An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of *Battle Hymn of the Tiger Mother*). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. *Parentology* teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time.

The chanting of the cultists came drifting with the breeze. Dorael-RI had tracked them all the way from the settlement of Merel, at the border of Davokar. A small, human child one of few to survive the massacre had asked how he dared to travel the woods alone. In Davokar you are never alone, he had answered. Not me, nor you, no one Aided by mystical rituals Dorael had managed to follow the cold tracks, but now the enemy was close enough for his friend and servant, the owl Strigi, to take over the hunt. He raised his black sword, took a deep breath and placed the Horn Mask over his face; vengeful spirits immediately flocked around him, veiling him from the world. The sword quivered in his hand, hungere for tainted flesh and blood. Soon my dear, soon, he whispered. For this enemy, simpler steel will do. He put the hallowed sword back in its scabbard and drew the shorter blade that had belonged to his sister. Soon he lunged through the forest, with Strigi soaring at his side. The first enemy fell before any of the cultists realized that the avenger had come.
