Level III (Grades 11-13) The hm Learning and Study Skills Program: Level III was designed to provide an introduction to learning and study skills for high school juniors and seniors and beginning college students through a series of activity-oriented units. It is structured on the assumption that an activity-oriented lesson is the most effective instructional strategy for the teaching of study skills: more succinctly, that "learning by doing" is the best way "study smart." Learning and study skills are important for learning. They are methods and ways of doing things that help make learning easier. Understanding how to study can also facilitate learning by assisting students as they complete assignments correctly and efficiently during a specified period of time. Just like any other skill, knowing how to learn and study proficiently must be learned and practiced over time. The Program has been designed to help students learn more efficiently and effectively.

The National Science Education Standards address not only what students should learn about science but also how their learning should be assessed. How do we know what they know? This accompanying volume to the Standards focuses on a key kind of assessment: the evaluation that occurs regularly in the classroom, by the teacher and his or her students as interacting participants. As students conduct experiments, for example, the teacher circulates around the room and asks individuals about their findings, using the feedback to adjust lessons plans and take other actions to boost learning. Focusing on the teacher as the primary player in assessment, the book offers assessment guidelines and explores how they can be adapted to the individual classroom. It features examples, definitions, illustrative vignettes, and practical suggestions to help teachers obtain the greatest benefit from this daily evaluation and tailoring process. The volume discusses how classroom assessment differs from conventional testing and grading and how it fits into the larger, comprehensive assessment system.

The Teacher's Books are conventional in approach and provide a reference to the answer key and audio scripts for exercises, to support teachers new to EAP teaching by providing extra background information on key aspects like critical thinking, to offer additional ideas and support for busy or inexperienced teachers.

Listening, Speaking, and Study Skills. Student's book, Level 1

This is part of the Skills for Fluency series and is intended to develop learners' oral fluency by focusing on topics that are personally relevant to them. The activities are designed to enable students to draw on their own life experiences, feelings and cultural knowledge.

While most children learn to read fairly well, there remain many young Americans whose futures are imperiled because they do not read well enough to meet the demands of our competitive, technology-driven society. This book explores the problem within the context of social, historical, cultural, and biological factors. Recommendations address the identification of groups of children at risk, effective instruction for the preschool and early grades, effective approaches to dialects and bilingualism, the importance of these findings for the professional development of teachers, and gaps that remain in our understanding of how children learn to read. Implications for parents, teachers, schools, communities, the media, and government at all levels are discussed. The book examines the epidemiology of reading problems and introduces the concepts used by experts in the field. In a clear and readable narrative, word identification, comprehension, and other processes in normal reading development are discussed. Against the background of normal progress, Preventing Reading Difficulties in Young Children examines factors that put children at risk of poor reading. It explores in detail how literacy can be fostered from birth through kindergarten and the primary grades, including evaluation of philosophies, systems, and materials commonly used to teach reading.

A timely story by witty wordsmith Jaimie Scanlon, complete with richly detailed, whimsical illustrations by Ellen Tumavicus; Ralph Rooster takes children on a round-the-world journey, capturing the power of travel and language learning to connect us with others and teach us about ourselves. Flying the coop by the light of dawn, he embarks on a horizon-expanding global adventure.With plucky travel companion Goose by his side, Ralph visits colorful, far-flung destinations, making friends and learning to say "Cock a doodle doo!" in the local language. In each new location, he embraces the opportunity to engage in enriching cultural experiences samba dancing in Rio, visiting the Great Pyramid on camelback, learning tai chi in Beijing which begin to transform his character both inside and out. Ralph returns to the farm a humbler, wiser global citizen with a new appreciation for home and community, and a desire to share all the wonders the world has in store.Ralph's journey reminds us all that great things can happen when we put aside fear and embrace what is new and different."
