

## Sopravvivere Alla Sc Q Uola Ediz A Colori

Presenting the New Edition of the classic reference on pediatric hematology and oncology. Comprehensively revised and updated, it continues to integrate lucid reviews of the pathophysiology of disease with detailed clinical guidance on its diagnosis and management. Drs. Nathan and Orkin - joined by two new co-editors and an outstanding team of authors - worked tirelessly to ensure that all the latest scientific advances appear in the 6th Edition. Nearly 50% of the chapters have been rewritten for the 6th Edition; the remaining chapters have been thoroughly revised and updated. Two new co-editors, Dr. Thomas Look and Dr. David Ginsberg, who contribute their expertise to the neoplastic diseases and coagulation sections Important new coverage of transfusion medicine, stem cell transplantation protocols, the haematological manifestations of paediatric AIDS/HIV, and more The recently codified WHO classification for all lymphomas and leukemias Nearly 50% of the chapters have been rewritten for the 6th Edition; the remaining chapters have been thoroughly revised and updated. Two new co-editors, Dr. Thomas Look and Dr. David Ginsburg, who contribute their expertise to the neoplastic diseases and coagulation sections. Important new coverage of transfusion medicine, stem cell transplantation protocols, the hematologic manifestations of pediatric AIDS/HIV, and more. The recently codified WHO classification for all lymphomas and leukemias.

The refreshed insights into early-imperial Roman historiography this book offers are linked to a recent discovery. In the spring of 2014, the binders of the archive of Robert Marichal were dusted off by the ERC funded project PLATINUM (ERC-StG 2014 n°636983) in response to Tiziano Dorandi's recollections of a series of unpublished notes on Latin texts on papyrus. Among these was an in-progress edition of the Latin rolls from Herculaneum, together with Marichal's intuition that one of them had to be ascribed to a certain 'Annaeus Seneca'. PLATINUM followed the unpublished intuition by Robert Marichal as one path of investigation in its own research and work. Working on the Latin P.Herc. 1067 led to confirm Marichal's intuitions and to go beyond it: P.Herc. 1067 is the only extant direct witness to Seneca the Elder's Historiae. Bringing a new and important chapter of Latin literature arise out of a charred papyrus is significant. The present volume is made up of two complementary sections, each of which contains seven contributions. They are in close dialogue with each other, as looking at the same literary matter from several points of view yields undeniable advantages and represents an innovative and fruitful step in Latin literary criticism. These two sections express the two different but interlinked axes along which the contributions were developed. On one side, the focus is on the starting point of the debate, namely the discovery of the papyrus roll transmitting the Historiae of Seneca the Elder and how such a discovery can be integrated with prior knowledge about this historiographical work. On the other side, there is a broader view on early-imperial Roman historiography, to which the new perspectives opened by the rediscovery of Seneca the Elder's Historiae greatly contribute.

Identifying 'networked flow' as the key driver of networked creativity, this new volume in the Springer Briefs series deploys concepts from a range of sub-disciplines in psychology to suggest ways of optimizing the innovative potential of creative networks. In their analysis of how to support these networks, the contributing authors apply expertise in experimental, social, cultural and educational psychology. They show how developing a creative network requires the establishment of an optimal group experience in which individual intentions inform and guide collective goals. The volume represents a three-fold achievement. It develops a ground-breaking new perspective on group creativity: the notion of 'networked flow' as a bridging concept linking the neuropsychological, psychological and social levels of the creative process. In addition, the authors set out a six-stage model that provides researchers with a methodological framework (also by referring to the social network analysis) for studying the creativity traditionally associated with interpersonal contexts. Finally, the book includes perceptive analysis of the novel possibilities opened up by second-generation internet technologies, particularly in social networking, that seem destined to develop and sustain online creativity. As a wide-ranging exposition of a new direction in theoretical psychology that is laden with exciting possibilities, this volume will inform and inspire professionals, scholars and students alike.

Explorations in the Sociology of the School

This book offers the hint for a new reflection on ancient textual transmission and editorial practices in Antiquity.In the first section, it retraces the first steps of the process of ancient writing and editing. The reader will discover how the book is both a material object and a metaphorical personification, material or immaterial. The second section will focus on corpora of Greek texts, their formation, and their paratextual apparatus. Readers will explore various issues dealing with the mechanisms that are at the basis of the assembling of ancient Greek texts, but great attention will also be given to the role of ancient scholarly work. The third section shows how texts have two levels of authorship: the author of the text, and the scribe who copies the text. The scribe is not a medium, but plays a crucial role in changing the text. This section will focus on the protagonists of some interesting cases of textual transmission, but also on the books they manufactured or kept in the libraries, and on the words they engraved on stones. Therefore, the fresh voices of the contributors of this book, offer new perspectives on established research fields dealing with textual criticism.

Per sei anni Sebastião Salgado ha viaggiato in tutto il mondo, fotografando la bellezza e la diversità della natura e della cultura. Il libro è costituito da un progetto realizzato da Mari nel '74 e rappresenta uno stimolo (e una provocazione) per legare la creatività alla capacità costruttiva di ognuno, seguendo e/o modificando la traccia data dai disegni progettuali di Enzo Mari per la realizzazione di una sedia, un tavolo, un armadio, un letto. Il libro riprende la precedente pubblicazione "Proposta per un'autoprogettazione" curata dal centro Duchamp e stampata in occasione della mostra alla Galleria Milano, alla quale si aggiungono i testi dello stesso Mari a commento di quest'operazione, la documentazione di ciò che la prima uscita del progetto ha provocato (lettere, commenti, articoli), immagini, disegni e una riflessione sull'attualità della riproposta di oggi.

Giurisprudenza italiana

La crescita esponenziale dell'interesse per la ventilazione non invasiva (NIV) verificatasi negli ultimi 10-15 anni, non solo dal punto di vista clinico e applicativo, ma anche speculativo, ha pochi eguali nella recente storia della medicina. In Italia e in Europa in generale tale metodica è applicata su larga scala, prevalentemente nei reparti di Pneumologia e nelle Unità di Cure Intermedie Respiratorie, mentre per quanto riguarda la sua applicazione nei reparti di Terapia Intensiva Generale (UTI) i dati emersi da uno studio multicentrico condotto nei paesi francofoni vedono la NIV impiegata in una quantità di casi che rappresenta fino al 50% dei pazienti che richiedono assistenza ventilatoria. Il recente studio EUROVENT ha inoltre dimostrato come la NIV non si limiti alla sua applicazione "acuta", dal momento che circa 25.000 pazienti sono attualmente ventilati "in cronico" a domicilio. Inoltre, si calcola che milioni di cittadini europei soffrano attualmente di disturbi respiratori durante il sonno, e per molti di essi il trattamento medico di prima scelta è rappresentato dalla NIV. Questo libro si propone lo scopo di richiamare l'attenzione sulle più recenti acquisizioni in questo campo, con la speranza di fornire uno strumento valido e maneggevole per la scelta e l'impostazione della migliore modalità di ventilazione.

Accompanying CD-ROM contains: digital reproduction of Fra Mauro's world map with the ability to navigate within the map and extract information from it.

Catheter Ablation of Atrial Fibrillation Edited by Etienne Aliot, MD, FESC, FACC. FACC. Chief of Cardiology, Hôpital Central, University of Nancy, France Michel Haissaguerre, MD Chief of Electrophysiology, Hôpital Cardiologique du Haut-Lévêque, France Warren M. Jackman, MD Chief of Electrophysiology, University of Oklahoma Health Science Center, USA In this text, internationally recognized authors explore and explain the advances in basic and clinical electrophysiology that have had the greatest impact on catheter ablation of atrial fibrillation (AF). Designed to assist in patient care, stimulate research projects, and continue the remarkable advances in catheter ablation of AF, the book covers: the fundamental concepts of AF, origin of signals, computer simulation, and updated reviews of ablation tools the present practical approaches to the ablation of specific targets in the fibrillating atria, including pulmonary veins, atrial neural network, fragmented electrograms, and linear lesions, as well as the strategies in paroxysmal or chronic AF or facing left atrial tachycardias the special challenge of heart failure patients, the impact of ablation on mortality, atrial mechanical function, and lessons from surgical AF ablation Richly illustrated by numerous high-quality images, Catheter Ablation of Atrial Fibrillation will help every member of the patient care team.

This book takes as its focus the key interactionist concept of [strategie], a concept fundamental to many current concerns in the sociology of the school, including the understanding of the links between society and the individual, a more accurate description of certain areas of school life and implications for the practice of teaching. [Strategie] bears on all these issues. It concerns both goals, and ways of achieving them and short-term, immediate aims as well as long-term ones. The essays in this book share a common concern with teacher strategies, emphasizing the discovery of intentions and motives, alternative definitions of situations and the hidden rules that guide our behaviour. Amongst the areas investigated are the influence of factors outside the school in determining the role of the teacher, and the nature and influence of teacher commitment. The implications for practical action and policy making are stressed throughout, and by recognising and exploring the constraints and influences that operate on teachers, this work constructs a realistic appraisal of the teaching situation.

Since the very beginnings of the digital humanities, Papyrology has been in the vanguard of the application of information technologies to its own scientific purposes, for both theoretical and practical reasons (the strong awareness towards the problems of human memory and the material ways of preserving it; the need to work with a multifarious and overwhelming amount of different data). After more than thirty years of development, we have now at our disposal the most advanced tools to make papyrological studies more and more effective, and even to create a new conception of "papyrology" and a new model of "edition" of the ancient documents. At this turning point, it is important to build an epistemological framework including all the different expressions of Digital Papyrology, to trace a historical sketch setting the background of the contemporary tools, and to provide a clear overview of the current theoretical and technological trends, so that all the possibilities currently available can be exploited following uniform pathways. The volume represents an innovative attempt to deal with such topics, usually relegated into very quick and general treatments within journal articles or papyrological handbooks.

La scuola positiva rivista di diritto e procedura penale

*The Fascist regime under Mussolini regarded its youth as its best hope for the future. Young people were courted more assiduously than any other group in the society and their political socialization became a central concern of the government. Believe, Obey, Fight discusses the various tools used by the Fascist regime from 1922 to 1943 to shape the political values and environment of the young. Tracy Koon focuses on the secondary agents of socialization, including the party, the educational establishment, youth groups, and the media of political communication. She shows that the response to this socialization ranged from apparent consent to dissent and finally to open opposition. The regime employed several methods to produce consensus among the young. Koon's analysis begins with a discussion of the rhetorical style of Mussolini's message and the key political myths manipulated by his propaganda machine: fascism as continuing revolution and social justice, the glories of ancient Rome, the hygienic function of war and violence, the religious spirit of the new creed, and the omniscience of the leader. She then describes the pre-Fascist educational system, the "most Fascist" Gentile reforms of 1923, and the later revision of those reforms by zealous party men engaged in the Fascist regimentation of teachers and students and the militarization and politicization of curricula and textbooks. Equally important agents of socialization were the Fascist groups organized for young people from their earliest years through the university level, including the annual national competitions and forums in which members could express their ideas on a range of issues. The regime provided physical, military, sports, and political training to strengthen the new Fascist society. Fascist socialization did for a time create a superficial consensus by appealing to both the love of conformity that marks the very young and the economic fears that caused students to conform in the hope of jobs. But Koon argues that the regime's attempt to exert totalitarian control over the young deprived them of personal identity. As time passed, the contradictions of the regime became clearer, the chasm between Fascist rhetoric and reality more obvious. In the end, the majority of young people came to believe that the regime had given them nothing to believe in, no one to obey, and nothing for which to fight. Originally published in 1985. These editions are published unaltered from the original, and are presented in affordable paperback formats, bringing readers both historical and cultural value.*

*"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt*

The volume collects papers presented at the International Conference "Greek Medical Papyri - Text, Context, Hypertext" held at the University of Parma on November 2-4, 2016, as the final event of the ERC project DIGMEDTEXT, aimed primarily at creating an online textual database of the Greek papyri dealing with medicine. The contributions, authored by outstanding papyrologists and historians of the ancient medicine, deal with a variety of topics focused on the papyrological evidence of ancient medical texts and contexts. The first part, devoted to "medical texts", contains some new reflections on important sources such as the Anonymus Londinensis and the Hippocratic corpus, as well as on specific themes like the pharmacological vocabulary, the official medical reports, the medical care in the Roman army. The second part collects papers about the "doctors' context", providing highlights from broader viewpoints like the analysis of the writing supports, the study of the ostraka from the Eastern Desert, the evidence of inscriptions and philosophical texts. The third part is entirely focused on the DIGMEDTEXT project itself; the team members present some relevant key issues raised by the digitisation of the medical papyri.

"A resistance novel for our time." - **The New York Times**
**"A hopeful story about recovery, empathy, and the bravery of young people."** - **Booklist**
**"This well-crafted and suspenseful novel touches on the topics of refugees and immigrant integration, terrorism, Islam, Islamophobia, and the Syrian war with sensitivity and grace."** - **Kirkus**, **Starred Review**
**Fourteen-year-old Ahmed is stuck in a city that wants nothing to do with him. Newly arrived in Brussels, Belgium, Ahmed fled a life of uncertainty and suffering in Aleppo, Syria, only to lose his father on the perilous journey to the shores of Europe. Now Ahmed's struggling to get by on his own, but with no one left to trust and nowhere to go, he's starting to lose hope. Then he meets Max, a thirteen-year-old American boy from Washington, D.C. Lonely and homesick, Max is struggling at his new school and just can't seem to do anything right. But with one startling discovery, Max and Ahmed's lives collide and a friendship begins to grow. Together, Max and Ahmed will defy the odds, learning from each other what it means to be brave and how hope can change your destiny. Set against the backdrop of the Syrian refugee crisis, award-winning author of Jepp, Who Defied the Stars Katherine Marsh delivers a gripping, heartwarming story of resilience, friendship and everyday heroes. Barbara O'Connor, author of Wish and Wonderland, says "Move Nowhere Boy to the top of your to-be-read pile immediately."**

Surgeons around the world need a basic knowledge of English to keep up to date with advances in their field. Fluency in surgical English is important for your professional development, enabling you to attend English-speaking patients with confidence, to study (or work) in other hospitals, speak confidently at international meetings, and to write articles for international journals. This book will provide you with the basic tools to handle day-to-day situations without stress and will help you to improve your English, no matter what your level. To our knowledge, this is the first English book written specifically by surgeons for surgeons. We are sure that surgical specialists from all over the "non-English-speaking world" (general surgeons, thoracic surgeons, vascular surgeons, neurosurgeons, gynecologists, plastic surgeons) will enjoy reading it.

Worried about his first day at a new school, eight-year-old Stuart wears his magic cape and hopes that it will help him get through the day. Reprint.

Fra Mauro's World Map

Believe, Obey, Fight

*"Every year between 250 000 and 500 000 people suffer a spinal cord injury, with road traffic crashes, falls and violence as the three leading causes. People with spinal cord injury are two to five times more likely to die prematurely. They also have lower rates of school enrollment and economic participation than people without such injuries. Spinal cord injury has costly consequences for the individual and society, but it is preventable, survivable and need not preclude good health and social inclusion. Ensuring an adequate medical and rehabilitation response, followed by supportive services and accessible environments, can help minimize the disruption to people with spinal cord injury and their families. The aims of International perspectives on spinal cord injury are to: --assemble and summarize information on spinal cord injury, in particular the epidemiology, services, interventions and policies that are relevant, together with the lived experience of people with spinal cord injury; --make recommendations for actions based on this evidence that are consistent with the aspirations for people with disabilities as expressed in the Convention on the Rights of Persons with Disabilities.*

*Having just escaped from the treacherous island that was once Manhattan, Brooke, Ben, Logan, Bree, and Rose make their way up the Hudson River in their stolen boat, low on fuel, low on food, and desperately needing shelter from the cold. As they make their way upriver in this post-apocalyptic, action-packed thriller, on their way to try to find the mythical city in Canada, they will need to use all their ingenuity and survival skills to stay alive.*

Nowhere Boy

Teacher Strategies (RLE Edu L)

In his most extraordinary book, the bestselling author of Awakenings and "poet laureate of medicine " (The New York Times) recounts the case histories of patients inhabiting the compelling world of neurological disorders, from those who are no longer able to recognize common objects to those who gain extraordinary new skills. Featuring a new preface, Oliver Sacks ' s The Man Who Mistook His Wife for a Hat tells the stories of individuals afflicted with perceptual and intellectual disorders: patients who have lost their memories and with them the greater part of their pasts; who are no longer able to recognize people and common objects; whose limbs seem alien to them; who lack some skills yet are gifted with uncanny artistic or mathematical talents. In Dr. Sacks ' s splendid and sympathetic telling, his patients are deeply human and his tales are studies of struggles against incredible adversity. A great healer, Sacks never loses sight of medicine ' s ultimate responsibility: " the suffering, afflicted, fighting human subject."
