**From the #1 New York Times best-selling author of *The Darkest Minds* comes a sweepingly ambitious, high-octane tale of power, destiny, love, and redemption. Every seven years, the Agon begins. As punishment for a past rebellion, nine Greek gods are forced to walk the earth as mortals. They are hunted by the descendants of ancient bloodlines, all eager to kill a god and seize their divine power and immortality. Long ago, Lore Perseous fled that brutal world, turning her back on the hunt's promises of eternal glory after her family was murdered by a rival line. For years she's pushed away any thought of revenge against the man—now a god—responsible for their deaths. Yet as the next hunt dawns over New York City, two participants seek her out: Castor, a childhood friend Lore believed to be dead, and Athena, one of the last of the original gods, now gravely wounded. The goddess offers an alliance against their mutual enemy and a way to leave the Agon behind forever. But Lore's decision to rejoin the hunt, binding her fate to Athena's, will come at a deadly cost—and it may not be enough to stop the rise of a new god with the power to bring humanity to its knees.**

**In December of 1938, a chemist in a German laboratory made a shocking discovery: When placed next to radioactive material, a Uranium atom split in two. That simple discovery launched a scientific race that spanned 3 continents. In Great Britain and the United States, Soviet spies worked their way into the scientific community; in Norway, a commando force slipped behind enemy lines to attack German heavy-water manufacturing; and deep in the desert, one brilliant group of scientists was hidden away at a remote site at Los Alamos. This is the story of the plotting, the risk-taking, the deceit, and genius that created the world's most formidable weapon. This is the story of the atomic bomb. *Bomb* is a 2012 National Book Awards finalist for Young People's Literature. *Bomb* is a 2012 Washington Post Best Kids Books of the Year title. *Bomb* is a 2013 Newbery Honor book.**

*"Brilliant. . . . Lewis has given us a spectacular account of two great men who faced up to uncertainty and the limits of human reason." –William Easterly, Wall Street Journal Forty years ago, Israeli psychologists Daniel Kahneman and Amos Tversky wrote a series of breathtakingly original papers that invented the field of behavioral economics. One of the greatest partnerships in the history of science, Kahneman and Tversky's extraordinary friendship incited a revolution in Big Data studies, advanced evidence-based medicine, led to a new approach to government regulation, and made much of Michael Lewis's own work possible. In The Undoing Project, Lewis shows how their Nobel Prize-winning theory of the mind altered our perception of reality.*

*Throughout his life, Richard Hoggart has been involved with four main areas: broadcasting, arts policy, education, and social work, all of which he finds have characteristics in common. This collection of essays represents less than a quarter of his essays published over the last two decades. The subjects, to which he turned again and again and which recur in public debate, are still current and contemporary. His views on culture and society, on literature and censorship, and on higher education are both unique and timely. The volume is divided into six parts. Part 1, "Society and Culture: Home and Away," discusses the question, "Are museums political?"; the use of the battered word culture in relation to UNESCO; and the end of the public service idea. Part 2, "A Very English Voice," looks at the rural English culture and country of D. H. Lawrence, and examines the controversy and censorship involved with three of Lawrence's works: The Rainbow, Women in Love, and Lady Chatterley's Lover. Part 3, "Politics and Literature," reveals the author's penchant for timely debates on such subjects as "The State versus Literature" and*

*"Freedom to Publish: Even Hateful Stuff"; and his thoughts on reviewers and reviewing. Part 4, "Levels of Education," touches upon the subjects of politics in universities; the use of public funds for various purposes presumed to be socially valuable; academics in the marketplace; and the need for government to foster critical and cultivated literacy. Part 5, "Figures from a Distant Past," contains reminiscences on and portraits of Hoggart's close relationships and family. Part 6, "Summing Up and Signing Off," is an interview with Nicolas Tredell in which Hoggart discusses his life's work and concerns. Written in Hoggart's characteristically graceful but direct style, these essays touch on issues of contemporary importance in his unique manner. This volume will be of interest to scholars and general readers interested in culture studies, communications, and education.*

*Leave all the mundane and repetitions of the daily grind behind and all the drama that comes with it and join Devil James into the slow-descending trek of the doom and gloom of the dreaded Witchwood Forest. It grows like sinister, haunted old rusty railroad spikes shooting out of the back rural Illinois country roads, spreading over endless miles of sticks that clutter the hills. The same beer cans littered old haunting hills that hold Devils Creek in its cold hypnotizing hands. Lonely places of solitude that illuminate the spirit world are found out here in the mazes of the back country roads of Clinton and Madison County. Come venture out into these twisted old nightmares that cling onto your psyche like the stained sounds of the cicadas buzzing haunting songs over the caws of blackbirds and ravens. Join the Devil James cult and walk among us through the festering clouds of gnats and mosquitoes with the buzzing, croaking sounds of bullfrogs to a place where the stillness beckons you to test your courage. Leave your stress and bullshit all behind and dare to step into the beyond into an eerie solitude of the spirit world where all these sounds vanish into a still silence that holds only the whispering voices of those who reside within. Welcome to a head trip that will leave your poor tattered, battered mind and broken heart guessing every misplaced step along the stumbling path. The clumsy crooked left-hand path of Witchwood Forest will latch on to your every thought and pull it down into a dark descent of mystery, a mystery that will not only set your mind free to a new humility and dignity it so craves and endlessly searches for but a mystery within echoing mysteries that will also unlock the chains of your heart and hand you back the moral compass we all hold so dear. The fourth and final novel in the magnificent saga of Britain ' s warrior queen (Boudica – “ Bringer of Victory ” and the last defender of the Celtic culture) will capture readers ' hearts and minds, as Manda Scott brings the series to a stunning close. It is AD 60 and the flame of rebellion that has been smouldering for 20 years of Roman occupation has flared into a conflagration that will consume the land and all who live in it. There is no going back. Boudica has been flogged and her daughters raped, and her son has burned a Roman watchtower in an act of blatant insurgency. This is the time to act: the Roman governor has marched his legions west to destroy the druidic stronghold of Mona, leaving his capital and a vital seaport hopelessly undefended in the face of twenty-thousand warriors aching for vengeance. But to crush the legions for all time, Boudica must do more than lead her army in the greatest rebellion Britain has ever known. She must find healing for herself, for the land, and for Graine, her 8-year-old daughter, who has taken refuge on Mona. Is revenge worth it under any circumstances, or is the cost more than anyone can bear? Colchester is burning and London is lost without hope. Amidst fire and bloody revolution – a battle that will change the face and spirituality of a nation for centuries to come – Boudica and those around her must find what matters most, now and for ever.

**As a botanist, Robin Wall Kimmerer has been trained to ask questions of nature with the tools of science. As a member of the Citizen Potawatomi Nation, she embraces the notion that plants and animals are our oldest teachers. In *Braiding Sweetgrass*, Kimmerer brings these two lenses of knowledge together to take us on “a journey that is every bit as mythic as it is scientific, as sacred as it is historical, as clever as it is wise” (Elizabeth Gilbert). Drawing on her life as an indigenous scientist, and as a woman, Kimmerer shows how other living beings—asters and goldenrod, strawberries and squash, salamanders, algae, and sweetgrass—offer us gifts and lessons, even if we've forgotten how to hear their voices. In reflections that range from the creation of Turtle Island to the forces that threaten its flourishing today, she circles toward a central argument: that the awakening of ecological consciousness requires the acknowledgment and celebration of our reciprocal relationship with the rest of the living world. For only when we can hear the languages of other beings will we be capable of understanding the generosity of the earth, and learn to give our own gifts in return.**

**For anyone who's ever had the desire to look at the world through the eyes of our indigenous ancestors, here is a unique opportunity. Traveling between the Worlds is a treasure trove of insight and exploration into the ancient spiritual wisdom of such diverse cultures as Ireland, Africa, and the Americas. The keeper of this wisdom is the shaman--a man or woman who can, at will, enter into altered states of consciousness in order to acquire extrasensory knowledge and healing power. In this important book, Hillary S. Webb invites us to eavesdrop on her conversations with some of today's most influential teachers and writers of shamanism. While the conversations cover a variety of topics pertaining to the shaman's path and practice, this book explores how we in the modern world can use these ancient teachings to help ourselves, each other, and the world around us. Included in this book are conversations with:Renowned author and environmentalist John Perkins, who brings corporate executives to the Amazon to teach them the value of merging business and eco-philosophy.Rabbi Gershon Winkler, who uses the beliefs and techniques of the Jewish shamanic tradition to bring Israelis and Palestinians together on common, and more peaceful, ground--their indigenous roots."Renegade" shaman Ken Eagle Feather of the Toltec tradition, who explains how modern technology can help us evolve into the next level of perception.Peruvian shaman Oscar Miro-Quesada, whose ideas on life and death may alter your view of reality itself. And that is just the beginning.**

good school, an arranged marriage. And then there is the world of her dreams: going to film school, living in New York City, pursuing the boy she's liked for ages. But unbeknownst to Maya, there is a danger looming beyond her control. When a terrorist attack occurs in another Midwestern city, the prime suspect happens to share her last name. In an instant, Maya's community, consumed by fear and hatred, becomes unrecognisable, and her life changes forever. Considered by many to be mentally retarded, a brilliant, impatient fifth-grader with cerebral palsy discovers a technological device that will allow her to speak for the first time.

Many world legends suggest that at any given time, seven sages walk the Earth, tasked with the responsibility to anchor wisdom on behalf of humanity. Each one stands as the personification of a different rung of human consciousness. Together, they represent humanity's innate ability to save itself-or doom itself. Earthwhisperer knows the secrets of the Earth, its pleasures, and its pains. Lila understands the nature and workings of sacred pleasure. Solomon has learned how to wield both moral and ethical power. Philomel has captured the art of immaculate loving and heartfelt joy. Dattatreya lives out his version of crazy wisdom with his innovative family. Marianina is fey, with a vast and accurate perspective on the human soul and its cosmic context. Horus is a human sun, the indicator of human destiny, well above normal human consciousness. At this time, the sages have the profound challenge to help humanity reclaim balance, compassion, and hope-when these qualities seem lost forever. Through a whirling cascade of shifts in perception, can the sages inspire each person to embrace his or her unique brand of wisdom in time?"

In celebration of the 45th anniversary of *The Dark Side of the Moon*, Bill Kopp explores the ingenuity with which Pink Floyd rebranded itself following the 1968 departure of Syd Barrett. Not only did the band survive Barrett's departure, but it went on to release landmark albums that continue to influence generations of musicians and fans. *Reinventing Pink Floyd* follows the path taken by the remaining band members to establish a musical identity, develop a songwriting style, and create a new template for the manner in which albums are made and even enjoyed by listeners. As veteran music journalist Bill Kopp illustrates, that path was filled with failed experiments, creative blind alleys, one-off musical excursions, abortive collaborations, general restlessness, and-most importantly-a dedicated search for a distinctive musical personality. This exciting guide to the works of 1968 through 1973 highlights key innovations and musical

breakthroughs of lasting influence. Kopp places Pink Floyd in its historical, cultural, and musical contexts while celebrating the test of fire that took the band from the brink of demise to enduring superstardom.

Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. Transforming the Workforce for Children Birth Through Age 8 explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.

'Nobody owes us anything, but the Simple Minds story has been too condensed. After Live Aid and 'Don't You (Forget About Me)' there hasn't been quite the credit for those first few records. I think they contain some really special music. I can hear the flaws but there's something about the spirit and imagination in them that feels good. They draw from such a wide range of influences ... but the spirit of it was always Simple Minds.' Jim Kerr, to the author An illuminating new biography of one of Britain's biggest and most influential bands, written with the full input and cooperation of Simple Minds, shedding new light on their dazzling art-rock legacy. Themes for Great Cities features in-depth new interviews with original band members Jim Kerr, Charlie Burchill, Mick MacNeil and Derek Forbes, alongside key figures from within their creative community and high-profile fans such as Bobby Gillespie, James Dean Bradfield and Mogwai's Stuart Braithwaite. The book reclaims and revivifies the magnificence of Simple Minds' pioneering early albums, from the glitchy Euro-ambience of Real to Real Cacophony and Empires and Dance to the pulsing, agitated romance of Sons and Fascination, New Gold Dream and beyond. Emerging in 1978 from Glasgow's post-punk scene, Simple Minds transitioned from restless art-rock to electro futurism, mutated into passionate pop

contenders and, finally, a global rock behemoth. They have sold in the region of 60 million records and remain a worldwide phenomenon. The drama of their tale lies in these transformations and triumphs, conflicts and contradictions. Themes for Great Cities tells the inside story of a band becoming a band. Inspiring, insightful and enlightening, it celebrates the trailblazing music of one of Britain's greatest groups.

Enter Cara, whose parallel selves happen to be exceptionally good at dying—from disease, turf wars, or vendettas they couldn't outrun. Cara's life has been cut short on 372 worlds in total. On this dystopian Earth, however, Cara has survived. Identified as an outlier and therefore a perfect candidate for multiverse travel, Cara is plucked from the dirt of the wastelands. Now what once made her marginalized has finally become an unexpected source of power. She has a nice apartment on the lower levels of the wealthy and walled-off Wiley City. She works—and shamelessly flirts—with her enticing yet aloof handler, Dell, as the two women collect off-world data for the Eldridge Institute. She even occasionally leaves the city to visit her family in the wastes, though she struggles to feel at home in either place. So long as she can keep her head down and avoid trouble, Cara is on a sure path to citizenship and security. But trouble finds Cara when one of her eight remaining doppelgängers dies under mysterious circumstances, plunging her into a new world with an old secret. What she discovers will connect her past and her future in ways she could have never imagined—and reveal her own role in a plot that endangers not just her world but the entire multiverse. “Clever characters, surprise twists, plenty of action, and a plot that highlights social and racial inequities in astute prose.” —Library Journal (starred review)

From the roots to the crown and back to the seeds, Richard Powers' s twelfth novel unfolds in concentric rings of interlocking fables that range from antebellum New York to the late twentieth-century Timber Wars of the Pacific Northwest and beyond. There is a world alongside ours—vast, slow, interconnected, resourceful, magnificently inventive, and almost invisible to us. This is the story of a handful of people who learn how to see that world and who are drawn up into its unfolding catastrophe.

A breathtaking work of staggering research and synthesis that provides startling new information and context to the first thirty years of Jesus' life. Where was Jesus for the first thirty years of his life? Where and what was he taught? Who were his teachers? Based on new information culled from hard to find Vatican texts, theosophical classics, ancient texts, legends, and systems of hermetic symbolism, Tricia McCannon constructs a radical new timeline of Jesus' life. She asserts Jesus spent at least seven years of study and training in Egypt, a number of years in England, and visited both India and Tibet before beginning his public ministry in Palestine. This is a wide-ranging examination of the direct links and similarities between Jesus' teachings and those of various Mystery religions and sects that were popular during his lifetime, including the Essenes, Buddhist, Mithrans, Zoroastrians, and Druids. McCannon offers compelling evidence that places Jesus' life and mission firmly in the context of the profound spiritual teachings that came before him. Drawing on records from the Vatican, Tibet, India, and Egypt, along with Greek, Aramaic, and Pali text, as well as oral traditions of Jesus' teachings, McCannon uncovers the real reason that he has remained such a powerful and pivotal figure in world consciousness for over two millennia.

Del risked everything to save Simon, and now he's gone, off in another world with no way for Del to find him. She's back at the Consort—training to be a Walker like everyone in her family. But the Free Walkers have other plans for her. This rebel group is trying to convince Del that the Consort is evil, and that her parents are unwittingly helping the Consort kill millions of people. The Free Walkers make Del the ultimate promise: if**

Del joins their fight, she will be reunited with Simon. In agreeing, Del might be endangering her family. But if she doesn't, innocent people will die, and Simon will be lost to her forever. The fate of the multiverse depends on her choice...

Delancey Sullivan knows for sure that there is more than one universe. Many more. Because every time someone makes a choice, a new, parallel world spins off the existing one. Eating breakfast or skipping it, turning left instead of right, sneaking out instead of staying in bed - all of these choices create an alternate universe in which an echo self takes the road not travelled. Del knows all of this because she's a Walker, someone who can navigate between the worlds, and whose job is to keep the dimensions in harmony. But Del's decisions have consequences too. And when she secretly starts to investigate other dissonant worlds she's intrigued by the echo versions of Simon Lane, a guy who won't give her the time of day in the main world, but whose alternate selves are uniquely interested. But falling for Simon draws Del closer to a truth that the Council of Walkers is trying to hide - a secret that threatens the fate of the entire multiverse.

Book one in the hit series that's soon to be a major motion picture starring Amandla Stenberg and Mandy Moore--now with a stunning new look and an exclusive bonus short story featuring Liam and his brother, Cole. When Ruby woke up on her tenth birthday, something about her had changed. Something alarming enough to make her parents lock her in the garage and call the police. Something that got her sent to Thurmond, a brutal government "rehabilitation camp." She might have survived the mysterious disease that killed most of America's children, but she and the others emerged with something far worse: frightening abilities they cannot control. Now sixteen, Ruby is one of the dangerous ones. But when the truth about Ruby's abilities--the truth she's hidden from everyone, even the camp authorities--comes out, Ruby barely escapes Thurmond with her life. On the run, she joins a group of kids who escaped their own camp: Zu, a young girl haunted by her past; Chubs, a standoffish brainiac; and Liam, their fearless leader, who is falling hard for Ruby. But no matter how much she aches for him, Ruby can't risk getting close. Not after what happened to her parents. While they journey to find the one safe haven left for kids like them--East River--they must evade their determined pursuers, including an organization that will stop at nothing to use Ruby in their fight against the government. But as they get closer to grasping the things they've dreamed of, Ruby will be faced with a terrible choice, one that may mean giving up her only chance at a life worth living.

As Mac delves deeper into the mystery of her sister 's death, her every move is shadowed by the dark, mysterious Jericho, a man with no past and only mockery for a future. As she begins to close in on the truth, the ruthless Vlane—an alpha Fae who makes sex an addiction for human women—closes in on her. And as the boundary between worlds begins to crumble, Mac 's true mission becomes clear: find the elusive Sinsar Dubh before someone else claims the all-powerful Dark Book—because whoever gets to it first holds nothing less than complete control of the very fabric of both worlds in their hands. . . .
