian Ocean, running large and grey under a grey streaked sky, with the rain-swept hills of Ceylon, just one shade greyer, lining the Eastern skyline. So under many difficulties it will be carried on, which may explain if it does not excuse any slurring of a style, which is at its best but plain English. There was one memorable night when I walked forth with my head throbbing and my whole frame quivering from the villa of Mr. Southey at Merthyr. Behind me the brazen glare of Dowlais iron-works lit up the sky, and in front twinkled the many lights of the Welsh town. For two hours my wife and I had sat within listening to the whispering voices of the dead, voices which are so full of earnest life, and of desperate endeavours to pierce the barrier of our dull senses. They had quivered and wavered around us, giving us pet names, sweet sacred things, the intimate talk of the olden time. Graceful lights, signs of spirit power had hovered over us in the darkness. It was a different and a wonderful world

Captain Peter, called also "Black Peter" because of his dark moods, is found dead. The police inspector Hopkins tries to find the murderer but without any success. He then contacts Holmes asking him for help with the case. Holmes and Hopkins are at the crime scene where they decide to hide and see if the guilty one will show up again. And then a young man enters the room. What happened afterwards? Did they catch the murderer or there is something more to the story? Will Holmes solve the case or this one will be harder than expected? Sir Arthur Conan Doyle (1859-1930) was born in Scotland and studied medicine at the University of Edinburgh. After his studies, he worked as a ship's surgeon on various boats. During the Second Boer War, he was an army doctor in South Africa. When he came back to the United Kingdom, he opened his own practice and started writing crime books. He is best known for his thrilling stories about the adventures of Sherlock Holmes. He published four novels and more than 50 short-stories starring the detective and Dr Watson, and they play an important role in the history of crime fiction. Other than the Sherlock Holmes series, Doyle wrote around thirty more books, in genres such as science-fiction, fantasy, historical novels, but also poetry, plays, and non-fiction.

The Adventure of Black Peter

Prontuario delle più efficaci strategie per l'automiglioramento, la competizione ed il problem solving

The New York Times bestselling guide to thinking like literature's greatest detective. "Steven Pinker meets Sir Arthur Conan Doyle" (Boston Globe), by the author of The Confidence Game. No fictional character is more renowned for his powers of thought and observation than Sherlock Holmes. But is his extraordinary intellect merely a gift of fiction, or can we learn to cultivate these abilities ourselves, to improve our lives at work and at home? We can, says psychologist and journalist Maria Konnikova, and in Mastermind she shows us how. Beginning with the "brain attic"—Holmes's metaphor for how we store information and organize knowledge—Konnikova unpacks the mental strategies that lead to clearer thinking and deeper insights. Drawing on twenty-first-century neuroscience and psychology, Mastermind explores Holmes's unique methods of ever-present mindfulness, astute observation, and logical deduction. In doing so, it shows how each of us, with some self-awareness and a little practice, can employ these same methods to sharpen our perceptions, solve difficult problems, and enhance our creative powers. For Holmes aficionados and casual readers alike, Konnikova reveals how the world's most keen-eyed detective can serve as an unparalleled guide to upgrading the mind.

His Last Bow is a collection of previously published Sherlock Holmes stories by Arthur Conan Doyle, including the titular short story, "His Last Bow. The War Service of Sherlock Holmes" (1917). The collection's first US edition adjusts the anthology's subtitle to Some Later Reminiscences of Sherlock Holmes. All editions contain a brief preface, by "John H. Watson, M.D.", that assures readers that as of the date of publication (1917), Holmes is long retired from his profession of detective but is still alive and well, albeit suffering from a touch of rheumatism.

A dazzling collection of rare art and documents illuminate the life of Sherlock Holmes beyond the page. As one of the most beloved characters in the English language, Sherlock Holmes sometimes seems to have a life of his own, one that leaps beyond the pages of Sir Arthur Conan Doyle's mystery stories. Sherlock Holmes in 221 Objects aims its magnifying glass toward a host of overlooked extra-literary objects that tell the story of the famed detective's publication history outside of Doyle's original canon.

Drawing on his extensive collection of Holmes-related bibliographic material, Glen Miranker brings to light exhibits ranging from original manuscripts, handwritten letters, business correspondence, vintage book art, pirated editions, and more, all presented in thematic clusters that highlight their significance to the case at hand. Throughout, Miranker invites readers to share in the collector's enthusiasm for the kinds of rarities and oddities that help decipher the appeal of Sherlock Holmes in ways that transcend what can be found on the page.
