Study Guide, Chapters 1-13

This text is unique in its first-person, discovery learning approach using a 4-step decision-making model throughout.

It truly conveys a management perspective, by including coverage of topics such as ABM, the value chain and balanced scorecard evaluation techniques. It is also the first managerial text to incorporate coverage on knowledge management (Ch. 13) highlighting the latest developments for improved managerial decision making.

Skousen introduces students to basic accounting concepts, excites them by using lots of real world examples (both U.S. and international), provides them with some basic accounting knowledge, and then shows them how accounting is used and analyzed in actual case situations. Designed for the first financial accounting course at two- and four-year colleges, this book does not take an encyclopedic approach to every possible nuance of financial statement preparation or alternative way to perform accounting functions. Students who desire that level of detail will find it in more advanced classes.
