"Everything epic fantasy should be: rich, cruel, gorgeous, brilliant, enthralling and deeply, deeply satisfying. I loved it."—Lev Grossman, author of *The Magicians* When destiny calls, there's no fighting back. Kihrin grew up in the slums of Quur, a thief and a minstrel's son raised on tales of long-lost princes and magnificent quests. When he is claimed against his will as the missing son of a treasonous prince, Kihrin finds himself at the mercy of his new family's ruthless power plays and political ambitions. Practically a prisoner, Kihrin discovers that being a long-lost prince is nothing like what the storybooks promised. The storybooks have lied about a lot of other things, too: dragons, demons, gods, prophecies, and how the hero always wins. Then again, maybe he isn't the hero after all. For Kihrin is not destined to save the world. He's destined to destroy it. Jenn Lyons begins the *Chorus of Dragons* series with *The Ruin of Kings*, an epic fantasy novel about a man who discovers his fate is tied to the future of an empire.

Futuristic Sustainable Energy and Technology provides a structured overview of the concept of Futuristic Sustainable Energy and Technology. It also explores the promotion of the sustainable development of renewable energy from the perspectives of technology, modelling, application, sustainability and policy. This book is dedicated to the advancement of energy efficiency to mitigate consumption, ensure and replenish, expand and reuse elective energy supplies, and to replicate the damage caused by previous energy initiatives. This book has offered a large stage of experimentation for practitioners, experts, researchers and teachers to incorporate and analyze their latest developments, as well as the trends and difficulties encountered and the ongoing evolution of the stage in these areas.

This proceedings book presents a comprehensive view of "smart" technologies and perspectives of their application in various areas of economic activity. The authors of the book combined the results of the cutting-edge research on the topic of "smart" technologies in the digital economy and Industry 4.0 and developed a unified scientific concept. The current experience has been considered, and the prospects for the application of "smart" technologies in society to promote social advance have been identified. "Smart" technologies in public administration and law, as well as the experience in development of e-government, have been examined. "Smart" technologies in business activity have been studied, and the transition from digital business to business 4.0 has been justified. The book contains the collection of the best works following the results of the 13th International Research-to-Practice Conference "Smart Technologies" for society, state and economy which was run by the Institute of Scientific Communications (ISC) and was held on July 2-3, 2020. The target audience of this book includes researchers investigating fundamental and applied problems of development of "smart" technologies, as well as concerned parties outside the academic community, in particular, representatives of the digital society, high-tech business entities and officials regulating the digital economy and Industry 4.0.

Alex and Conner Bailey's world is about to change. When the twins' grandmother gives them a treasured fairy-tale book, they have no idea they're about to enter a land beyond all imagining: the Land of Stories, where fairy tales are real. But as Alex and Conner soon discover, the stories they know so well haven't ended in this magical land - Goldilocks is now a wanted fugitive, Red Riding Hood has her own kingdom, and Queen Cinderella is about to become a mother! The twins know they must get back home somehow. But with the legendary Evil Queen hot on their trail, will they ever find the way? The Land of Stories: The Wishing Spell brings readers on a thrilling quest filled with magic spells, laugh-out-loud humour and page-turning adventure.

Since 1994, CARDIS has been the foremost international conference dedicated to

smart card research and applications. Every two years, the scientific community congregates to present new ideas and discuss recent developments with both an academic and industrial focus. Following the increased capabilities of smart cards and devices, CARDIS has become a major event for the discussion of the various issues related to the use of small electronic tokens in the process of human-machine interactions. The scope of the conference includes numerous subfields such as networking, efficient implementations, physical security, biometrics, and so on. This year's CARDIS was held in London, UK, on September 8–11, 2008. It was organized by the Smart Card Centre, Information Security Group of the Royal Holloway, University of London.

The present volume contains the 21 papers that were selected from the 51 submissions to the conference. The 22 members of the program committee worked hard in order to evaluate each submission with at least three reviews and agree on a high quality final program. Additionally, 61 external reviewers helped the committee with their expertise. Two invited talks completed the technical program. The first one, given by Ram Banerjee and Anki Nelaturu, was entitled "Getting Started with Java Card 3.0 Platform". The second one, given by Aline Gouget, was about "Recent Advances in Electronic Cash Design" and was completed by an abstract provided in these proceedings.

GOOD MORNING AMERICA BOOK CLUB PICK! • Ray McMillian is a Black classical musician on the rise—undeterred by the pressure and prejudice of the classical music world—when a shocking theft sends him on a desperate quest to recover his great-great-grandfather's heirloom violin on the eve of the most prestigious musical competition in the world. "I loved *The Violin Conspiracy* for exactly the same reasons I loved *The Queen's Gambit*: a surprising, beautifully rendered underdog hero I cared about deeply and a fascinating, cutthroat world I knew nothing about—in this case, classical music." —Chris Bohjalian, #1 New York Times bestselling author of *The Flight Attendant* and *Hour of the Witch* Growing up Black in rural North Carolina, Ray McMillian's life is already mapped out. But Ray has a gift and a dream—he's determined to become a world-class professional violinist, and nothing will stand in his way. Not his mother, who wants him to stop making such a racket; not the fact that he can't afford a violin suitable to his talents; not even the racism inherent in the world of classical music. When he discovers that his beat-up, family fiddle is actually a priceless Stradivarius, all his dreams suddenly seem within reach, and together, Ray and his violin take the world by storm. But on the eve of the renowned and cutthroat Tchaikovsky Competition—the Olympics of classical music—the violin is stolen, a ransom note for five million dollars left in its place. Without it, Ray feels like he's lost a piece of himself. As the competition approaches, Ray must not only reclaim his precious violin, but prove to himself—and the world—that no matter the outcome, there has always been a truly great musician within him.

This blistering novel—from the bestselling, Pulitzer Prize-winning author of *The Road*—returns to the Texas-Mexico border, setting of the famed *Border Trilogy*.

The time is our own, when rustlers have given way to drug-runners and small towns have become free-fire zones. One day, a good old boy named Llewellyn Moss finds a pickup truck surrounded by a bodyguard of dead men. A load of heroin and two million dollars in cash are still in the back. When Moss takes the money, he sets off a chain reaction of catastrophic violence that not even the law—in the person of aging, disillusioned Sheriff Bell—can contain. As Moss tries to evade his pursuers—in particular a mysterious mastermind who flips coins for human lives—McCarthy simultaneously strips down the American crime novel and broadens its concerns to encompass themes as ancient as the Bible and as bloodily contemporary as this morning's headlines. *No Country for Old Men* is a triumph.

From New York Times best-selling author Lexi Ryan, *Cruel Prince* meets *A Court of Thorns and Roses* in this sexy, action-packed fantasy about a girl who is caught between two treacherous faerie courts and their dangerously seductive princes. Brie hates the Fae and refuses to have anything to do with them, even that means starving on the street. But when her sister is sold to the sadistic king of the Unseelie court to pay a debt, she'll do whatever it takes to get her back—including making a deal with the king himself to steal three magical relics from the Seelie court. Gaining unfettered access to the Seelie court is easier said than done. Brie's only choice is to pose as a potential bride for Prince Ronan, and she soon finds herself falling for him. Unwilling to let her heart distract her, she accepts help from a band of Unseelie misfits with their own secret agenda. As Brie spends time with their mysterious leader, Finn, she struggles to resist his seductive charm. Caught between two dangerous courts, Brie must decide who to trust with her loyalty. And with her heart.

No Country for Old Men

Offers a window into the vanity and silliness of almost every decade as expressed by the ultimate status symbol of the car, showcasing the cheapest, tackiest, and most mechanically inept vehicles built from the 1960s to the 1990s.

Joseph Nye coined the term "soft power" in the late 1980s. It is now used frequently—and often incorrectly—by political leaders, editorial writers, and academics around the world. So what is soft power? Soft power lies in the ability to attract and persuade. Whereas hard power—the ability to coerce—grows out of a country's military or economic might, soft power arises from the attractiveness of a country's culture, political ideals, and policies. Hard power remains crucial in a world of states trying to guard their independence and of non-state groups willing to turn to violence. It forms the core of the Bush administration's new national security strategy. But according to Nye, the neo-conservatives who advise the president are making a major miscalculation: They focus too heavily on using America's military power to force other nations to do our will, and they pay too little heed to our soft power. It is soft power that will help prevent terrorists from recruiting supporters from among the moderate majority. And it is soft power that will help us deal with critical global issues that require multilateral cooperation among states. That is

why it is so essential that America better understands and applies our soft power. This book is our guide. This Book Loves You by PewDiePie is a collection of beautifully illustrated inspirational sayings by which you should live your life. If you follow each and every one, your life will become easier, more fabulous, more rewarding. Imagine what a chilled-out and wonderful human being people would think you were if you lived by the simple principle "You can never fail if you never try." Your wasted life would be an inspiration to others. Think of all the pointless, unhappy striving you could simply give up. Throw away that guitar! Give up on your dreams! Embrace your astounding mediocrity. This Book Loves You has something for everyone--or at least everyone willing to give up and stop caring. If all else fails, remember: "Don't be yourself. Be a pizza. Everyone loves pizza."

The #1 New York Times Bestseller, USA Today Book of the Year, now a major motion picture starring Emily Blunt. The debut psychological thriller that will forever change the way you look at other people's lives, from the author of Into the Water and A Slow Fire Burning. "Nothing is more addicting than The Girl on the Train."—Vanity Fair "The Girl on the Train has more fun with unreliable narration than any chiller since Gone Girl. . . . [It] is liable to draw a large, bedazzled readership."—The New York Times "Marries movie noir with novelistic trickery. . . hang on tight. You'll be surprised by what horrors lurk around the bend."—USA Today "Like its train, the story blasts through the stagnation of these lives in suburban London and the reader cannot help but turn pages."—The Boston Globe "Gone Girl fans will devour this psychological thriller."—People EVERY DAY THE SAME Rachel takes the same commuter train every morning and night. Every day she rattles down the track, flashes past a stretch of cozy suburban homes, and stops at the signal that allows her to daily watch the same couple breakfasting on their deck. She's even started to feel like she knows them. Jess and Jason, she calls them. Their life--as she sees it--is perfect. Not unlike the life she recently lost. UNTIL TODAY And then she sees something shocking. It's only a minute until the train moves on, but it's enough. Now everything's changed. Unable to keep it to herself, Rachel goes to the police. But is she really as unreliable as they say? Soon she is deeply entangled not only in the investigation but in the lives of everyone involved. Has she done more harm than good?

This book is available as open access through the Knowledge Unlatched programme and is available on www.bloomsburycollections.com. We need to talk about Hippocrates. Current scholarship attributes none of the works of the 'Hippocratic corpus' to him, and the ancient biographical traditions of his life are not only late, but also written for their own promotional purposes. Yet Hippocrates features powerfully in our assumptions about ancient medicine, and our beliefs about what medicine – and the physician himself – should be. In both orthodox and alternative medicine, he continues to be a model to be emulated. This book will challenge widespread assumptions about Hippocrates (and, in the process, about the history of medicine in ancient Greece and beyond) and will also explore the creation of modern myths about the ancient world. Why do we continue to use Hippocrates, and how are new myths constructed around his name? How do news stories and the internet contribute to our picture of him? And what can this tell us about wider popular engagements with the classical world today, in memes, 'quotes' and online?

"Like A Wrinkle in Time (Miranda's favorite book), When You Reach Me far surpasses the usual whodunit or sci-fi adventure to become an incandescent exploration of 'life, death, and the beauty of it all.'" —The Washington Post This Newbery Medal winner that has been called "smart and mesmerizing," (The New York Times) and "superb" (The Wall Street Journal) will appeal to readers of all types, especially those who are looking for a thought-provoking mystery with a mind-blowing twist. Shortly after a fall-out with her best friend, sixth grader Miranda starts receiving mysterious notes, and she doesn't know what to do. The notes tell her that she must write a letter—a true story, and that she can't share her mission with anyone. It would be easy to ignore the strange messages, except that whoever is leaving them has an uncanny ability to predict the future. If that is the case, then Miranda has a big problem—because the notes tell her that someone is going to die, and she might be too late to stop it. Bestselling author Sherman Alexie tells the story of Junior, a budding cartoonist growing up on the Spokane Indian Reservation. Determined to take his future into his own hands, Junior leaves his troubled school on the rez to attend an all-white farm town high school where the only other Indian is the school mascot. Heartbreaking, funny, and beautifully written, *The Absolutely True Diary of a Part-Time Indian*, which is based on the author's own experiences, coupled with poignant drawings by Ellen Forney that reflect the character's art, chronicles the contemporary adolescence of one Native American boy as he attempts to break away from the life he was destined to live. With a forward by Markus Zusak, interviews with Sherman Alexie and Ellen Forney, and four-color interior art throughout, this edition is perfect for fans and collectors alike.

A bestselling modern classic—both poignant and funny—narrated by a fifteen year old autistic savant obsessed with Sherlock Holmes, this dazzling novel weaves together an old-fashioned mystery, a contemporary coming-of-age story, and a fascinating excursion into a mind incapable of processing emotions. Christopher John Francis Boone knows all the countries of the world and their capitals and every prime number up to 7,057. Although gifted with a superbly logical brain, Christopher is autistic. Everyday interactions and admonishments have little meaning for him. At fifteen, Christopher's carefully constructed world falls apart when he finds his neighbour's dog Wellington impaled on a garden fork, and he is initially blamed for the killing. Christopher decides that he will track down the real killer, and turns to his favourite fictional character, the impeccably logical Sherlock Holmes, for inspiration. But the investigation leads him down some unexpected paths and ultimately brings him face to face with the dissolution of his parents' marriage. As Christopher tries to deal with the crisis within his own family, the narrative draws readers into the workings of Christopher's mind. And herein lies the key to the brilliance of Mark Haddon's choice of narrator: The most wrenching of emotional moments are chronicled by a boy who cannot fathom emotions. The effect is dazzling, making for one of the freshest debut in years: a comedy, a tearjerker, a mystery story, a novel of exceptional literary merit that is great fun to read.

Governments of many countries consider the electrification of individual passenger transport as a suitable strategy to decrease oil dependency and reduce transport-related carbon dioxide (CO₂) and air pollutant emissions. However, battery-electric vehicles (BEVs) and plug-in hybrid-electric vehicles (PHEVs) have been more expensive than their conventional counterparts and suffer from relatively short electric driving ranges, which still hampers the market potential of these vehicles. Despite persisting shortfalls, mechanisms such as technological learning and economics of scale promise to improve the techno-economic performance of BEVs and PHEVs in the short- to mid-term. Here, the author seeks to obtain insight into the techno-economic prospects of BEVs and PHEVs by: (i) establishing experience curves and (ii) quantifying user costs and the costs of mitigating carbon dioxide and air pollutant emissions in a time-series analysis. The analysis captures the situation in Germany between 2010 and 2016.

In the late 1980s, SMH (makers of the Swatch brand of watches) CEO Omar Kamal began developing an idea for a new car using the same type of manufacturing strategies and personalization features used to popularize Swatch watches. He believed that the automotive industry had ignored a sector of potential customers who wanted a small and stylish city car. This idea soon became known as the "Swatchmobile." Hayek's private company Hayek Engineering AG began designing the new car for SMH, with seating for two and a hybrid drivetrain. While design of the car was proceeding, Hayek feared existing manufacturers would feel threatened by the Swatchmobile. Thus, rather than directly competing, he preferred to cooperate with another company in the automotive industry. This would also relieve SMH of the cost burden in setting up a distribution network. Hayek approached several automotive manufacturers and on July 3, 1991 he reached an agreement with Volkswagen to share development of the new project. By 1993 Ferdinand Piech had become CEO of Volkswagen and he immediately sought to terminate the project with SMH. Adventure Stories for Reading, Learning and Literacy takes a unique approach to cross-curricular teaching in the primary classroom. Providing eight original adventure stories, the authors build up a suite of resources and activities for teachers to use in the classroom, providing cross curricular links in line with the PNS framework, to literacy, science, PE, design and technology, numeracy, geography and history. Though the stories will interest both girls and boys, they take special care to appeal to boys, who are known to achieve less highly than girls in reading and writing, and include themes such as: cars football ghosts and ghouls heroic deeds space and aliens. Each story is linked explicitly to moral and social values, and can be used to reinforce citizenship, PHSE and SEAL initiatives in primary schools. With photocopiable resources for each story, this book offers instant ideas which can be implemented easily in teacher's plans and in the classroom and assembly, and will appeal to all busy teachers, NQTs and teachers in training.

A lush, thrilling debut about a year in the life of a uniquely beguiling young woman, set in the wild, alluring world of a famous downtown New York restaurant. Let's say I was born when I came over the George Washington Bridge... This is how we meet unforgettable Tess, the 22-year-old at the heart of this stunning debut. Shot like a bullet from a mundane past, she's come to New York to escape the provincial, to take on her destiny. After she stumbles into a coveted job at a renowned Union Square restaurant, we spend the year with her as she learns the chaotic, punishing, privileged life of a backwaiter, on and off duty. Her appetites are awakened, for food, wine, knowledge and experience; and she's pulled into the thrall of two other servers--a handsome bartender she falls hard for, and an older woman whose connection to both young lovers is murky, sensual, and overpowering. These two will prove to be Tess's hardest lesson of all. Sweetbitter is a story about discovery, enchantment, and the power of what remains after disillusionment.

AN OBSERVER BOOK OF THE YEAR 2016 | A NEW YORK TIMES BESTSELLER | A USA TODAY BESTSELLER | AN INDIE BESTSELLER

Peopled by larger-than-life heroes and villains, charged with towering questions of good and evil, Atlas Shrugged is Ayn Rand ' s magnum opus: a philosophical revolution told in the form of an action thriller—nominated as one of America ' s best-loved novels by PBS ' s The Great American Read. Who is John Galt? When he says that he will stop the motor of the world, is he a destroyer or a liberator? Why does he have to fight his battles not against his enemies but against those who need him most? Why does he fight his hardest battle against the woman he loves? You will know the answer to these questions when you discover the reason behind the baffling events that play havoc with the lives of the amazing men and women in this book. You will discover why a productive genius becomes a worthless playboy...why a great steel industrialist is working for his own destruction...why a composer gives up his career on the night of his triumph...why a beautiful woman who runs a transcontinental railroad falls in love with the man she has sworn to kill. Atlas Shrugged, a modern classic and Rand ' s most extensive statement of Objectivism—her groundbreaking philosophy—offers the reader the spectacle of human greatness, depicted with all the poetry and power of one of the twentieth century ' s leading artists.

Industry 4.0 refers to fourth generation of industrial activity characterized by smart systems and internet-based solutions. This book describes the fourth revolution based on instrumented, interconnected and intelligent assets. The different book chapters provide a perspective on technologies and methodologies developed and deployed leading to this concept. With an aim to increase performance, productivity and flexibility, major application area of maintenance through smart system has been discussed in detail. Applicability of 4.0 in transportation, energy and infrastructure is explored, with effects on technology, organisation and operations from a systems perspective.

The smart story is one of entrepreneurial vision and daring. It is a story of innovation and proof that to be successful, even the best ideas must be appropriate for their time. At Mercedes-Benz, the roots of an automotive concept designed specifically for urban use reach back to the 1970s. The growing problems of inner-city individual transportation, a parking situation which was becoming ever more critical even then, and increasing environmental awareness spurred by the crises of the early 1970s and 1980s, helped position the smart to breakthrough in the early 1990s. Since 1998, a total of 770,000 customers have purchased the first-generation smart fortwo. And, for many, it has become a part of their individual world views. In 2008, the smart comes to North America where it will be distributed by savvy auto magnate Roger Penske. Over 20,000 U.S. customers have placed advance, online reservations for the diminutive car.
