When Fort Sumter was attacked in April 1861, hundreds of soldiers were stationed at the U.S. Army's Camp Floyd, forty miles southwest of Salt Lake City. The camp, established in June 1858, was the nation's largest military post. Utah and the American Civil War presents a wealth of primary sources pertaining to the territory's participation in the Civil War—material that until now has mostly been scattered, incomplete, or difficult

to locate. Organized and annotated for easy use, this rich mix of military orders, dispatches, letters, circulars, battle and skirmish reports, telegraph messages, command lists, and other correspondence shows how Utah's wartime experience was shaped by a peculiar blend of geography, religion, and politics. Editor Kenneth L. Alford opens the collection with a year-by-year summary of important events in Utah Territory during the war, with special attention paid to the army's recall from Utah in 1861, the

and Mormons. A glossary of nineteenth-century phrases, military terms, and abbreviations, along with a detailed timeline of key historical events, places the records in historical context.

Collected and published together for the first time, these records document the unique role Utah played in the Civil War and reveal the war's influence, both subtle and overt, on the emerging state of Utah.

"Highway agencies across the nation are moving towards implementation of the new AASHTO Mechanistic-Empirical Pavement Design Guide (MEPDG) for pavement design. The objective of this project was to implement the MEPDG into the daily operations of the Utah Department of Transportation (UDOT). The implementation of the MEPDG as a UDOT standard required modifications in some UDOT pavement design protocols (i.e., lab testing procedures, equipment, and protocols, traffic data reporting, software issues, design output interpretation, and others). A key requirement is

Access Free Slc Craigs Manual Guide

validation of the MEPDG's nationally calibrated pavement distress and smoothness prediction models when applied under Utah conditions and performing local calibration if needed. This was accomplished using data from Long Term Pavement Performance (LTPP) projects located in Utah and UDOT pavement management system (PMS) pavement sections. The nationally calibrated MEPDG models were evaluated. With the exception of the new hot-mix asphalt (HMA) pavement total rutting model, all other models were found to be reasonable. The rutting model was locally calibrated to increase goodness of fit and remove significant bias. Due to the nature of the data

used in model validation, it is recommended that further MEPDG model validation be accomplished in the future using a database that contains HMA pavement and jointed plain concrete pavement (JPCP) exhibiting moderate to severe deterioration. This report represents Phase II of the UDOT MEPDG implementation study and builds on the Phase I study report completed in 2005 for UDOT. The Draft User's Guide for UDOT Mechanistic-Empirical Pavement Design (UDOT Research Report No. UT-09.11a, dated October 2009) incorporates the findings of this report as inputs and pavement design guidelines for Utah for use by UDOT's pavement design engineers

Sexual Abuse and the Sexual Offender examines the myths perpetuated by the media and widely held by the public, by providing actual data, with case examples, to demonstrate how sexual offending occurs, who commits these acts, what might cause such crimes, how sexual offenders are assessed, supervised and treated, and how to prevent such offending from occurring

to the reader or to members of her or his own family. This book is not a textbook on how to assess or treat sexual offenders for a clinical audience. Rather, it aims to educate the general public about how experts in this field diagnose, analyze, assess and treat such offenders and what steps they may take to prevent such abuse in the future. It describes, with actual case examples, how we recognize a variety of offenders, how to separate

Bible readers are often preoccupied with themselves. At times they neglect the original, ancient context of the biblical writings. The novelty of the modern is leveraged to trump the ancient. Mormon hermeneutics seems to say more about the modern LDS church than any ancient biblical meaning. Positively, the LDS is to be applauded for their emphasis on the living out of their faith. However, through various approaches to the Bible, the LDS Church seems to neglect the ancient horizon of the biblical text. Any interpretation of the Bible, LDS or otherwise, should be held

accountable. This book is an attempt to categorize Mormon hermeneutics and utilizes numerous hermeneutical voices from field of philosophical hermeneutics.

This is a no-nonsense, practical book for helping organizations r their workplaces of drug abuse and its serious and costly consequences. The book draws upon the collective experiences hundreds of organizations that have said "no more, not here" and have grown stronger as a result. The path to a drug-free working environment is straight but narrow. *The Drug-Free Workplace: How to Get There and Stay There* delineates the path, always with view toward avoiding missteps that can lead to trouble. Bringing workplace back to safety and profitability is a collaborative and multi-disciplinary effort. Participation necessarily involves professionals from security, safety, human resources, and health

This groundbreaking analysis moves our knowledge of pain and its effects from the biomedical model to one accounting for its complex psychosocial dimensions. Starting with its facial and physical

display, pain is shown in its manifold social contexts—in the lifespan, in a family unit, expressed by a member of a gender and/or race—and as observed by others. These observations by caregivers and family are shown as vital to the social dynamic of pain—as observers react to sufferers' pain, and as these reactions affect those suffering. The book's findings should enhance practitioners' understanding of pain to develop more effective individualized treatments for clients' pain experience, and inspire researchers as well. Among the topics covered: Why do we care? Evolutionary

mechanisms in the social dimension of pain. When, how, and why do we express pain? On the overlap between physical and social pain. Facing others in pain: why context matters. Caregiving impact upon sufferers' cognitive functioning. Targeting individual and interpersonal processes in therapeutic interventions for chronic pain.
