

Sourcebook For Linguistics

Students' Right to Their Own Language collects perspectives from some of the field's most influential scholars to provide a foundation for understanding the historical and theoretical context informing the affirmation of all students' right to exist in their own languages. Co-published with the National Council for Teachers of English, this critical sourcebook archives decades of debate about the implications of the statement and explores how it translates to practical strategies for fostering linguistic diversity in the classroom.

Written by experienced teachers and researchers in the field, 'Bilingualism' is an essential resource for students and researchers of Applied Linguistics. It introduces key issues and debates in the subject, and focuses on the impact of bilingualism on cognitive resources and the social forces that moderate it.

"Language and Power offers a comprehensive survey of the ways in which language intersects and connects with the social, cultural and political aspects of power. It provides a comprehensive introduction to the history of the field, and covers all the major approaches, theoretical concepts and methods of analysis in this important and developing area of academic study. The book's twelve strands cover both the 'traditional' topics, such as race, gender and institutional power, as well as more recent developments such as the discourse of 'post-truth', and the power of social media. The book's unique design allows it

to include readings from works by seminal figures in the field, such as Robin Lakoff, Deborah Cameron and Teun van Dijk. Real texts and examples are used throughout the book, including political and presidential speeches, advertisements from cosmetics companies, newspaper articles and headlines, and websites and internet media. The book is also accompanied by a well-populated supporting website that aims to challenge students at a more advanced level and which features exercises, extra reading, follow-up activities, and suggestions for further work. Language and Power will be essential reading for any student interested in the study of English Language or Linguistics"--

Routledge English Language Introductions cover core areas of language study and are one-stop resources for students. Assuming no prior knowledge, books in the series offer an accessible overview of the subject, with activities, study questions, sample analyses, commentaries and key readings – all in the same volume. The innovative and flexible 'two-dimensional' structure is built around four sections – introduction, development,

exploration and extension –which offer self-contained stages for study. Each topic can also be read across these sections, enabling the reader to build gradually on the knowledge gained. English Grammar: provides a wide-ranging introduction to English grammar, drawing on a variety of international authentic texts, including newspapers, novels and academic texts, to help learners understand concepts and theories in more depth; is written in clear, concise prose in order to present basic concepts and key terms in an accessible way to learners with little or no background in grammar instruction; emphasises the autonomy of the learner through activities and exercises which are suited to both native speakers and learners of English alike; includes a selection of readings from key academics in the field including Michael Halliday, Michael McCarthy, Caroline Coffin and John Sinclair. Drawing on the strengths of the original textbook, this second edition features: new readings from Christian Jones, Daniel Waller and Thomas E. Payne; revised questions, suggestions and issues to consider; and a brand new companion website featuring interactive audio files of authentic spoken English, links to further reading and new grammar tasks. Written by an experienced teacher and researcher, this accessible textbook is an essential resource for all students of English language and linguistics.

Translation 2nd edition introduces the theory

and practice of translation from a variety of linguistic and cultural angles and has been revised and updated to feature: a study of translation through the lens of key topics in linguistics such as semantics, functional linguistics, corpus and cognitive linguistics, discourse analysis, gender studies and postcolonialism; a wide range of examples from other languages, including French, Spanish, German, Italian, Russian and Arabic, with English back translations to assist comprehension; material from a variety of sources, genres and text-types, such as advertisements, religious texts, reports for international organizations, videogames, literary and technical texts; influential readings from the key names in the discipline, including Vinay and Darbelnet, Eugene Nida, Werner Koller and Ernst-August Gutt and contains new readings from Mona Baker, Michael Cronin, Kim Grego, Miguel A. Jiménez-Crespo, Kevin Gary Smith, Harald Martin Olk, Carmen Mangiron and Minako O'Hagan. Additional resources for the book can be found at

www.routledge.com/9780415536141. Further text examples, translations, illustrative material and updatetial readings from the key names in the discipline, including Vinay and Darbelnet, Eugene Nida, Werner Koller and Ernst-August Gutt and contains new readings from Mona Baker, Michael Cronin, Kim Grego, Miguel A. Jiménez-Crespo, Kevin Gary Smith, Harald Martin Olk, Carmen Mangiron and Minako

O'Hagan. Additional resources for the book can be found at www.routledge.com/9780415536141. Further text examples, translations, illustrative material and updates on recent developments and events in Translation Studies will be posted there. Written by two experienced teachers, translators and researchers in the field, Translation remains an essential resource for students and researchers of Translation Studies and Applied Linguistics.

The Routledge Linguistics Encyclopedia is a single-volume encyclopedia covering all major and subsidiary areas of linguistics and applied linguistics. The 79 entries provide in-depth coverage of the topics and sub-topics of the field. Entries are alphabetically arranged and extensively cross-referenced so the reader can see how areas interrelate. Including a substantial introduction which provides a potted history of linguistics and suggestions for further reading, this is an indispensable reference tool for specialists and non-specialists alike. This third edition has been thoroughly revised and updated, with new entries on: attitudes to language conversation analysis English Language Teaching gesture and language idioms language and advertising language and new technologies linguistics in schools optimality theory research methods in linguistics slang. The following entries have been recommissioned or substantially revised: Animals and Language, Artificial Languages,

Computational Linguistics to Language Engineering, Contrastive Analysis/Contrastive Linguistics, Corpus Linguistics, Critical Discourse Analysis, Dialectology, Discourse Analysis, Dyslexia, Genre Analysis, Historical Linguistics, Intonation, Language and Education, Language, Gender and Sexuality, Language Origins, Language Surveys, Language Universals, Linguistic Typology, Metaphor, Pragmatics, Rhetoric, Semantics, Semiotics, Sociolinguistics, Stylistics, Systemic-Functional Grammar, Writing Systems.

Theory and Intervention for Language Therapy (PK-6)

Provides support for advanced study of translation.

Examines the theory and practice of translation from many angles, drawing on a wide range of languages and exploring a variety of sources. Concludes with readings from key figures.

This is a revised and expanded edition of Cowan and Rakušan's Source Book for Linguistics. In addition to the chapters on Phonetics, Phonology, Phonological Alternations, Morphology, Syntax, Sound Change and Historical Reconstruction, there are two new chapters:

one on Semantics and one on Grammatical and Lexical Change. In addition, an index of the 93 languages and dialects represented in the book has been added, as well as a revised bibliography. The solutions to the exercises have also been revised and expanded. The number of exercises has been increased from 333 to 472. New exercises have been added to most chapters, and many exercises have been revised to focus on new issues in linguistics. The text has been completely reset in high-quality letterpress, with a wide range of phonetic symbols and diacritics. This newly revised edition will continue to be useful as a teaching tool and a source of examples in a variety of linguistic applications. If you've been teaching upper-level undergraduate introductions to linguistics without Cowan & Rakusan, then you've been scrambling about in search of examples and exercises in phonetics, phonology, morphology and syntax long enough. Order the Source Book; in the long run, if it does for you what it did for me, you'll probably wind up just dumping your traditional textbook order. (Lynn Eubank, University of North Texas)

The Sourcebook for Receptive and Expressive Language Functioning is a new volume based on two previous Sourcebook volumes and offers exercises for speech and language rehabilitation.

Learning Language Through Literature

Routledge English Language Introductions cover core areas of language study and are one-stop resources for students. Assuming no prior knowledge, books in the series offer an accessible overview of the subject, with activities, study questions, sample analyses, commentaries and key readings – all in the same volume. The innovative and flexible 'two-dimensional' structure is built around four sections – Introduction, Development, Exploration and Extension – which offer self-contained stages for study. Revised and updated throughout, this fourth edition of *Practical English Phonetics and Phonology*: presents the essentials of the subject and their day-to-day applications in an engaging and accessible manner; covers all the core concepts of phonetics and phonology, such as the phoneme, syllable structure, production of speech, vowel and consonant possibilities, glottal settings, stress, rhythm, intonation and the surprises of connected speech; incorporates classic readings from key names in the discipline; outlines the sound systems of six key languages from around the world (Spanish, French, Italian, German, Polish and Japanese); is accompanied by a brand-new companion website which hosts a collection of samples provided by genuine speakers of 25 accent varieties from Britain, Ireland, the USA, Canada, Australia, New Zealand, South Africa, India, Singapore and West Africa, as well as transcriptions, further study questions, answer keys, links to further reading and numerous recordings to

accompany activities in the book. This edition has been completely reorganised and new features include: updated descriptions of the sounds of modern English and the adoption of the term General British (GB); considerable expansion of the treatment of intonation, including new recordings; and two new readings by David Crystal and John Wells. Written by authors who are experienced teachers and researchers, this best-selling textbook will appeal to all students of English language and linguistics and those training for a certificate in TEFL.

Accompanying CD-ROM contains ... "all the bibliographical items in this book ... along with self-installing software necessary to process the databases and the annotations on a personal computer." -- p. [535]. This major reference work fills a need long recognized in neurolinguistics: a source for analyzable speech transcripts from agrammatic aphasic patients that provides detailed grammatical descriptions and distributional analyses. This 3-volume set is unique in that it presents narrative speech from carefully selected clinically comparable patients, speakers of 14 languages, and parallel narratives by normal speakers. For each of the 14 languages there is a case presentation chapter analyzing and discussing the language of agrammatic patients, followed by primary data, which are organized as follows: running text of speech by two patients; interlinear morphemic translations of those texts; running text of speech elicited from two normal control subjects (plus interlinear translations); tables and figures analyzing distributional properties of the patients'

speech; results of comprehension tests of the patients; transcriptions of patients' oral reading and writing samples. Neurological information is included with the case presentations, and a short grammatical sketch of each language is added to make the work on all languages accessible even to those who only read English. Language findings are presented for English, Dutch, German, Icelandic, Swedish, French, Italian, Polish, Serbo-Croatian, Hindi, Finnish, Hebrew, Chinese and Japanese. The book is an indispensable reference work for all linguists, psycholinguists and neurolinguists who wish to test their theories against a massive body of data.

Andrea Mayr is Lecturer in Modern English Language and Linguistics at Queen ' s University Belfast, UK, where she teaches and researches in media discourse and in multimodal critical discourse analysis.

This useful sourcebook contains 12 chapters written by experienced classroom practitioners in Hong Kong. One

theme appears constantly in these chapters: that in the English language classroom, whether at primary, secondary, or tertiary levels, high interest and positive motivation occur through active learning when literary texts, literary techniques and literariness are featured. In this book, full coverage is given to the use of poetry, prose and drama in language learning and teaching at all three levels of the education system. The tasks and activities described here have been shown to work with all bands of students. This book is ideally suited both for practising teachers and participants in teacher education programmes in Hong Kong and the rest of S.E. Asia. It will be particularly useful for primary and secondary teachers of English wishing to incorporate appropriate and relevant teaching activities so as to meet the goals of the new Target Oriented English Language Curriculum.

For the first time in English, this anthology offers a comprehensive selection of primary sources in the history of philosophy of language. Beginning with a detailed introduction contextualizing the subject, the editors draw out recurring themes, including the origin of language, the role of nature and convention in fixing form and meaning, language acquisition, ideal languages, varieties of meanings, language as a tool, and the nexus of language and thought, linking them to representative texts. The handbook moves on to offer seminal contributions from philosophers ranging from the pre-Socratics up to John Stuart Mill, preceding each major historical section with its own introductory assessment. With all of the most relevant primary texts on the philosophy of language included, covering well over two millennia, this judicious, and generous, selection of source material will be an indispensable

research tool for historians of philosophy, as well as for philosophers of language, in the twenty-first century. A vital tool for researchers and contemporary philosophers, it will be a touchstone for much further research, with coverage of a long and varied tradition that will benefit today ' s scholars and enhance their awareness of earlier contributions to the field.

A Critical Sourcebook

An Introduction to Language and Linguistics

Introducing students to the methods and debates associated with language testing assessment, this book explores the testing of linguistic competence of children, students, asylum seekers and many others in context of the uses to which such research can be put. It also presents and comments on key readings and articles. First Published in 2002. Routledge is an imprint of Taylor & Francis, an informa company.

This second edition of *The History of the English Language- A Sourcebook* provides a comprehensive and accessible guide to the origins and development of the English language. First published in 1992, the book contains over fifty illustrative passages, drawn from the oldest English to the twentieth century. The passages are contextualised by individual introductions and grouped into the traditional periods of Old English, Early Middle English, Later Middle English, Early Modern English and Modern English. These periods are connected by brief essays explaining the major linguistic developments associated with each period, to produce a continuous outline history. For this new edition Professor Burnley has expanded the outline of linguistic features at each of the main chronological divisions and included more selections and illustrations. A new section has also been included to illustrate the

This accessible textbook is the only introduction to linguistics in which each chapter is written by an expert who teaches courses on that topic, ensuring balanced and uniformly excellent coverage of the full range of modern linguistics. Assuming no prior knowledge the text offers a clear introduction to the traditional topics of structural linguistics (theories of sound, form, meaning, and language change), and in addition provides full coverage of contextual linguistics, including separate chapters on discourse, dialect variation, language and culture, and the politics of language. There are also up-to-date separate chapters on language and the brain, computational linguistics, writing, child language acquisition, and second-language learning. The breadth of the textbook makes it ideal for introductory courses on language and linguistics offered by departments of English, sociology, anthropology, and communications, as well as by linguistics departments.

Second Language Acquisition: introduces the key areas in the field, including multilingualism, the role of teaching,

the mental processing of multiple languages, and patterns of growth and decline explores the key theories and debates and elucidates areas of controversy gathers together influential readings from key names in the discipline, including: Vivian Cook, William E. Dunn and James P. Lantolf, S.P. Corder, and Nina Spada and Patsy Lightbown.

A Cross-language Narrative Sourcebook

Students' Right to Their Own Language

North Borneo Sourcebook seeks to address the lack of available data for the languages of northern Borneo, where forty to fifty distinct languages are spoken in the Malaysian state of Sabah alone. While members of the Summer Institute of Linguistics (SIL) have worked in Sabah for several decades and have published articles on individual languages, until now no comprehensive survey of the languages of Sabah had yet been done. In addition to the languages native to Sabah, also included in this monograph are closely related Southwest Sabah languages spoken in neighboring parts of the Malaysian state of Sarawak, the Indonesian province of Kalimantan Utara, and Brunei Darussalam. The author has included 594 entries with equivalents in each of the forty-six languages that represent the linguistic variation in north Borneo, along with introductory sections listing the personal pronouns, demonstrative pronouns, and case markers for each language. This sourcebook thus fills a critical

Read Free Sourcebook For Linguistics

need in surveying the languages of a single large area in an island of Southeast Asia. Many language communities in this region are endangered and likely to disappear as functioning entities within the next generation or two; this book may be the only record we will ever have of their existence. Linguists and those with an interest in Austronesian languages will appreciate the breadth and detail that illuminate the linguistic scene in an area where before there had been only pinpoints of light.

This is a revised and expanded edition of Cowan and Rakusan's Source Book for Linguistics. In addition to the chapters on Phonetics, Phonology, Phonological Alternations, Morphology, Syntax, Sound Change and Historical Reconstruction, there are two new chapters on Semantics and Grammatical and Lexical Change, plus an index of the 93 languages and dialects represented in the book and a revised bibliography. New exercises have been added to most chapters, and many exercises have been revised to focus on new issues in linguistics. Solutions can be found in a separate section. This new edition is an up-to-date teaching tool and a source of examples in a variety of linguistic applications.

commentaries and key readings - all in the same volume. The innovative and flexible 'two-dimensional' structure is built around four sections - introduction, development, exploration and extension - which offer self-contained stages for study. Each topic can also be read across these sections, enabling the reader to build gradually on the knowledge gained. Sociolinguistics: provides a comprehensive introduction to sociolinguistics draws on a wide range of real texts, from an interview with Madonna to articles in international newspapers and classroom discourse · uses real studies designed and conducted by students provides classic readings by the key names in the discipline from Milroy and Holmes to Fairclough and Cameron. Written by an experienced teacher and author, this accessible textbook is an essential resource for all students of English Language and Linguistics.

This book is the first complete descriptive grammar of Lillooet, an Indigenous Canadian language spoken in British Columbia, now threatened with extinction. The author discusses three major aspects of the language sound system, word structure, and syntax in great detail. The classical structuralism method of analysis, as developed in North America by Leonard Bloomfield and his followers, is used to look at every aspect of Lillooet in terms of its function and position within the whole structure of the language. Van Eijk explains terms and procedures in order to make the book accessible not only to the advanced linguist, but also to the undergraduate student with basic linguistic training. Written with great clarity and well organized, the book is illustrated with copious examples drawn from many years of fieldwork in St't'imc territory.

This volume, in its 25 definitive chapters on normal and

Read Free Sourcebook For Linguistics

nonnormal language development, represents the authoritative and up-to-date complete sourcebook on child language development. All aspects of child language development are addressed, including phonetics, phonology, grammar, and lexical development. Connectionism and government-binding theory, as applied to language development, are fully represented. The relevance of input, cognition, and social factors to language development is explored. Chapters on methodology, particularly using computer databases, are provided for both normal and nonnormal acquisition.
