This book examines issues and implications of digital and social media marketing for emerging markets. These markets necessitate substantial adaptations of developed theories and approaches employed in the Western world. The book investigates problems specific to emerging markets, while identifying new theoretical constructs and practical applications of digital marketing. It addresses topics such as electronic word of mouth (eWOM), demographic differences in digital marketing, mobile marketing, search engine advertising, among others. A radical increase in both temporal and geographical reach is empowering consumers to exert influence on brands, products, and services. Information and Communication Technologies (ICTs) and digital media are having a significant impact on the way people communicate and fulfil their socio-economic, emotional and material needs. These technologies are also being harnessed by businesses for various purposes including distribution and selling of goods, retailing of consumer services, customer relationship management, and influencing consumer behaviour by employing digital marketing practices. This book considers this, as it examines the practice and research related to digital and social media marketing.

**Strategic Social Media** is the first textbook to go beyond the marketing plans and how-to guides, and provide an overview of

the theories, action plans, and case studies necessary for teaching students and readers about utilizing social media to meet marketing goals. Explores the best marketing practices for reaching business goals, while also providing strategies that students/readers can apply to any past, present or future social media platform Provides comprehensive treatment of social media in five distinct sections: landscape, messages, marketing and business models, social change, and the future Emphasizes social responsibility and ethics, and how this relates to capitalizing on market share Highlights marketing strategies grounded in research that explains how practitioners can influence audience behaviour Each chapter introduces theory, practice, action plans, and case studies to teach students the power and positive possibilities that social media hold

With the introduction of the Internet, consumers are relying heavily on the media for content. The popularity of consumer-generated content (CGC) has captured the consumer (i.e., user) as the producer, which has cause a power shift in the market from the companies to the consumers. When technology is paired with culture, it is inevitable that consumers are constantly changing their attitudes toward consumption to adapt to current trends. Thus, marketers are meticulously looking for information to keep current with the consumer market in order to maintain their market share. CGC relates closely to electronic word-of-mouth (eWOM) and can be found in various online review sites, forums, blogs, company websites, as well as on social media platforms. Consumers' contribution toward the content on the different digital media sites (including company's website) is on voluntary basis, either paid (e.g., sponsored) or nonpaid (e.g., personal blogs). It is evident that information that is published online travels faster to consumers than when delivered through traditional media such as television. Companies are therefore trying to be proactive; and as part of their promotional efforts, they are turning to online media for the latest information on their target market, feedback on their company (e.g., criticism, praises), as well as information on their competitors. The goal of this book is to educate business owners, marketing practitioners, students, as well as marketing researchers in understanding the use of CGC and how it is beneficial for their marketing plan.

Social Media Marketing: A Strategic Approach promises to be the seminal textbook in the field with its distinctive conceptual foundation and practical approach to developing successful social media marketing plans. A proven eight-step social media planning model provides students with a cumulative learning experience, showing them how to construct social media

strategies that achieve desired marketing goals. These marketing goals shape the development of tailored social media strategies. Special attention is given to the most effective techniques for identifying targeted marketing on the social web, with emphasis on the creation of personas that represent the critical online market segments for a company. Students discover how to put these well-defined personas to work in selecting the optimal social media platforms for reaching an organization's marketing goals. Students are taught rules of engagement and social media ethics for behaving properly as marketers on the social web. With these guidelines in mind, the most productive marketing tactics for each type of major social media platform are examined in depth. These platform-specific tactics, along with all the preceding material in the book, are brought together in the final chapter to create a comprehensive social media marketing plan, with detailed explanations and illustrations from a real world plan. Extensive consideration is given to monitoring, evaluating, and tuning the implementation of social media marketing initiatives. In addition, students are introduced to the most useful quantitative and qualitative social media measurements, along with various ways to estimate an organization's return on investment in social media marketing activities.
