ethics." Certainly our industry is bound by the formal constraints of law in national, state, and local jurisdictions. What this volume reminds us, however, is that those laws are only as good as the personal "sea of ethics" in which each of us operates. THE ETHICS OF PROPERTY INVOLVEMENTS Stephen E. Roulac The Roulac Group San Rafael, California and Visiting Professor University of Ulster Ethical considerations are a dominant theme in the management literature. As "Ethics and ethical issues surround our liver, ... ethics has become one of the most rapidly growing areas of management research, with over 800 articles and 1,400 books appearing since 1990" (Schminke, Ambrose, and Miles, 1998). Compared to business and business management, however, the research and writing on real estate in an ethics context is in the very early stages of development. The lack of a developed literature on ethics in real estate is reflected in the response by one highly placed executive to my solicitation for funding to support the publication of this volume: "I didn't know there were any ethics in real estate!" Fortunately, the Summa Corporation and the American Real Estate Society believe in the importance of ethics in real estate, for their cosponsorship has made possible this special monograph on the subject of Ethics in Real Estate. The support of the Summa Corporation and the American Real Estate Society of this pioneering volume is warmly and appreciatively acknowledged.

This work traces the main dimensions of the relationship between central and local government, concentrating upon the role played by law in shaping that relationship. It demonstrates how the issues raised are linked to the system of parliamentary democracy, and to the tradition of public law. This review describes accountability arrangements to combat corruption in the infrastructure sector. The sustainability of the livelihoods of the poor in low- and middle-income countries is compromised by corruption in the delivery of infrastructure services. Such services include water supply, sanitation, drainage, the provision of access roads and paving, transport, solid waste management, street lighting and community buildings. For this reason, The Water, Engineering Development Centre, (WEDC) at Loughborough University in the UK is conducting research into anti-corruption initiatives in this area of infrastructure services delivery. This series of reports has been produced as part of a project entitled Accountability Arrangements to Combat Corruption, which was initially funded by the Department for International Development (DFID) of the British Government. The purpose of the work is to improve governance through the use of accountability arrangements to combat corruption in the delivery of infrastructure services. These findings, reviews, country case studies, case surveys and practical tools provide evidence of how anti-corruption initiatives in infrastructure delivery can contribute to the improvement of the lives of the urban poor. The main objective of the research is the analysis of corruption in infrastructure delivery. This includes a review of accountability initiatives in infrastructure delivery and the nature of the impact of greater accountability.

The Role of Law in Central-local Government Relations
In our everyday lives, we rely on routines that make tasks and interactions easier and provide a sense of order--routines of greeting each other, getting to work, organizing the things we do on the job, at the gym, or during family dinners. Yet, we have all experienced situations where routines fail and people behave contrary to expectations. In Situational Breakdowns, Anne Nassauer demonstrates that when routines break down, surprising outcomes often emerge. Focusing on detailed accounts of peaceful and violent uprisings such as Ferguson 2014, and armed store robberies caught on CCTV, Nassauer argues that by systematically looking at the way situations unfold, clear patterns can be identified for how and why routine interactions break down. Employing over 1,000 visual recordings, documentary sources, interviews with participants, and participant observation with police, she shows which factors can draw us into violent situations and discusses how and why we make uncommon individual and collective decisions. Drawing on insights from sociology, psychology, primatology, international relations, and neuroscience, Nassauer compares situational dynamics with human motivations to demonstrate that our interactions, interpretations, and emotions greatly influence the outcome of situations. A novel interpretation of surprising social outcomes, Situational Breakdowns reveals that, despite the course of events overriding motivations, people can avoid being caught up in violence, if they know what to look for.
