Hand-in-hand with the continuing drive to recruit international students to Western universities goes an interest in student engagement. However, it is often unclear exactly what is meant by engagement. This book goes beyond the policy rhetoric to provide a practice-based explication of international student engagement and its enabling institutional conditions. By utilising a social practice conceptual model, the book explains the multiple dimensions of engagement that are often conflated in policy: the antecedents to engagement, the actions of engaging, and the achievements and outcomes of engagement. As a result, the book is able to address issues such as how English comes to matter in international student academic practice; the teaching and assessment approaches that promote international student engagement; and the metacognitive, cognitive and affective strategies that international students use to achieve academic and personal transformation. By focusing closely on the basic ideas behind sociological theory and research, this concise text provides a firm knowledge base without overwhelming students with nonessential material. Because theories and research methods are applied to substantive areas throughout the text, students develop the kind of meaningful understanding often acquired only through more expensive, full-length texts.

Role of Think Tank Initiative in South Asia

In the history of the International Plant Nutrition Colloquium from its first meeting in 1954, this meeting, the 13th Colloquium, is the first to be held in Asia and will be the last in the 20th century. The 20th century has seen huge changes in the number and activities of mankind. Our population has increased from around 1. 7 billion to more than 5. 8 billion and technological innovations have completely altered our way of living. As a consequence of such rapid change, we are facing many problems including changes in our environment of a global scale. But, while food shortage has been a serious concern to mankind throughout our history, serious food shortages in the 20th century have been confined to limited times and areas. As Lester Brown discusses in this volume, farmers have increased food production heroically on demand. We, the plant nutritionists should be proud of our support to the world's farmers which has helped them make

their achievement possible. During the 20th century, the science of plant nutrition also has achieved great progress as described by Jack Loneragan; it became established as a discipline firmly based in science, defined the chemical elements supporting plant growth, and has contributed to improvements in plant production and environmental quality, as readers will find in many contributions in this volume.

Few figures in modern American anthropology have been more controversial or influential than Leslie A. White (1900-1975). Between the early 1940s and mid-1960s, White's work was widely discussed, and he was among the most frequently cited American anthropologists in the world. After writing several respected ethnographic works about the Pueblo

Indians, White broke ranks with anthropologists who favored such cultural histories and began to radically rethink American anthropology. As his political interest in socialism grew, he revitalized the concept of cultural evolution and reinvigorated comparative studies of culture. His strident political beliefs, radical interpretive vision, and often combative nature earned him enemies inside and outside the academy. His trip to the Soviet Union and participation in the Socialist Labor Party brought him to the attention of the FBI during the height of the Cold War, and near-legendary scholarly and political conflicts surrounded him at the University of Michigan. ø Placing White's life and work in historic context, William J. Peace documents the broad sociopolitical influences that affected his career, including many aspects of White's life that are largely unknown, such as the reasons he became antagonistic toward Boasian anthropology. In so doing, Peace sheds light on what made White such a colorful figure as well as his enduring contributions to modern anthropology.

Published to commemorate the 50th anniversary of the Rural Sociological Society, this monograph analyzes the nearly 90 years of rural sociological research on agriculture. The authors' aim throughout is to convey both continuities and discontinuities in theory, method, and approach that have characterized the field as it has developed. Intended primarily as a straightforward exposition of major scholarly themes, the study is organized around the three major eras of rural sociological research identified by the authors: the initial period from 1900 through the early 1950s; the social

psychological/behaviorist emphasis between the early 1950s and the early 1970s, and the "new rural sociology" of the past decade.

The Sociology of the Health Service

The sociology of childhood and youth has sparked international interest in recent years, and yet a reader highlighting Canadian work in this field has been long overdue. Filling this gap in the literature, The Sociology of Childhood and Youth in Canada brings together cutting-edge Canadian scholarship in this important and growing discipline. Thought-provoking and timely, this edited collection explores a breadth of essential topics, including research on and

with children and youth, the social construction of childhood and youth, intersecting identities, and citizenship, rights, and social engagement. With a focus on social justice, the contributing authors critically examine various sites of inequality in the lives of children and young people, such as gender, sexuality, colonialism, race, class, and disability. Encouraging further development of Canadian scholarship in the sociology of childhood and youth, this unique collection ensures that young people's voices are heard by involving them in the research process. Pedagogical supports—including learning objectives, study questions, suggested research assignments, and a comprehensive glossary—make this volume an invaluable resource for students of childhood and youth studies in Canada.

From the perspective of the international scholarly community under North Atlantic domination, South Africa might look like a peripheral place of knowledge production. In recent years, a plethora of voices calling for provincializing Europe, for deconstructing Eurocentrism and for adopting post- and decolonial perspectives have challenged such views. They have partly transformed the academic landscape, but have had limited success in challenging the fundamental global divides in production, circulation and recognition of social scientific knowledge. This book chooses a different take on the question of how North Atlantic domination could be challenged, by conceptualizing counter-

hegemonic currents in international sociology. Instead of providing theoretical and deconstructive critiques, counter-hegemonic currents are effective through collective social scientific practice: the production of data, knowledge and texts, of new generations of scholars, the interaction with extra-university actors, leading to the gradual emergence of integrated and productive scientific communities. Their orientation towards local arenas of discussion and production of socially relevant research effectively reduces the belief in the hegemony of the North. The historical development of South African labour studies is a case in point. This study provides a systematic, in-depth analysis of research and teaching activities, networks with extra-academic actors and international cooperation over time in the three major Labour Studies centres: Johannesburg, Durban and Cape Town. It draws on a rich variety of material, including annual reports of research centres and labour service organizations, teaching contents and exam questions, the 1974-2003 volumes of the "South African Labour Bulletin" and newsletters of ISA Research Committee 44 on Labour Movements. Qualitative analysis of four seminal books is used to assess their contribution to original, general theory-building. In-depth interviews with Labour Studies representatives complement the analysis of documents and literature by reconstructing the oral history of this scholarly community, an indispensable source given that

many debates could not appear in written form or had to be watered during the Apartheid years. The study concludes that over time, South African social scientists have generated knowledge on labour, industry and trade unions that is universally comprehensible, but arrogantly local.

The Sociology of the Health Service responds directly to the need to develop a sociological analysis of current health policy. Topics covered vary from privatisation and health service management to health education and the politics of professional power. Also included is an historical review of sociology's contributions to health policy and proposals for an agenda for sociological health policy research in the 1990s.

A Mountain to Climb

Proceedings of the XIII International Plant Nutrition Colloquium, 13-19 September 1997, Tokyo, Japan

Sociology : an Introduction

The rise of a radical 'new' sociology of education during the early 1970s focused attention on the nature of school knowledge. Although this new approach was set to revolutionize the subject, within a few years, many people considered these developments an eccentric interlude, with little relevance to curriculum theory or practice. First published in 1985, this book offers a more positive view of the new sociology of education and its contribution to our

understanding of the curriculum. In doing so, it argues that some of the radical promise of the new sociology of education could be realised, but only if sociologists, teachers and political movements of the left work more closely together.

Strengthening Policy Research: Role of Think Tank Initiative in South Asia is a vivid presentation of the diverse journeys of think tanks under the aegis of the Think Tank Initiative (TTI) programme managed by the International Development Research Centre in South Asia. The book extensively discusses the three areas of TTI support to strengthen think tanks, viz., organizational performance, research quality and policy engagement. It emphatically demonstrates the crucial role of long-term core support in strengthening think tanks for more rigorous research quality as the basis for public policymaking. It presents a rich tapestry of complex pathways that each think tank adopts to engage in policy outreach in their respective

domains. The book makes a strong, evidence-based case on how even limited yet assured funding to think tanks leads to enhanced organizational capacities for good quality research, effective policy outreach and improved sustainability. It firmly puts forth the view that governments need to work jointly with private funding organizations to strengthen think tanks, which is in the best interest of evidence-informed and effective public policy-making.
