The Blackberry Passport was released on September 2014. It is uniquely designed and may not be for everyone. It does however feature a long lasting battery and a lot of storage space which has earned it a number of high reviews. The downfalls are the limited apps available and the difficulty faced when trying to operate the device one handed. The customisations are not much when compared to its competitors, but the Passport allows you make significant changes to suit each user and enhance their overall experience with the device.

And yet--perhaps because the ubiquity of email has obscured its study--this is the first scholarly book devoted to email as a key historical, social, and commercial site of digital communication in our everyday lives. In *Email and the Everyday*, Esther Milne examines how email is experienced, understood, and materially structured as a practice spanning the domestic and institutional spaces of daily life. A top SAT coach—whose high-scoring strategies earned him \$300 an hour from Manhattan's elite private-school students—now makes his unique, proven secrets available to all.
