women with headaches during pregnancy and nursing. Although women may ideally prefer to restrict migraine treatments during pregnancy, up to one in three pregnant women self-medicate for symptoms, especially with analgesics. Fortunately, there are many effective treatment options that can be safely used when pregnant and breastfeeding. Available therapies include medication and nonmedication treatments, traditional and alternative therapies, and nutritional supplements. This book uniquely answers frequently asked questions by patients and offers healthcare providers easy-to-use office tools for patient education and charting documentation. The authors of this important new work have collaborated to provide a resource that will help clinicians provide women with the tools and knowledge to become empowered and to gain control over their migraines when
