Year after year, this book has

immensely helped students in their comprehension of the subject and score good marks in examinations. It has been written specifically for the prescribed syllabus of Cost Accounting Paper of BCom (Hons) Semester IV of the University of Delhi and of School of Open Learning. Its basic features are the same as the mother book Cost Accounting—Principles and Practice, which is a UGC-recommended text for the last many years. Thus, it gives a thorough grounding in cost concepts, cost behaviour, and costing methods. The subject

matter has been organized on 'first things first' basis to sustain the interest of the students. Every discussion involving conceptual difficulties is immediately followed by a numerical example.

The third edition of the book, on the lines of the previous editions, provides a thorough and updated study of the text and cases extracted from the real-life shop floors. This comprehensive text gives an in-depth analysis of the fundamental concepts, principles and conventions of accounting. It further dwells onto the topics like reading of
