Song Of The Space Siren

Sirens are sounds that confront us in daily life, from the sounds of police cars and fire engines to, less often, tornado warnings. Ideologies of sirens embody the protective, the seductive and the dangerous elements of siren sounds from the US Cold War public training exercises in the 1950s and 1960s to the seductive power of the sirens entrenched in popular culture: from Wagner to Dizzee Rascal, from Kafka to Kurt Vonnegut, from Hans Christian Andersen to Walt Disney. This book argues, using a wide array of theorists from Adorno to Bloch and Kittler, that we should understand 'siren sounds' in terms of their myth and materiality, and that

sirens represent a sonic confluence of power, gender and destructiveness embedded in core Western ideologies to the present day. Bull poses the question of whether we can rely on sirens, both in their mythic meanings and in their material meanings in contemporary culture.

In *Dark Age Bodies* Lynda L. Coon reconstructs the gender ideology of monastic masculinity through an investigation of early medieval readings of the body. Focusing on the Carolingian era, Coon evaluates the ritual and liturgical performances of monastic bodies within the imaginative landscapes of same-sex ascetic communities in northern Europe. She demonstrates how the priestly body plays a significant role in shaping major aspects of Carolingian history, such as the revival of classicism,

movements for clerical reform, and church-state relations. In the political realm, Carolingian churchmen consistently exploited monastic constructions of gender to assert the power of the monastery. Stressing the superior qualities of priestly virility, clerical elites forged a model of gender that sought to feminize lay male bodies through a variety of textual, ritual, and spatial means. Focusing on three central themes—the body, architecture, and ritual practice—the book draws from a variety of visual and textual materials, including poetry, grammar manuals, rhetorical treatises, biblical exegesis, monastic regulations, hagiographies, illuminated manuscripts, building plans, and cloister design. Interdisciplinary in scope, *Dark Age Bodies* brings together scholarship in architectural

history and cultural anthropology with recent works in religion, classics, and gender to present a significant reconsideration of Carolingian culture. She wants a normal life. He's from the very world she's trying to escape. Can their love overcome the odds, or will her past cost her lover his life? Siren Savage doesn't stay in one place for longer than six months. Nightmare creatures stalk her footsteps, and the gray-eyed man who controls them will do anything to claim her power for himself-the power to heal or kill with a single touch. She's accepted that constant running means she can never have a normal life, but when she meets Jace Winters, she finds herself wanting everything she knows she can't have. Old wounds have Jace staying as far away from Aspect-the power that runs in his family's

bloodline-as possible. But when he meets Siren, a woman with more Aspect than any one person should be able to contain, he's incapable of turning down her plea for help-even if it means diving back into the very society he once swore he'd have nothing more to do with. Siren's tired of running, but her past is about to catch up to her, and it just might kill the only man she's ever slowed down long enough to love...

Poetry has long been regarded as the least accessible of literary genres. But how much does the obscurity that confounds readers of a poem differ from, say, the slang that seduces listeners of hip-hop? *Infidel Poetics* examines not only the shared incomprehensibilities of poetry and slang, but poetry's genetic relation to the spectacle of underground culture.

Charting connections between vernacular poetry, lyric obscurity, and types of social relations—networks of darkened streets in preindustrial cities, the historical underworld of taverns and clubs, the subcultures of the avant-garde—Daniel Tiffany shows that obscurity in poetry has functioned for hundreds of years as a medium of alternative societies. For example, he discovers in the submerged tradition of canting poetry and its eccentric genres—thieves' carols, drinking songs, beggars' chants—a genealogy of modern nightlife, but also a visible underworld of social and verbal substance, a demimonde for sale. Ranging from Anglo-Saxon riddles to Emily Dickinson, from the icy logos of Parmenides to the monadology of Leibniz, from Mother Goose to Mallarmé, *Infidel Poetics* offers an

Siren Song

A Story of Life and Death in Space

Digital Media: Human-Technology Connection examines what it is like to be alive in today's technologically textured world and showcases specific digital media technologies that makes this kind of world possible. So much of human experience occurs through digital media that it is time to pause and consider the process and proliferation of digital consumption and humanity's role in it through an interdisciplinary array of

sources from philosophy, media studies, film studies, media ecology and philosophy of technology. When placed in the interpretive lens of artifact, instrument, and tool, digital media can be studied in a uniquely different way, as a kind of technology that pushes the boundaries on production, distribution and communication and alters the way humans and technology connect with each other and the world. The book is divided into two sections to provide overarching definitions and case study specifics. Section one, Raw Materials, examines pertinent concepts like digital media, philosophy of technology, phenomenology and postphenomenology by author Stacey O Irwin. In Section Two, Feeling the Weave, Irwin uses conversations with digital media users and other written materials along with the postphenomenological framework to

explore nine empirical cases that focus on deep analysis of screens, sound, photo manipulation, data-mining, aggregate news and self-tracking.

Postphenomenological concepts like multistability, variational theory, microperception, macroperception, embodiment, technological mediation, and culture figure prominently in the investigation. The aim of the book is to recognize that digital media technologies and the content it creates and proliferates are not neutral. They texture the world in multiple and varied ways that transform human abilities, augment experience and pattern the world in significant and comprehensive ways.

This ambitious book investigates a major yet underexplored nexus of themes in Roman cultural history: the evolving tropes of enclosure, retreat and compressed space within expanding,

potentially borderless empire. In Roman writers' exploration of real and symbolic enclosures - caves, corners, villas, bathhouses, the 'prison' of the human body itself - we see the aesthetic, philosophical and political intersecting in fascinating ways, as the machine of empire is recast in tighter and tighter shapes. Victoria Rimell brings ideas and methods from literary theory, cultural studies and philosophy to bear on an extraordinary range of ancient texts rarely studied in juxtaposition, from Horace's Odes, Virgil's Aeneid and Ovid's Ibis, to Seneca's Letters, Statius' Achilleid and Tacitus' Annals. A series of epilogues puts these texts in conceptual dialogue with our own contemporary art world, and emphasizes the role Rome's imagination has played in the history of Western thinking about space, security and dwelling.

This volume treats early modern song as a musical and embodied practice and considers the implications of reading song not just as lyric text, but as a musical phenomenon that is the product of the singing body. It draws on a variety of genres, from theatre to psalm translations, sonnets and lyrics, and household drama to courtly masques.

The autobiography of America's greatest living record man: the founder of Sire Records and spotter of rock talent from the Ramones to Madonna. Seymour Stein is America's greatest living record man. Not only has he signed and nurtured more important artists than anyone alive, now sixty years in the game, he's still the hippest label head, travelling the globe in search of the next big thing. Since the late fifties, he's been wherever it's happening: Billboard, Tin Pan Alley, The British Invasion, CBGB, Studio 54, Danceteria,

the Rock n Roll Hall of Fame, the CD crash. Along that winding path, he discovered and broke out a skyline full of stars: Madonna, The Ramones, Talking Heads, Depeche Mode, Madonna, The Smiths, The Cure, Ice-T, Lou Reed, Seal, and many others. Brimming with hilarious scenes and character portraits, Siren Song's wider narrative is about modernity in motion, and the slow acceptance of diversity in America – thanks largely to daring pop music. Including both the high and low points in his life, Siren Song touches on everything from his discovery of Madonna to his wife Linda Stein's violent death. Ask anyone in the music business, Seymour Stein is a legend. Sung from the heart, Siren Song will etch his story in stone.

From Poetry to Writing

Aris Boch is back--and this time he's after Daniel Jackson.

Whether referred to as mermaid, usalka, mami wata, or by some other name, and whether considered an imaginary being or merely a person with extraordinary abilities, the siren is the remarkable creature that has inspired music and its representations from ancient Greece to present-day Africa and Latin America. This book, co-edited by a historical musicologist and an ethnomusicologist, brings together leading scholars and some talented newcomers in classics, music, media studies, literature, and cultural studies to consider the siren and her multifaceted relationships to music

across human time and geography. Starting with 1964's Goldfinger, every James Bond film has followed the same ritual, and so has its audience: after an exciting action sequence the screen goes black and the viewer spends three long minutes absorbing abstract opening credits and a song that sounds like it wants to return to 1964. In *The James Bond Songs* authors Adrian Daub and Charles Kronengold use the genre to trace not only a changing cultural landscape, but also evolving conceptions of what a pop song is. They argue that the story of the Bond song is the story of the pop song more generally, and perhaps even the story of its end. Each chapter discusses a particular segment of the Bond canon and contextualizes it in its era's music and culture. But the book also asks how

Bond and his music reflected and influenced our feelings about such topics as masculinity, race, money, and aging. Through these individual pieces the book presents the Bond song as the perfect anthem of late capitalism. The Bond songs want to talk about the fulfillment that comes from fast cars, shaken Martinis and mindless sex, but their unstable speakers, subjects, and addressees actually undercut the logic of the lifestyle James Bond is sworn to defend. The book is an invitation to think critically about pop music, about genre, and about the political aspects of popular culture in the twentieth century and beyond.

anglophone literary modernism. The essays spotlight 'translation,' a concept the modernists themselves used to reckon with the Classics and to denote a range of different kinds of reception – from more literal to more liberal translation work, as well as forms of what contemporary reception studies would term 'adaptation', 'refiguration' and 'intervention.' As the volume's essays reveal, modernist 'translations' of Classical texts crucially informed the innovations of many modernists and often themselves constituted modernist literary projects. Thus the volume responds to gaps in both Classical reception and Modernist studies: essays treat a comparatively
