By the time a student who has reading problems reaches adolescence, patterns of avoidance, denial, and resistance may hinder classroom participation. Now, this new book will show you how to convince a student who is mistakenly labeled as unmotivated and without goals that academic success is attainable. Never Too Late to Read provides tips, techniques, and strategies you can easily implement. This practical and timely book describes typical students with dyslexia and leads you step-by-step through the process of evaluating and teaching them. Throughout this book, Alice Ansara's caring, wisdom, commitment, and practice will guide you. You'll build upon her belief that teaching must take place simultaneously on two levels -- enabling students to meet the academic requirements for their classes and helping them overcome specific language deficits. Most important, you'll learn how to do both. Page after page, you'll find lists upon lists of words you can give your students to teach them about specific spelling rules ... the six kinds of syllables ... and roots, prefixes, and suffixes. You'll also find ideas you can use to develop exercises in phonics, spelling, and phrasing

This book provides resources for teachers of older children and adults, who want to use phonics to help learners who struggle with reading and spelling. Phonics Stories for Older Learners provides a story at each level presented in the same phonic progression as its companion book, Phonics Resources for Older Learners. Each story is one A4 sheet and is accompanied by a comprehension exercise. The book comprises of two sections: Section One contains the English Alphabet Code in its simplest form. It deals with the single letter sounds and consonant digraphs within CVC words at first, gradually increasing the level of difficulty to 5-sounds such as CCCVC. Section Two looks at the main vowel sounds in our language and presents the varying spellings that we use to represent them. Along with its companion book Phonics Resources for Older Learners, this is the perfect teaching resource for teachers of older children, as well as tutors in Adult Literacy and ESOL classes.

Gram's new pet cat, Pepper is playing hide and seek. Read what Gram and Dan do to charm Pepper out of his hiding spot. This A-level story uses engaging text to raise confidence in early readers. The book uses a combination of sight words and short-vowel words in repetition to build recognition. Original illustrations help guide readers through the text. Author Cecilia Minden, PhD, a literacy consultant and former director of the Language and Literacy program at Harvard Graduate School of Education developed a specific format for this series. Books in this series include author biography, phonetics, and teaching guides.

These days, it seems that everyone has a strong opinion about how to teach young children to read. Some may brush off the current tension as nothing more than one more round of "the reading wars." Others may avoid the clash altogether due to the uncivilized discourse that sometimes results. Certainly, sorting the signal from the noise is no easy task. In this leading-edge book, authors Jan Burkins and Kari Yates address this tension as a critical opportunity to look closely at the research, reevaluate current practices, and embrace new possibilities for an even stronger enactment of balanced literacy. From phonological processing to brain research to orthographic mapping to self-teaching hypothesis, Shifting the Balance cuts through the rhetoric (and the sciencey science) to offer readers a practical guide to decision-making about beginning reading instruction. The authors honor the balanced literacy perspective while highlighting common practices to reconsider and revise--all through a lens of what's best for the students sitting in front of us. Across six shifts, each chapter identifies a common instructional practice to reconsider explores various misunderstandings that establish and keep that practice in play shares scientific research to support its reconsideration proposes an instructional shift to apply a new perspective, and details several high-leverage instructional routines to support implementation of that shift. By pinpointing gaps and overlaps--as well as common misunderstandings and missed opportunities between the competing lines of thought--Jan and Kari offer busy educators direction and clarification for integrating science and balance into their daily instruction, while keeping meaningful experiences with text a priority.

Sounds are grouped into seven sets, with each set containing more than 50 engaging activities, including: sound story, dynamic blending, reading race, spot the word and spelling challenge. Thorough guidance is provided on how to deliver each activity, as well as a lesson planner template, handy word lists and posters for teachers and teaching assistants to use to support learning.
