Organizational Change and Global Standardization: Solutions to Standards and Norms Overwhelming Organizations takes an organizational change approach to the overflow of standards and norms, looking at how to deal effectively and ethically with four kinds of standards and norms businesses face when they go global: (1) accounting & finance (2) international & world trade, (3) social and (4) safety & quality & environment. It is part of a larger problem faced by not only business, but every sort of organization - how to live with the epidemic of standards and norms, often in conflict, many just unnecessary, and a few that are quite helpful and important. The 5th edition has been updated to enhance student understanding of the role of accounting theory and the application of accounting theory in the professional environment. Even though Corporate Social Responsibility (CSR) has

become a widely accepted concept promoted by different stakeholders, business corporations' internal strategies, known as corporate self-regulation in most of the weak economies, respond poorly to this responsibility. Major laws relating to corporate regulation and responsibilities of these economies do not possess adequate ongoing influence to insist on corporate self-regulation to create a socially responsible corporate culture. This book describes how the laws relating to CSR could contribute to the inclusion of CSR principles at the core of the corporate self-regulation of these economies in general, without being intrusive in normal business practice. It formulates a meta-regulation approach to law, particularly by converging patterns of private ordering and state control in

contemporary corporate law from the perspective of a weak economy. It proposes that this approach is suitable for alleviating regulators' limited access to information and expertise, inherent limitations of prescriptive rules, ensuring corporate commitment, and enhance the self-regulatory capacity of companies. This book describes various meta-regulation strategies for laws to link social values to economic incentives and disincentives, and to indirectly influence companies to incorporate CSR principles at the core of their self-regulation strategies. It investigates this phenomenon using Bangladesh as a case study.
